Metron is the way to keep up to date with new developments in measurement, control and automation.

Each month

recent literature is collated and surveyed in *information reviews* prepared by Sira Institute

newly-published papers are selected for the *current titles* section from 230 world scientific and technical journals and an extensive range of conference proceedings

Comprehensive indexes allow quick location of current titles by subject or first author (in addition, the monthly indexes are cumulated annually)

Metron is edited and published by INSPEC. The Institution of Electrical Engineers, Savoy Place, London WC2R 0BL, England, in association with Sira Institute Ltd, South Hill, Chislehurst, Kent BR7 5EH, England

Subscription rate: £30 for 12 monthly issues and annual index issue. Order from INSPEC Marketing Department, The Institution of Electrical Engineers, Savoy Place, London WC2R 0BL, England. In the Americas, order from Information Services Department, The Institute of Electrical and Electronics Engineers Inc, 445 Hoes Lane, Piscataway, N.J. 08854, USA

Metron's International Standard Serial Number is 0026-1416

'Metron' is a registered trade mark of Sira Institute Ltd

SUBJECT INDEX 12

AUTHOR INDEX 68

COVER PHOTO The Elcostat Static Indicator Mk 1 is a compact hand-held instrument for measuring electrostatic field values from 10^3 Vm^{-1} to 10^3 Vm^{-1} corresponding to the complete static charge density spectrum likely to be found in industrial situations.

Guide to the indexes

This index consists of the following sections:

Lists of Articles and Information Reviews

The titles and authors of the articles are given together with the 1975 issue and page numbers on which they appeared.

Titles, serial numbers of reviews and issue and page numbers are given for the Information Reviews.

Location of Articles and Current titles

A table is given showing the last Article, Information Review and Current title number for each issue as well as the last page number.

List of Journals

The list contains the full title and an indication of the country of origin of journals from which Current titles were taken in 1975. Lists of conference proceedings, reports, books or patents are not included.

Subject Index Headings List

This list is intended to assist in the selection of headings under which to search the Subject index. The list consists of the section headings (in bold) under which the Current titles are classified in each issue, followed by appropriate subject index headings.

Subject Index

This is a cumulation of the individual Subject indexes from each issue in 1975. It consists of fixed thesaurus headings (in bold) under which are indexed individual entries by use of a 'modifier line'. This is not necessarily the title of the original, but gives an indication of its content by modifying the fixed headings. The five-digit number after each entry is the Current title number given to the entry in the monthly issue.

Author Index

The first authors of all Current titles are given in alphabetical order followed by the Current title number. Authors with compound names are indexed under all parts of the name.

e.g. Pet Min Lai is indexed three times, under:

Pet Min Lai
Min Lai Pet
Lai Pet Min

Articles and reviews

List of Articles

- Article 5:** ISA-74: The good and the bad of it, Byron K. Ledgerwood, Jan., pp 2–6.
Article 6: Automatic test equipment in Britain, Michael Payne, Feb., pp 30–33.
Article 7: UPS's are an instrument necessity, P. D. Rush, April, pp 92–96
Article 8: Measurement in the nuclear power industry, Simon Rippon, May, pp 122–126
Article 9: Testing wrapped joints, J. E. Oakley, June, pp 154–156
Article 10: IM-75: A look at some of the exhibits, Vic Royce, July, pp 180–183
Article 11: Some recent developments at the RGO, Vic Royce, Aug. pp 206–207

List of Information Reviews

- Thermal measurements**
97 Jan. pp 7–12; **105** Aug. pp 208–211
Testing and inspection
98 Feb. pp 34–40; **108** Sept. pp 237–241; **111** Nov. pp 283–285
Design: Sources, transducers, instruments
99 Mar. pp 60–65
Design: optical, electrical, electronic and control equipment
100 Mar. pp 65–71
Instrumentation for the environment
101 April pp 96–102; **106** Aug. pp 211–215
109 Oct. pp 258–261; **113** Dec. pp 308–311
Mechanical parameter measurement
102 May pp 127–132; **107** Sept. pp 234–237
Instrumentation and control in industry
103 June pp 157–160
Fluid mechanical measurements
104 July pp 184–187; **110** Nov. pp 280–282;
112 Dec. pp 304–307

Location of Articles, Information reviews and Current titles

Metron issue	Last Article	Last Information review	Last Current title	Last page number

Subject Index

Please refer to the *Guide to the indexes* on page 2 and the *Subject index headings list* on page 8.

Note that not every individual instrument name, instrument component, material, object of measurement etc is included as a subject heading. If a specific term does not appear as a subject heading, look under an appropriate broader heading describing that class of things.

Absorption

- bone density meas., small animal, photon absorptiometer for meas., 16134
- dye laser intra-cavity enhanced, meas. using photodiode array direct reading spectrometer, 15969
- melted salts, procedure for studying high-temp. electronic absorption spectra, 15758
- optical absorptivity in laser mirrors, meas., 16573
- photoabsorptiometer, parameters in near infrared, 15725
- single-beam analyzer for gases, vapours or liquids, 16310

Acceleration

- disc recording monitoring by meas., 15667
- piezoelectric meas., 18829
- position meas., time-resolved, 16660

Accelerometers

- doubly integrating vibrating, 18543
- electronic system, 17487
- middle frequency range and absolute calibration methods, 18831
- monolithic piezoelectric, 17489
- open and closed loop, 17488
- piezoelectric, 18830
- piezoelectric, design and development, 18542
- piezoelectric, development and applic., 16672
- pressure transducer as, 16950

Accuracy

- and calibration of instruments, 17098
- of convergent photography for photogrammetry, 17052
- in dynamic meas., 17898
- in electrical and electronic meas. instruments, 16213
- of imaging in special microscopy techniques, 18145
- ionizing radiation, personal exposures to, international comparison of meas. precision, 16141
- liquid and gas pressure meas., 18012
- measurement errors, 17379
- measurement system viability study, 18669
- metrology of length, mass and time, improvements, 16198
- microinterferometer, scanning and integrating, 18328
- normalization in standards on testing methods, 18295
- optical rotation meas. using ring interferometer, 17190

reactivity meas., effect of variations

- in core configuration, 15834
- results from meas., algorithm for determining influence of external factors, 16199
- of reverberant sound meas., 17276
- sound level, in situ, with meters, 18552
- statistical comparison of instruments, problem, 18667
- of temperature probing of atmosphere by satellites, 17074
- of thermocouples, 17169
- of tristimulus colour meas., 16581
- wind meas., limitations for balloon systems, 16742

Acoustics

- biophysiological signals, meas. in audio spectrum, 18062
- building facades, field meas. of transmission loss, 16074
- flow meas., large volume, by sonic techniques, 17994
- holography, acoustical, 17405
- holography, applics., 17645
- hydrological meas., shipborne system, 18640
- hydrophones, sensitive, design, 18555
- interferometer, heterodyne laser, with acousto-optical modulator, 17189
- intrusion detectors, selection criteria, 17306
- light modulation, phase methods for linear displacements meas., 18283
- lower atmosphere temp. profile obtained by acoustic sounding, 16168
- measurement equip., testing in air, 18294
- microscope, acoustic, scanning version, 15905
- microscope, scanning acoustic, 17900
- microscopy, review, 16510
- resonator for liquids, 18598
- reverberant power meas. in air and in water, chamber, 18554
- reverberant sound meas., precision, 17276
- reverberation meas. system, 18035
- room, portable meas. equipment, 18034
- sound-absorbing materials, flow resistivity meas. device, 18524
- sound level in situ accuracy with meters, 18552
- speed of sound in molten salts, detmn., 16676
- testing, applic. of digital processing,

16102

wattmeter, field type, 17279

Adhesives

- adhesivity meas. using ultracentrifuge, 17453
- holographic detection of adhesion faults, 17302
- ultrasonic wave inspection of bonded materials, 16984

Admittance

- measurement with broad band bridge, 16827

Aerospace

- hypervelocity aerodynamics instrumentation, 17467
- wind tunnel measurements, photon correlation analysis application, 16127

Agriculture

- electronic instrumentation, review, 18595
- vegetation, toxic effects of metals on, detection from satellites, 16471

Air

- Byron model 233A quality analyzer, 18358
- electrostatic field potentials meas., 16535
- flow measurement using temp. fluctuation, 17465
- flowmeter, 17980
- hot-wire sondes, new calibration method, 16030
- length meas., pneumatic methods, 18826
- particles, airborne, diameters, 18625
- radioactive aerosol control systems, 15879
- relative humidity, potentiometric meas. method, 16620
- showers, time analyzer for nano-second range, 17158
- turbulence measurement, 18820
- velocity and mass flow meas., ionization device, 17780

Aircraft

- altimeters, FM/CW radio, 17483
- anemometer, DC hot-wire, 18535
- cockpit displays, future, 18424
- display concepts for, 16520
- displays, monitoring, 18688
- dynamometer for testing tyres, wheels and brakes, 17320
- electroprospecting, 2-aircraft,

- increase in separation, 17053
laboratory and flight test instrumentation, 17528
noise monitoring system, digital automatic, for use at airports, 17867
thermometer, remote electric, for air temp. meas. in flight, 15951
vertical scale instruments, solid state, 16446
vibration measurement, 16101
- Alarm systems**
annunciator, visual indicators for, 18691
heart rate meter, digital, 15864
level, trends, 17471
pollution, 18357
- Alignment**
axial, of large-scale products, checking instruments, 18313
- Altimeters**
analogue sensor with digital instrumentation, 18285
barometric stations altitude detmn. by barometric levelling, 16667
FM/CW radio, 17483
radar, expmnt., 16357
radar, lightweight, 16356
- Ammeters**
contactless instrument, 15681
distorted AC, digital r.m.s. meas., 16249
electro-optical methods, 17581
micro-, checking, 16808
- Amplifiers**
audio tester, 16387
electrometer, with modulator using voltage-variable surface diodes, 16811
electronic, qualimetry of, 17926
for instrumentation, 16496
for modulated ionization currents meas., 16226
operational, converting digital voltmeter to fluxmeter, 18181
operational DC, capacitance meas. applic., 16529
operational, high-impedance voltmeter based on, 18177
oscilloscope, broadband, for nanosecond range, 15896
parametric, at input of 4.25 mm wavelength radiometer, 15965
thermometry, noise, low noise amplifier, 16284
- Analysis**
machinery noise meas., narrowband analysis techniques, 15821
reactor cores, bowed, computer program, 15835
sound sources of machinery, use of frequency analysis to identify, 15820
- Analysis: chemical**
activation, instrumental, automatic sample exchanger, 15772
activation, new trends, 18792
of atmospheric particulates by instrumental neutron activation analysis, 18899
atomic absorption, with AC arc source, 15757
automated, future directions, 16136
automated in industry, current status, 15837
automated in the laboratory, 15737
automated, state of the art, 16135
automation in the laboratory, 15738
Chemlab automated system, use in service and education lab., 15739
concentration in chemical elements detmn. through X-ray fluorescence, 16331
electron probe, 18766, 18767
electron probe microanalysis, industrial applics., 16995
electron-probe, survey, 18250
electron spectroscopy application, 18236
elemental microanalysis, computer-controlled microwave discharge emission spectrometer for, 16878
emission spectrochemical, liquid-layer on solid-sample spark technique, 15993
flame plasma diagnostic techniques, 16619
fluid, 17759
forensic science, scanning electron microscope in, 17531
industrial effluent, spectrochemical detmn. of 36 elements, 16738
inorganic, 18768
isotopic, mass spectrometer for, 16892
melting point meas. apparatus by α rays absorption, 16854
microcalorimetry, tool for biochemical analysis, 16130
multicomponent compounds, detmn. of stoichiometry and disorder by vibrational spectroscopy, 16613
nonaqueous solutions, electrode for spectrographic analysis, 16611
nondestructive elemental, using X-ray and neutron techniques, 16325
nuclear, industrial applics., 16994
nucleonics, literature review, 17222
organic compounds, identification of microsamples by IR spectroscopic methods, 16900
pH meter, standard reference electrodes for, 15741
photometer, multichannel, 16869
planetary surfaces, neutron methods for elemental analysis, problems, 16769
quality control and maintenance methods, 16305
samples containing small amount of matter, 15769
silver-copper alloy coins, non-destructive, use of specific heat, 18791
surfaces, physical methods, 18786
surface studies, ion beam, recent advances, 18787
thermogravimetry data acquisition system, 15744
thin film compositional, techniques, 18488
trace elements, by charged particle induced X-radiation, 16901
trace elements by X-ray fluorescence, 18247
trace, of picogram quantities, detection limits, 17430
trace, of solutions, inductively coupled plasma-optical emission analytical spectrometry, 15992
using microwave spectroscopy, 17963
X-ray fluorescence, use, 16881
- Analysis: gas**
boiler flue gas dust content detmn., 16423
chromatography mass spectrometry, state-of-the-art, 17212
concentration meas. by coherent Raman anti-Stokes scattering, 17248
density meas. by means of weighing, 17247
detection methods, 18252
detector with semiconductor sensor, 16898
ESRO 4, 18098
explosive, recording, thin film sensing element, 16608
flow measurement by plume analysis with Barringer correlation spectrometer, 18000
flue, without sampling, 18770
impurity determination, capacitive discharge method, 15977
infrared in situ cell, variable temp., for gas-solid surface studies, 15980
microimpurities in, spectrochromatographic detmn., 15899
SO₂, derivative spectrophotometry, 18772
temperature measurement, rotational Raman interferometric technique, 17942
temperatures, rapidly changing high, meas., 16549
thermometry method, 17168
- Analyzers**
electron-optics, with set of different sweeps, 15897
harmonic, for distribution network, 16124
harmonic, for supply industry, 16107
on-line process, selection guidelines, 18254
single-beam absorption, 16310
telegraphy, automatic distortion analyzer, 18444
time, for nanosecond range, 17158
transient signal, 15668
- Analyzers: chemical**
concentration of suspensions, 16616
conductometers, high-frequency electrodeless, design of inductive

meas. cells, 16618
 electrochemical trace, 16306
 electron capture detector, 15742
 electron microprobe, 18764
 electron probe, very light elements analysis, 18765
 filtration tests, instrumentation for, 18256
 impurity concentrations distributions in solids, in-depth analyzer, 16891
 ion microprobe mass, as geochromological tool, 17443
 laser microspectral, investigation, 16587

Analyzers: gas
 air, Byron model 233A, 18358
 chromatothermograph, gas logging, 16605
 chromatograph, digital, 16885
 combustible gas detectors, 17452
 electronic detector, 17451
 exhaust gas sensor, 17555
 flowmeter, high sensitivity, 16645
 heat flux probe as flowfield diagnostic, 16340
 interferometer, portable explosive gas, for use in mines, 18050
 mass spectrometer adaptation, 17211
 mass spectrometer, remote operation quadrupole, using custom radio-frequency link approach, 16003
 mass spectrometric system with multi-collectors and peak selectors, 17209
 scintillation counters, near infrared and ultraviolet gas-proportional, 16329
 semiconductors as gas sensors, 15976
 solubilities in aqueous solutions, automated constant pressure reactor for meas., 16607
 thermal conductivity meas. instrument, 17184
 trace atmospheric, 17341
 transducer, gas-electric, 16606

Anemometers
 aeroplane DC hot-wire, 18535
 applications in research and industry, 17786
 conduction and thermo-, comparison on characteristics, 16036
 conical hot film probe in recirculating water flow, calibration and use, 16644
 constant-temperature, hot wire, 18808
 digital, 18633
 using Doppler-difference technique, 17231
 Doppler laser, for turbulence meas., 16651
 fluidic, 17779
 hot-wire constant-temperature, 16478, 17462
 hot-wire, for investigation of low velocity gas flows, 16345
 hot-wire, in miniature axisymmetric flows, 16034
 hot-wire, measurement of velocities induced downstream from four-

bladed helix, 16037
 hot-wire, practical aspects, 15782
 hot-wire, research and industrial applics., 17822
 integrated silicon, 17562
 laser, 17776
 laser Doppler, 17981
 laser Doppler, applications, 18262
 laser Doppler, hypersonic flow velocity meas., 17235
 laser-Doppler, using Fabry-Perot interferometer, 17782
 mass flow device, 17780
 photocorrelation techniques, 18813
 sea-surface, velocity, remote meas., 17068
 solid-state temperature, for fluid flow studies, 17463
 sonic, for atmospheric turbulence meas., 18090
 sonic velocimeter, 17348
 thermistor, for unsteady flow meas., 17781

Angle

bore gauge, perpendicularity meas., 16064
 displacement, angular, automatic meas., interference method, 17263
 displacement, angular, of object in space, precision meas., 17264
 displacement transducer, 18827
 electro-optical automatic meas. and transmission apparatus, 16368
 loss, at infralow frequencies, meas. instrument, 16823
 measurement by coherent optic device, 15804
 measurement using capacitors and voltage dividers, 16935
 measuring instrument, 'Circap', 16942
 precise measurement using capacitors and voltage dividers, 17481
 prism, interferometric checking method, 16570
 of rotation, meas. using two-frequency laser, 15805
 slip, in electric shaft systems, meas., 16369
 small wedge, meas. using Nomarski interferometry and applic. to small semiconductor samples, 16065
 synchronous machines, digital device for angular speed and torque angle meas., 18027
 vacuum chamber positioning mechanism, high precision angular displacement, 16069

Area

curvimeter for meas. of, 17485
 microcalorimetric meas. method, 16948
 surface, electrochemical meter, 16947

Assembly

of objectives, lens decentering and deformation testing during, 16493

Astronomy

achromatic stellar interferometry, 17366

airglow and auroral studies, micro-channel-plate concave-grating spectrometers for, 18099
 air-mass source regions, influence, 15890
 astrometry, radio and optical, 18109
 automation in, 16746
 camera, experiments with, 16751
 celestial radio sources study, digital dispersion spectroscopic technique, 16764
 Clear Sky Detector, 18353
 coherent detection, 18643
 cosmic background radiation meas., mm. wave radiometer, 17085
 cosmic X-ray radiation meas., 18913
 gamma-ray, 18914
 gamma-ray, Ge (Li) spectrometer for, 17081
 gamma-ray, NaI (TI) crystals as spectrometers, 18660
 gamma-ray, tagged gamma-ray beam for calibration of instruments, 16765
 image intensification and video recording system, 18906
 image tube, self-scanned digital, 18108
 far infrared and microwave radiation detection using Josephson effect, 17878
 infrared heterodyne mixing and detection, 18656
 infrared multi-colour photometry and polarimetry, 18103
 infrared techniques, 17359
 instrument manufacture in USSR, 17079
 interferometer, heterodyne, 18658
 interferometer, rapid scanning Michelson, as infrared spectrometer, 18102
 interferometers, stellar, comparison, 18657
 interferometer, Twyman-Green system, 18101
 interferometry, very long baseline, in southern hemisphere, 16761
 large telescopes of Max-Planck Institute, 17574
 lunar laser ranging station, 16189
 magnetometric meas., applics., 17875
 multiple mirror telescope, state-of-the-art, 18117
 observatory, automated, concepts, 16747
 optical, modern instrumentation for, 17078
 photoelectric devices in, 16749
 photometer, photoelectric, double beam, 18378
 photometric telescope, automated, 18118
 Pioneer 10/11 and Helios A/B cosmic ray instruments, 18652
 planetary surfaces, neutron methods for elemental analysis, problems, 16769
 pulsar hunting online, computer hardware and software, 16763
 radioastronomy, aperture synthesis

with nonregular distribution of interferometer baselines, 16758
 radioastronomy, millimeter-wave receivers, 17881
 radioastronomy, principles, 16745
 radioastronomy, relationship between measured signal and received signal field-strength, 16762
 radioastronomy, satellite scientific instrumentation, 18903
 radioastronomy, space-frequency synthesis, 16759
 radioastronomy, very large array configurations for observation of rapidly varying sources, 16757
 radioastronomy, wideband decametric array, 16489
 radiotelescope at Jodrell Bank, 16755
 radiotelescope, 4.75 m millimeter wave, 18115
 reflector, 41 inch, 17879
 satellite for research, 17877
 satellite, X-ray observatory for, 18912
 Schmidt 17/24 inch telescope, quadrant photosil autoguider, 18120
 shuttle-borne infrared interferometer, requirements, 18650
 sky photometer for 48-inch Schmidt telescope, 18646
 speckle interferometry and possible extensions, 16748
 spectrograph, extreme UV, 18106
 spectrograph, nebular insect-eye Fabry-Perot, 18107
 spectrographs, pupil imagery in, 16488
 spectrohelioscope, miniaturised, 18908
 spectrometer for, polarization Fourier, 17080
 spectrophotometer for, Fourier transform, 16750
 spectroscopy, submillimeter-wave, 18100
 stars, Fourier transform spectrometer for observations in intermediate infrared, 18385
 stellar guiding, sensitivity of sector detectors, 18386
 stellar interferometer, 10-micron heterodyne, 17573
 stellar photoelectric spectrometer, electrical system, 17087
 stellar photoelectric spectrometer, optical system, 17086
 stellar spectrometers, crystals for, 15892
 stellar X-ray, LiF Bragg spectrometer, 18659
 supersynthesis, digital correlation spectrometer, 16760
 synthesis radio telescope, 17088
 telescope, 18645
 telescope, airborne infrared, 18116
 telescope, 48-inch, 18119
 telescope, 60 cm, 16753
 telescope, 158 inch, 18112
 telescope, Skylab soft X-ray, design characteristics, 18122

telescopes, large, electronic systems for, 17089
 telescope, two-reflection Coudé system, 18111
 telescope with spectrograph attached, 16754
 University of Kent observatory, 18379
 US Naval Observatory Automatic Transit Circle, instrumental parameters, 18110
 X-ray, 18911
 X-ray, all-sky camera battery for, 17882
 X-ray, aperture synthesis in, 17880
 X-ray instrumentation, evolution, 18376
 X-ray spectrographic telescope, 18123
 X-ray telescopes, 18121

Atmosphere

aerosols, liquid water content, microwave meas., 18630
 airglow and auroral studies, micro-channel-plate concave-grating spectrometers for, 18099
 auroral emission, measured, compared with that calculated from measured electron flux, 15888
 auroral emissions, cryogenic interferometer spectrometer, 17731
 auroral morphology, auroral dynamics and modern observational techniques, review, 15889
 barometer for low altitude meas., 18089
 cloud physics, 18355
 diagnostics by laser spectroscopy, 17860
 electric fields and currents in, meas. techniques, 17563
 electricity in, meas., 17076
 fluoride monitors, comparison, 15878
 heat flux, calibration and tests of yaw sphere-thermometer, 16553
 instrumentation, solid state, 17857
 ion and neutral motions, simultaneous meas. by radar and optical techniques, 15876
 ionospheric direct meas. techniques, 17569
 lidar for meas., 17564
 lower ionosphere, positive ion mass spectrometer for studies of, 17358
 lower stratosphere, far infrared emission spectrometry, 15881
 lower, temperature profile obtained by acoustic sounding, 16168
 lower thermosphere, comparison between meteoric radar and incoherent scatter meas., 15883
 magnetic substorms, use of DAPP auroral imagery in study, 15887
 mass spectrometer, neutral and ion, on satellite, 17737
 mass spectrometers, balloon-borne, cryopumping system, 16474
 natural radioactivity of, high-altitude meas., 18091

nephelometer, laser polar, 18898
 neutral structure from satellite drag meas., 15872
 overcast sky estimation by ground-based actinometry, 18354
 ozone distribution investigation, 15875
 particulate mass monitoring with beta radiation detector, 15877
 photoelectron spectrometer, 18621
 polarimeter, airborne infrared, 18895
 radiometer, infrared temp. profile, 16185
 radiometers, photon-counting polarizing, 16186
 small ion mobility meas., and relationship, 15873
 sounding balloons, radar for automatic tracking, 17077
 spectroscopy, submillimeter-wave, 18100
 spectroscopy, sun glint heliostat, 16473
 stratospheric Aitken nuclei counter, 18900
 stratospheric composition, infrared meas., 16743
 stratospheric composition meas. by solar spectroscopy, 16182
 stratospheric measurement, balloon-borne equipment, 18097
 stratospheric turbulence, remote sensing by spatioangular cross correlation of stellar light scintillation, 18375
 structure constant profile, remote detmn. by statistical inversion procedure, 16164
 temperature distributions, global, from airglow meas., 15886
 temperature fluctuations, automatic meas. system, 17075
 temperature measurements in flight, remote electric thermometer, 16951
 temperature measurements, lidar technique, 17680
 temperature profiles, analysis from radiosonde data, 15874
 transfer function, coherence interferometer for direct meas., 16766
 transmission studies, filter-wheel solar radiometer, 16188
 turbidity measurements using photoelectric photometer, 15871
 turbulence measurement, sonic anemometer-thermometer for, 18090
 turbulent boundary layers at supersonic speeds, total temp. probes, 16303
 upper, composition meas. with rocketborne electron beam probes, 16183
 upper, incoherent scatter radar design considerations, 15880
 water vapour, satellite observations, 16167
 water vapour sensors, aluminium oxide, 16744

Automation

automatic test equipment in

Britain, 17919
in the chemical laboratory, 15738
state-of-the-art review, 17093

Balances

construction, advances, 18833
electromagnetic, for precision
shipboard weighing, 17492
electromagnetic microbalance,
review, 17493
magnetic, increasing precision of,
18549
oscillating quartz-crystal micro-
balance, 18287
pendular, for magnetic meas., 17933
single-pan, applic. to meas. of
densities of solids, 17269
strain gauge, for weighing moving
railway stock, 17825
thermo-, sensitivity, 18548

Biology

bacteria presence, radionuclidic
test, 18060
bone density meas., small animal,
photon absorptiometer, 16134
carcass shape recording by moire
method, 16133
cell and nuclear sizes meas., computer
system, 16132
copulation in sheep, telemetry system
for automatic recording, 17546
dynamic forces in endurance sports,
telemetry, 18067
electron microscopy, applic., 17010
films, modulation spectroscopy of,
18061
marine animal behaviour, ultrasonic
biotelemetry system, 17545
microinterferometer application,
18328
microorganisms, motions in chemical
gradients, recorder, 16712
microscopy in vivo by NMR, 18880
microspectrofluorometer, direct
recording, 18330
microwave power, continuous monitor
of dangerous levels, 17017
muscles, instrument for dynamic and
static meas. of large length
changes, 16138
nematode counting and size meas.
machine, 18879
neutron dosimetry in, 18881
nuclear physics methods, 18877
personal noise exposure meters,
performance evaluation, 17016
pressure meter, 17533
scanning electron microscope in,
18878
shark behaviour study using ultrasonic
telemetry, 18331
signals, meas. in audio spectrum,
18062
spectrophotometer, twin-wave
differential, 18329
spectroscopy, flame emission and
atomic absorption, applics.,
17836
telemetry system, PDM multichannel,
18064

temperature sensors, thin-film
17011
ultrasound, bibliography of diagnostic
uses, 15856
wildlife tracking system, automatic,
17874

Biomedicine

acoustic power outputs detmn. in
microwatt-milliwatt range, 15812
audiometry training aid, 16153
automated analysis, future trends,
16136
automated analysis, state of the art,
16135
autometry, computer-aided, 17021
bacteria mass and size, infrared
scattering method, 18596
bioelectric impedance meas. at low
frequencies, 17334
bioluminescence studies, image
intensifier-spectroscope system,
18882
brain, advances in electrical recording,
17841
brain tissue properties, meas. in vivo,
pressure-displacement transducer,
18615
breath flow meas. techniques, 16453
breathing failure detection by radar,
16452
burn hazard meas., thermesthesio-
meter, 17015
cardiac output analysis system,
18884
cardiac output, continuous monitor-
ing, 17332
cardiac tachometer, linear pulse-to-
pulse, 17024
catheter-manometer calibrator,
18333
catheter-tip capacitance pressure
transducer, 17844
data recording and storage system,
18599
diagnosis, acoustic imaging system,
16131
diagnostic radiologic equipment,
exposure time meas., 17544
diagnostic ultrasound, calibration
and quality control, 16449
dosimetry and facilities of outdoor-
indoor ^{60}Co irradiator, 16142
echocardiography, development,
15845
echoencephalograph, 17335
EEG and neurophysiology, progress,
18340
EEG, bedside recording techniques,
17538
EEG diagnosing system, automatic,
16456
EEG instrumentation, 17537
EEG radio-telemetry equipment,
17539
EEG recording equipment, 17536
EEG, state-of-the-art, 18618
electrocardiology, progress in data
display, compression and
transmission, 17022
electromedical apparatus, safety
and reliability, 18603

electronic measurements device for,
17534
fast neutron-beam dosimetry, ion
chamber and proportional counter
approaches, 16148
fetal monitoring using computers,
17542
fluorescence microscope, 17109
foetus investigation, 18616
frequency analyzer for clinical
phoniatrics, 18620
gauge technology developments,
16447
hand pressure, digital meter, 16653
hard beta- and gamma-emitting
radionuclides in biological samples,
15853
health care systems, telecommuni-
cations, 18066
health care telemetry, 18065
heartbeat measurements, opto-
electronic device, 18338
heart parameters, multichannel
instrument for meas. and recording,
16454
heart rate meter, digital, 15864
hypodermic fiberscope, 17540
image sensors, solid state, applics.,
16714
impedance meas. in, 17835
instrumentation, applied physics
course, 18059
instrumentation, use of state logic,
17325
intracranial pressure meas., 18614
ionizing radiation, personal exposures
to, international comparison of
meas. precision, 16141
lead poisoning detection by computer
scanning, 16458
magnetic fields produced by human
heart, brain and lungs, meas.,
18337
magnetocardiography, superconduct-
ing second-derivative gradiometer,
16833
microcalorimetry, tool for biochemi-
cal analysis, 16130
multichannel temperature and heart
rate radio-telemetry transmitter,
16717
multiphasic health testing system
using minicomputer, 17329
nuclear, diagnostic counting and
imaging techniques, 16720
nuclear diagnostic instrumentation,
future trends, 16719
nuclear medical meas. data system,
15846
nuclear medicine organ image
transmission, 18070
nuclear, semiconductor detector
systems, 15855
patient mobility recording, 16455
patient monitoring equipment,
rational and economical use,
18332
patient monitoring system, digital,
17327
perception function meas. methods,
18619
plethysmograph, capacitance, for

small volume changes meas., 17027

polarcardiography and data acquisition, 16715

pressure measurement, IC transducer, 17013

pressure recording microtransducer, 18606

pulmonary function investigation, gamma ray densitometer, 18610

pulmonary function meas., dynamic, multi-scintillation crystal array, 16459

pulmonary physiological parameters meas. and calc., 18611

radiography, use of pinhole collimator, 15849

radionuclide tracers in vivo, radio-telemetrical detector unit, 16723

radiotherapy, ultrasonics in, 15859

recorder, cassette tape, storing eight analogue signals, 15920

respiration investigation instrument, 16716

respiration monitor, impedance meter, 18612

respiratory impedance, direct meas., 17541

scintigrams, display controller for interactive analysis with mini-computer, 16139

scintillation camera, 15848

spherical section scanner, automatic ultrasound, 15858

strain gauge, silicon, applic. for investigating periodic motion of parts of body with breathing, 15852

telemetry and patient monitoring, trends, 17326

temperature telemetry system, improved, 18068

thyroid scanners, X-ray fluorescent, neutron and photon flux, 16145

tissue impedance in vitro meas. over wide frequency range, 15850

tissues, acoustic differentiation by quantitative echography, 17842

tomograph, whole body computerised transaxial, 17840

tomography, gamma-ray, human organs observations, 16150

tomography, scintillation camera, evaluation, 16724

transducers for measurements, 17532

ultramicrospectrophotometer, atomic-absorption, for calcium determ., 18601

ultrasonic field intensity meas. instrumentation, 17280

ultrasonic imaging system using time delay spectrometry, 15860

ultrasonics, calibration in, 17839

ultrasonic scanning, display dynamic range expansion method, 15862

ultrasonics in, 17328

urinary bladder emptying meas. using electrical impedance, 18617

urinary drop spectrometer, 17543

uroflowmeter, 17847

videofluorography, 18597

whole body counter as meas. device

of internal and external contaminations, calibration and practical use, 15851

X-ray image intensifiers, production testing, 18063

X-ray imaging, state-of-the-art, 18069

X-ray instrumentation, use of ^{129}I for exposure rate calibration, 16144

Blood

arterial wall echoes, ultrasonic imaging, 15861

cardiac output analysis system, 18884

cardiac output, continuous monitoring, 17332

carotid artery parameters meas. by ultrasonic technique, 17846

central venous electromanometer, self-levelling, 17025

circulation investigation instrument, 16716

circulatory diagnosis with X-ray ratio-densitometry, 17023

conductometer for parameters meas., 18608

extra-corporeal circulation applics. of oxygen saturation monitor, 15865

flow, continuous-wave Doppler instruments, 18073

flow, cutaneous, photoelectric plethysmograph for meas., 16718

flow in small vessels, meas. by u.s. Doppler system, 18076

flow measurement by NMR techniques, 18078

flow measurement, proton spin technique, 18605

flow measurement system, ultrasonic random-signal, 17785

flow measurements, thermal conductance method, 18609

flowmeter, pulsed Doppler ultrasonic, real-time velocity profiles, 18075

flowmeter, ultrasonic, 18339

flowmeter, ultrasonic Doppler shift, 16922

flow velocity meas. using fibre optic catheter and optical mixing spectroscopy, 17843

flow velocity meas. using ultrasonic catheter-tip probe, 18077

haemodialysis, pressure monitor isolating devices, 16155

noninvasive pressure-pulse recorder, 15866

platelet counting and automatic measurement in haematology, 16154

plethysmograph, capacitance, for small volume changes meas., 17027

pressure, automatic indirect meas. apparatus, 17330

pressure, infant, ultrasonic meas., 15863

pressure measurement by catheter insertion, 18607

rheology, instrumentation and techniques, 18072

sphygmomanometer, instrument for calibration of, 17331

steady and pulsatile flow, thermal

dilution technique, evaluation, 18886

thromboviscometer, automatic, 17845

transport velocity meas., Doppler system, 18885

velocity, fluctuating, thin film gauges, 17026

velocity measurement, catheter-tip, single-crystal ultrasonic probe, 17333

viscosity measurement in Couette viscometer, 18074

Boilers

combustion gas monitoring, 17317

feed-water, potentiometric sensor for ammonia detmn., 15827

flue gas dust content detmn., 16423

liquid level monitoring apparatus, 17245

sludge, with control system, 18592

Bolometers

calibration technique, 15964

cryogenic semiconductor, 17943

dielectric low-temp., improvements, 17182

electrogalvanic, compensating, 18464

far infrared detector, 16561

fast superconducting, construction and calibration, 18743

heat pulse detection in magnetic field, CdS, 17695

infrared, in helium bath, for spectroscopy, 18742

in microwave effect meas., 15693

nickel-film, investigation, 17694

semiconductor, limiting sensitivity, 16559

thin-film, for power meas., 17592

Botany

air pollution monitoring with tobacco plants, 17553

Bridges: electrical

AC, for precision meas. of seawater parameters, 17351

angle and length meas., 16935

broad band, in precise admittance meas., 16827

for capacitance meas., with current comparator, 17595

DC comparator, 0.015% error, 17589

DC comparator, low-temp., 17588

digital AC, 16240

high-resistance and low currents, 15688

inductors, measurement, 16532

linearized thermistor multivibrator, for temp. meas., 16269

loss measurement at combined load, 18717

microwave cavity, single-ended, simultaneous meas. of coupling coeff. and loaded Q, 15702

resistance measurement, scientific and industrial applics., 16241

for resistance thermometry at low temps., 15718

strain gauge, DC, 18842
for superconductivity detection, 17932
transformer ratio-arm and two terminal techniques compared, 17672
transformer ratio-arm, measurements with, 18727

Bubbles

differential maximum bubble pressure method for surface tension meas., 16658
magnetic, electrical sensing, 16543

Cables

conductors, audible test set, 16125
digital instruments interface bias, 17647
elongation meas., 16436
fault localization in practice, 18709
HV, joint temp. meas., 16126
live, tracing and identification, 18865
quality inspection unit, for use during fabrication, 18320
tensiometer, 17833
test and fault location van, 17524
testing, universal equipment, 18321

Calibration

accelerometers, middle frequency range, 18831
and accuracy of instruments, 17098
of accurate meas. instruments, 16197
aerosol field-type spectrometer, 15760
anemometry, hot-wire, practical aspects, 15782
astronomy, gamma-ray, tagged gamma-ray beam for calibration of instruments, 16765
automatic system improves quality, reduces costs, 18668
bolometer detection systems, 15964
bolometer, fast superconducting, 18743
Bureau National de Metrologie, evaluation and approval system, 18670
catheter-manometer calibrator, 18333
communications industry, meas. instruments, 17006
dead-time calibrator, 16914
in diagnostic ultrasound, 16449
of dip-meter, 16826
electrometer, with shock excitation cct., 15680
exposure rate of X-ray instrumentation, use of ^{129}I , 16144
far ultraviolet spectral radiance, 16584
of field spectroradiometer, 15720
flowmeters, 17458
of flowmeters, device, 16640
of flowmeters, turbine type, 16919
gas cross-reference service, 18769
Hall probes for range of induction up to 3T, 16257
hot-wire sondes in air at low flow velocities, 16030
hydrostatic level meter, 16050

in image optics, 17383
impedance matcher for waveguide and coaxial systems, 15705
for interelement effects in X-ray fluorescence analysis, 15999
material for particle size analysis, 16319
medical equipment, laboratory, 16140
in medical ultrasonics, 17839
meter, by computer, 18173
of paramagnetic thermometers using superconductive fixed points, 16842
piezoelectric ultrasonic transducers, 16383
platinum resistance thermometers, 18733
power frequency wattmeters at very low power factors, 16817
of pressure measurement systems, multiplexed, in real-time, 17480
pressure, multiple coaxial wire, 16654
recirculating water probe, calibration and use of conical hot film anemometer probe, 16644
recorder test and calibration set, 15919
resistive low temp. sensors, equipment set, 17690
rocks, air porosimeter, curve, 17354
secondary thermometers in He^3 bath by meas. of vapour pressure, 16550
shock-tunnel pressure transducers, in-place, by dynamic calibrator, 16128
sonar, 18642
of sphygmomanometer, instrument for, 17331
temperature measuring apparatus, 18732
thermistor gauges, velocity calibration unit for, 17802
of thermocouples, accuracy, 17169
ultrasonic fields, comparison of methods, 16384
volt-ohm meter, 15937
wavelength, for spectrometer with photon counting detecting system, 16588
of whole-body counter used as meas. device of internal and external contaminations, 15851
wire gauges, testing, 15801
for X-ray beams, low energy, 16627
yaw sphere-thermometer for heat flux meas., 16553

Calorimeters

dynamic adiabatic scanning, and applics., 16562
heat capacity meas. device, 18214
melting of solids in organic media, heat meas., 16565
microcalorimeter, fast, with spiral thermoelectric elements, 18470
micro-, for study of liquids, 18212
photoelectro-, differential, 17692
scanning, using pyroelectric detectors, 18469

standard, for pulsed lasers, 18741
stored ion, principles, 18472
temperature variation meter, automatic, 15719

Calorimetry

flowmeter with radiant heat source, 18806
laser flash, heat capacity meas. of nuclear materials, 16563
low water contents in water-soluble powders, meas., 15774
microcalorimetry, tool for biochemical analysis, 16130
micro-, method of specific surface area meas., 16948
minicomputer and data acquisition system, 15955
precision, at low temps., 17946
thermal conductivity determination, 16851
thermal relaxation, below 1K, 16564
thin-foil high speed, 16279

Cameras

astrometrical experiments with, 16751
gamma, for medical diagnosis, 15848
image intensifiers, proximity focused, for photographic systems, 15655
TV, depth-of-field calculators, 17951
X-ray astronomy, all-sky battery, 17882

Capacitance

absolute farad, meas., 16805
automatic meas. using frequency discriminator, 17139
bridge with current comparator for meas. of, 17595
catheter-tip pressure transducer, 17844
checker, 18439
digital meas. to one farad, 17928
digital meter, 17670
dilatometer, linear, 18473
flowmeter, differential, 17765
of high lossy materials, high frequency meas., 16530
at infralow frequencies, meas. instrument, 16823
measurement using analogue computers, 18186
measurement using DC operational amplifier, 16529
meter and radio receiver, 18711
meters, 18440, 18441
MIS meter, 18710
oscilloscope meter, 17929
plethysmograph for small volume changes meas., 17027
series capacitors, for voltage regulation, capacitance meas., 16246
series condenser, for voltage regulation, meas., 16246
static convertors, 16219
transducer, borehole thermometer with, 17567

Cathode-ray tubes

colour, image formation in dichromate resists, 16505

- data display, 16804, 18158
deformographic storage and display tube, 16516
electron density meas., 18435
information display units, 17650
radar displays, 17120
- Cement**
concrete mixes, rheological study, 16428
content in soil mixtures and concrete, detmn., 16427
continuous weighing technique, 16426
industry, pollution control, review, 18873
sulphur oxide emissions from works, sampler, 18319
- Ceramics**
bend recording device for brittle specimens, 18570
non-destructive inspection techniques, overview, 16979
PLZT, memory and display applics., 17655
strength testing, static testing, 16969
testing under thermal action of electric arc, 17298
transparent image storage and display material, 17417
- Chemical**
automation in the laboratory, 15738
laboratory, minicomputer use, 15736
microorganism motion in chemical gradients, recorder, 16712
- Chemical industry**
automated analytical chemistry, current status, 15837
conductivity meas. in, 18051
demineralization plant, recorder of events, 16425
electrical equipment for protection against explosion, 18587
measurement and control instruments, rate of failures, 17380
process control, rotating viscosimeters, 16424
- Chromatography**
automation, trends, 17760
combustion gas analysis, 16300
digital gas, 16885
gas, computerised, in pollutant contents of samples analysis, 17032
gas-logging chromathermograph, 16605
gas, mass spectrometry, state-of-the-art, 17212
gas, pyroelectric thermal conductivity detector for, 16850
gel-permeation, high-resolution, 15983
large-scale, future, 18251
liquid, high performance, 17446
liquid, interface for mass spectrometer, 18779
mass spectrometer, computerized, 18253
radiochromatography, state-of-the-art, 15743
spectro-, detmn. of impurity in gases, 16899
thin-layer, and photoacoustic spectrometry, 17955
thin-layer, review, 15984
water pollution analysis, 18096
- Circuits**
board testing, computer-controlled system, 17599
capacitances, automatic meas. using frequency discriminator, 17139
charge and discharge, in emission spectrometry, 17725
DC meas., ferromagnetic cct. with Hall transducer, 15933
decoding, for display devices, review, 17116
display devices, 15922
double-clad printed boards, automatic testing equipment of 'through-contact' holes, 15697
IC chip temp. meas., 16271
IC transducer for medical pressure meas., 17013
integrated, manufacture, radial temp. gradient detector, 17179
integrated, measurement automation, 15703
integrated silicon anemometer, 17562
integrated temperature transducers, 17619
LCR meter, 1-MHz digital, 15941
micro-, surface temp. limit detector using nematic liquid crystals, 16845
for mobility meas. by Van Heek method, 16229
resistance-coupled, transfer factor meas., 15704
telephone, international, automatic meas. equip., 17005
tester, universal electronic, 17671
threshold, in indicating lamp system for diagnostic meas., 16232
transistor measurement instrument, 17600
for turbulence detection, 16650
- Cleaning**
of components used in meas. and control, 16499
- Clocks**
digital, 16837
digital electronic, 16834
electric, 16836
electronic clocks and watches, 16835
electronic watches with LED or liquid crystal display, 18193
global, synchronization using interferometry of stellar sources, 16175
liquid crystal, 16545
stop, electronic, 17161
synchronisation to precision of few nanoseconds, 17607
watches, electronic, LED and liquid crystal, markets, 17530
watches, solid-state, review, 17606
watch industry survey, 18451
- Coatings**
insulating, thickness monitoring apparatus, 17795
protective, steels and alloys with, heat resistance testing device, 16709
temperature measurement by melting heat indicators, 17164
thickness meas. with double-beam interference microscope, errors, 16664
- Colorimeters**
comparative performance, 16575, 17953
diagnostic reflectance standards, 16582
figure TV, 15727
photoelectric single beam, for meas. of small difference in concentrations of colour of solutions, 16577
- Colour**
anomaloscope, interference filter type, 16725
character display system, stand-alone type, 17119
densitometry, review, 16576
dichroism spectra, optical circular, meas. and recording instrument, 17193
display by multi-layer cells of liquid crystal mixtures, 17427
displays, small technicolour, multi-colour laser system, 16517
displays, three-primary, using gas discharge panels, 17426
electrochromic display systems, 16799
electrochromic liquid display, 17428
field-effect liquid crystal display devices, multicolour, 17126
fluorescent, meas. and formulation, 16580
frequency colour display by nematic liquid crystals, 15930
glass, meas. of faint colours, 16298
history of studies, 18487
holography, 17403
light sources and spectral irradiance distributions, 17373
ocean, satellite meas., 17044
painting fading meas. spectro-photometer, 16583
photogrammetric analysis techniques, 17708
projection type character display using liquid crystals, 15678
pyrometer, two-colour, 16849
pyrometry, standard equipment for, 16848
spectrophotometers for industrial meas., 16698
surface, direct estimation of lightness, 15972
temperature measurement and recording by colour-changing substances, 17167

temperature measurement by melting heat indicators, 17164
 temperature, system for meas. and control, 17618
 tetrachromatic, meas., 16579
 tristimulus measurement, accuracy, 16581
 uniform scales, 17954
 whiteness, standards of, 16578

Combustion

car engines, efficiency monitor, 17007
 gas analysis by gas chromatography, 16300
 gas in utility boilers, monitoring, 17317
 monitoring in IC engines, 18327

Communications

broadcasting programme operations, automation, 17834
 measurement equipment, 17149
 measurement instruments maintenance and calibration, 17006
 optical, 15916
 optical, photodetectors, 18474
 optical, use of phototransistor, 18475
 radio pulses, high-speed digital meter of phase shifts, 16231
 submarine, superconducting ELF magnetic field sensors, 15709

Computer control

alphanumeric displays, Infolux system, 17420
 atomic fluorescence spectrometry, multielement nondispersive, in TDM mode, 17717
 circuit board testing, 17599
 dilatometer, fused quartz differential, 17797
 distance meter, electronic, 17258
 ellipsometer, high temp., 17192
 ENDOR spectrometer, 16604
 flow metering, in-line compressible, 17772
 health testing system, 17329
 interface aspects, 18680
 of metering points, 18133
 meter-testing set-up, 17921
 microscope, scanning optical, 17390
 microwave spectrometer system, 17734
 by minicomputers, present status and development trends, 16771
 modular instrumentation system, 18395
 photometer and polarimeter, 17365
 resistivity and Hall effect meas., 18437
 rolling mill, on-line meas. system, 16430
 of spectrometer, microwave discharge emission, for elemental micro-analysis, 16878
 spectrophotometer system, 18241
 surface inspection and classification, 17296
 of telescope, photometric, 18118
 temperature measurement methods for, 17615

tensile testing machine, 16970
 test equipment, computer-based, 17301
 tomograph, whole body transaxial, 17840
 X-ray spectrometer, sequential, 17730

Computers

analogue, capacitance meas. applics., 18186
 audiometric applic., 17021
 calorimetry, minicomputer and data acquisition system, 15955
 cell and nuclear sizes meas. system, 16132
 EEG diagnosing system, 16456
 fetal monitoring applic., 17542
 gas chromatograph-mass spectrometer system, 18253

Controllers

- adaptive logic unit for automatic meas. and inspection equipment, 16776
- level, trends, 17471
- liquid level control bubbler, automatic, 16051
- position measurement for electronic control equipment, cyclic codes, 16060
- scintigrams, display controller for interactive analysis with mini-computer, 16139

Control systems

- ambient air monitoring, automated stations, 17029
- design and operating experience problems, 16194
- digital programme, direction sensing equipment for converting movements into pulse code, 16375
- fast neutron radiotherapy, 16146
- glassmaking, 16111
- hydraulic, for machine control, 16072
- instrument technology in, future role, 17637
- with liquid crystals, 18411
- Mossbauer spectrometer motion, based on integrated microcircuits, 16000
- for radioactive aerosols, 15879
- sludge boiler, 18592
- spectrophotometric, atomic absorption, 15756
- spectrophotometric systems, automated, based on double-beam spectrophotometer, 15755
- steel plant, testing and troubleshooting, 16710

Cooling

- instrument maintenance reduction with refrigeration, 18053

Corrosion

- corrodescope, pitting phenomena study, 16992
- fatigue and corrosion-fatigue tests, comparison, 18566
- fatigue tests of fine wire specimens, apparatus, 16406
- fretting, studies, 18567
- laser manometer-flowmeter for corrosive media, 17992
- surface loss due to, thin layer activation meas. technique, 17313

Counters

- alpha-active aerosols, long lived, raising sensitivity of meas. concentrations, 16330
- diagnostic radiologic equipment, exposure time meas., 17544
- electricity, opto-electronic, for HV lines, 16701
- fission fragment, review, 18261
- frequency, 10 Hz to 512 MHz portable, 15692
- frequency, portable 1100-MHz, 18443
- frequency, with time multiplex

- indication, 17674
- gas, as imaging systems, 17977
- Geiger-Muller, three-electrode, with controllable sensitivity, 16013
- Geiger, radiation monitoring applic., 18508
- halide Geiger-Muller, 18509
- helium, in moderator for detection of neutrons, 16018
- ice particle, automatic, response characteristics, 17069
- liquid scintillation, 17975
- manufacture of, 17374
- microwave, high sensitivity and FM tolerance, 16222
- multiwire proportional, 16912
- nematode, 18879
- open ionization, efficiency in detection of exoelectrons and photoelectrons, 16014
- photometer, 16017
- proportional, in fast neutron beam dosimetry, 16148
- ratemeter, autoranging digital, 18260
- revolution, for motor vehicles, 18289
- revolution, photoelectric, 17490
- scintillation, historical survey, 18794
- scintillation, near-infrared and ultraviolet gas-proportional, 16329
- with sign recognition for control panels, 18396
- speed, with monostable multivibrator, 15806
- stratospheric Aitken nuclei, 18900
- survey meter, Geiger-Muller, portable four-decade logarithmic, 16734
- train movement, axle-counting device, 17008
- universal, and applic., 18693
- universal, 50 MHz, 16816
- whole body, as meas. device of internal and external contaminations, calibration and practical use, 15851

Creep

- precision testing, high-temp. vacuum unit, 16983
- recording under variable load, 18564
- rocks, meas. by holographic interferometry, 17852
- tester, high sensitivity, 17817
- tests in pure torsion, 18563
- of wire strain gauges, 17286

Cryogenics

- biaxial expansion testing, cross-shaped specimen, 16976
- carbon thermometers, 18197
- cryostat for optical spectroscopy, 15987
- flowmeters, positive displacement volumetric, 18004
- fluids, density meas., 17792
- infrared grating spectrometer, 18761
- interferometer spectrometer, 17731
- Josephson junction fabrication, 17176
- magnetometry at liquid helium temps., 16539
- mass flowmeter, 18003

- metals and alloys, elastic constants meas., ultrasonic apparatus, 16954
- monitoring physicochemical parameters of media, 15740
- precision calorimetry, 17946
- projected refractive index thermometer for range 2–20K, 17165
- resistance thermometer made from Mn-doped epitaxial GaAs, 17172
- resistance thermometers characteristics, 17614
- resistive sensors, equipment set for calibration, 17690
- strain gauges use, 17812
- temperature sensors, 17613
- thermal relaxation calorimetry below 1K, 16564
- thermometers, carbon, 17684
- thermometers, semiconductor resistance, choice of materials for, 17174
- thermometry, problems, 17938
- thermometry, semiconductor, 17175
- thermometry, use of p-GaAs, 16841
- ultrasonic meas., instrument for, 17612
- vortex shedding flowmeter, 18804

Cryostats

- transition temp. of superconductors meas., 18460

Crystals

- diamond nuclear radiation detectors, 18510
- displays, 18689
- multi-scintillation array for dynamic pulmonary function meas., 16459
- Nal (Tl), as gamma-ray spectrometers, 18660
- protein crystallography, multiwire proportional chamber as area detector, 16615
- quartz, temperature control for deposited thin film thickness monitors, 15798
- quartz, thermometer, 17682
- quartz, use of RF voltage in microbalance meas., nonmetallic films applic., 16071
- scintillation detectors with Nal (Tl) or CsI (Na) crystals, 16015
- semiconductor pressure gauge, 17238
- spectrometer, circular dichroism and absorption, 17722
- spectrometer for solar X-ray studies, 17083
- for stellar spectrometers, 15892
- vibrations, interferometric meas., 16379
- wrist watch, 16265
- X-ray spectrometer, precision multi-crystal, 16321

Crystals: liquid

- applications, 16518
- clock, 16545
- colour character display, projection type, 15678
- colour display by multi-layer cells, 17427

data display, 16803

 multimeter, battery-operated digital using LSI, 17131
 NMR flowmeter, 18009
 nuclear radiation gauges, 17217
 oscillograph, wide-band pen-writing, 15645
 oscilloscopes, 18665
 pH meter, 18255
 piezoelectric accelerometers, 18542
 precision instrument assemblies and units, c.-a.d. process, 17892

precision measurement equipment, 18129
 rheological instrument, 16352
 spectral lamp constant-current sources, 15894
 spectrometer, ultrahigh vacuum electron, 18239
 spectrometer, vidicon scanning, for molecular absorption and atomic emission spectrometry, 16590
 tachometer, digital, 17271
 tachometer, nonaveraging, 17799
 thermistor assemblies, review, 17181
 transducer, evolution, 18135
 Upper Atmosphere Observatory incoherent scatter radar, 15880
 velocimeter, non-contact laser, for process control, 17314
 voltmeter, RMS value, 18180

Detection

cadaver, techniques, 18855
 cladding burst, equipment, 18057
 faults, ultrasonic, in high-voltage porcelain insulators, 18040
 live cable, 18865
 of obstructions on level crossings, 18058
 thermal conductivity, prediction of response from kinetic theory, 15956
 turbogenerator rotor winding fault detection by recurrent surge method, 16432

Detectors

beta-radiation, for atmospheric particulate monitoring, 15877
 current, device, 17923
 electron capture, alkali flame, flame photometric, 15742
 fluidic sensors and controls, 16108
 gas and vapour, 16898
 gravitational radiation, 16190
 hydrogen, ultrasensitive, and applics., 16609
 ink droplets, light sensor, 16334
 intrusion, comparison of microwave, audio and ultrasonic detectors, 17306
 mass spectrometric meas., continuous, peak detector, 16596
 piezoelectricity effect, 16236
 position, time-resolved meas., 16660
 pyroelectric, 16237, 18462
 radiation, and applics., 15961
 of soft X-rays, gas xenon scintillator, 15775
 static electricity events, 17594
 thermal radiation, and optical meas. applic., 18463

Diameter

of airborne particles, 18625
 bore gauge, 16064
 carotid artery, ultrasonic meas., 17846
 cylinder, variation with height, meas. apparatus, 16662
 electromagnetic inspection, threshold device, 16418
 fibre, meas. by laser diffraction,

17260
 filaments, noncontact meas. device, 18828
 inner, novel inductive scanning system, 15797
 internal, of tubes, high-speed meas. methods compared, 16941
 internal, sensor constants of comparators, new standard, 15796
 optical fibre, measurement, 16063
 of optical fibres, unclad, meas., 15968
 wire gauges, applic. and testing, 15801

Dielectric constant

complex permittivity of liquids, meas., 16538
 electronic measuring equipment, 17930
 nondestructive method for complex permittivity meas., 17596
 of powders, meas. equipment, 16824
 from thermally stimulated current meas., 16537
 of thin films, meas., 17676

Dielectric properties

low-temperature meas. at industrial frequency, 18719
 mirrors, reflectometer for reflectivity meas., 15722
 moisture meters based on parametric modulation cct., 17456
 nonlinear measurements, in conducting media using frequency sampling technique, 16829
 precise measurement on materials, 17601
 solid dielectrics testing, 18708
 spectroscopy, probing structure, 18784
 test set, truck mounted, 17675
 from thermally stimulated current meas., 16537

Diffraction

acoustic-optical raster as grating for length measurements, 16354
 non-destructive testing applics., 17511
 polychromator with stray light rejection, 16301
 Ronchi gratings for small linear meas., 16353
 spectrograph with diffraction gratings, 16292
 terrain recognition in ERTS-1 imagery by diffraction pattern analysis, 17048
 X-ray, microscopy, video display technique, 16591
 X-ray small-angle diffractometer, automatic, 15749

Dilatometers

differential, 17696
 differential, computer operated fused quartz, 17797
 graphite, for investigations at high temps., 17697
 interference-type evacuated, for range

300–500°K, 18284
 interferometric fast, 17698
 linear expacitance, 18473
 recording, 16062
 universal vacuum, automatic temp.
 recording, 16274

Direction

sensing equipment for converting
 movements into pulse code for
 digital programme control
 systems, 16375
 transonic flow, miniature probe,
 18807

Discharges

AC plasma display, 16210
 alphanumeric display units using
 gas-discharge technique, review,
 16209
 arc, temp. detmn. by high-speed
 filming, 16273
 breakdown phenomena of long gaps
 under switched impulse conditions,
 17148
 constricted-glow, picture-display
 applic., 16514
 gas impurity determination, capaci-
 tive discharge method, 15977
 spectrometers, computer-controlled
 microwave discharge emission,
 for elemental microanalysis,
 16878

Displacement

amplitude and phase, optical
 detection, 16372
 angular, automatic meas., interference
 method, 17263
 angular, of object in space, precision
 meas., 17264
 angular, transducer, 18827
 holographic measurements, 16066
 in-plane, of opaque surfaces,
 interference meas. technique,
 16068
 laser heterodyne meas., 16373
 laser measurement systems used in
 length meas. techniques, 17255
 measurement by holography and
 speckle photography, 16067
 mechanical, non-contact electro-
 magnetic converter to electric
 signals, 15791
 phase methods for meas. on basis of
 acoustical modulation of light,
 18283
 surface, derivatives of, speckle-
 shearing interferometer, 16967
 transducer, magnetoresistor, increas-
 ing linear range, 16371
 two-fibre optical sensor, 16374

Displays

AC plasma, 16210
 for aircraft and space shuttles,
 16520
 for aircraft cockpit, future, 18424
 aircraft, monitoring, 18688
 for alarm annunciator systems,
 18691
 alphanumeric, by electroluminescent

diodes, 17421
 alphanumeric character display
 devices, 15673
 alphanumeric devices, 15924
 alphanumeric large, Infolux system,
 17420
 alphanumeric, using gas discharge
 technique, review, 16209
 character, stand-alone colour system,
 17119
 circuitry and visual perception
 aspects, 15922
 colour, by multi-layer cells of liquid
 crystal mixtures, 17427
 colour character, projection type,
 using liquid crystals, 15678
 colour, three-primary, using gas
 discharge panels, 17426
 COS/MOS logic interface, 16795
 critical survey, 17414
 CrO, use of syncrovertor in
 production, 18423
 current-voltage plotter for thermally
 sensitive samples, 18426
 and decoding ccts., review, 17116
 design hints, 17916
 devices and materials, 16793
 digital measurements and display
 instrument range, 16244
 for digital real-time lidar data, 18352
 digital systems, 18684
 digital systems, review, 17419
 echoencephalograph, 17335
 electrochromic device, 18164
 electrochromic liquid, 17428
 electrochromic systems, 16799
 electroluminescent direct current,
 16515
 electroluminescent panels for, 16211
 electroluminescent, progress, 16796
 electromagnetic numerical, 15923
 electronic blackboard system, con-
 version of handwriting signals,
 15674
 electronic watches with LED or
 liquid crystal display, 18193
 electro-optic TV, with electron beam
 write in, 15669
 fibre optic flat panel, 16801
 field effect liquid crystal devices,
 multicolour, 17126
 flat, data readout, 18159
 FLIR systems, 15929
 fluorescent, for electronic calculators,
 17122
 fluorescent units, 18163
 frequency colour display by nematic
 liquid crystals, 15930
 gas-discharge-panel TV, 18169
 gas discharge, with high resolution and
 memory, 15675
 gas panel, manufacture, 18168
 gas plasma panel memory, 18417
 head-up, 18161
 HV indicator, contactless, 18179
 image electronics, 17382
 indicating lamp system for diagnostic

Distance

electronic meter, microprocessor-controlled, 17258
 electro-optical meters, comparative studies, 15794
 laser interferometric meas., 16355
 laser measurement system, 17257
 lunar laser ranging station, 16189
 measurement by e.m. waves, 17482
 optical measurement instrument, two-wavelength, field testing results, 17256
 proximity detectors, fluidic, 16108
 proximity detector with adjustable sensitivity, 18825
 pulse compression meas. system using surface acoustic wave devices, 18282
 railways, electronic meas. system, 17527

Dosimeters

acoustic noise, 17278
 chemical, for in-pile use, comparison, 16703
 composite neutron activation, 18801
 dose and dose rate, review, 17339
 gamma, testing device, 18799
 glass plates as, 17220
 monitoring of, during meas., 17448
 neutron, passive environmental, 18797
 personal exposure monitoring, 17338
 polytetrafluoroethylene chemical, 17219
 silicon diodes in fast neutron therapy, 16147
 space-charge, 17449
 testing installation, 18798
 testing laboratory for, 17515
 thin film radiation, 16332
 TL, for personnel monitoring, influence of ambient humidity on, 16721

Dosimetry

activation analysis, in vivo, 16137
 alpha-beta-gamma scintillation spectrometer, 16634

avalanche diodes for radiation monitoring, 16328
 of betatron, 45 MeV, 16020
 environmental radiation monitoring with TLD systems, performance criteria, 16464
 environment, methods used in, 16736
 fast neutron beam, ion chamber and proportional counter approaches, 16148
 fast-neutron personnel, with solid-state track recorders, 17019
 ferrous sulphate-based, 16021
 fibre-optic glass, 17757
 film badge vs. luminescence, 18080
 film, with X-ray fluorescence, 18800
 high radiation dose luminescent and optical, 16027
 ionization chamber meas. of natural background radiation, 16011
 meson, for natural environment, 16469
 microwave, 17018
 microwave, using electrochemical effects, 16228
 mixed-radiation, 17976
 neutron, in medicine and biology, 18881
 for nuclear medicine, advances, 17838
 outdoor-indoor ^{60}Co irradiator, facilities, 16142
 photometer for counting photons, 16017
 radiochromic dye systems for, use, 16722
 rate-meas. indicators in controlled areas, 17028
 RF cavity irradiation, 17758
 time-of-flight, 17837

Earth

resistivity of, meas. method, 18348
 resources survey, multispectral scanner, 18341
 resources, very high resolution satellite imagery for remote sensing, 15884
 satellites in earth sciences study, 17848
 strain, measurement, 17851
 strainmeter, kilometre and centimetre, 16170
 surface properties, remote sensing, 18344

Education

biomedical instrumentation, applied physics course, 18059
 instrument mechanics training, 17635
 instrument science courses in UK, survey, 17636
 length measurement techniques, review, 17253
 metrology course in USSR schools, 17885
 temperature measurement and control teaching method, 18453

Effluents

pH meas. in treatment, 18780

Elasticity

Elastomat II for meas. of elastic

properties, 17281
 fibre modulus detmn., strain meas. techniques, 17288
 interferometer, three-beam speckle pattern, elastic constant and strain meas. applics., 16958
 magneto-, of ferromagnetic films, meas. instrument, 15713
 metals and alloys, ultrasonic meas. at low temps., 16954
 viscoelastic constants of plates of composite materials, ultrasonic meas., 16403
 viscoelastic materials, indentation test, 18042

Electrical

accurate measurements, 18692
 atmospheric electricity meas., 17076
 conductors, thermophysical props. at high temps., meas., 16282
 consumer-metering techniques, 16248
 digital measurement techniques, 18694, 18695
 distortion measurement, 17142
 measurement systems, 17917
 standardization of meas. in USSR, 17128
 synchronous machines, digital device for angular speed and torque angle meas., 18027
 testing standards, 18170

Electrical components

marking of resistors, capacitors and coils, methods, 16221

Electrical conductivity

of liquids, meas., 17151
 measurement in chemical industry, 18051
 measurement, small cross section samples in 80–400K range, 15957
 miniature meter, 18699
 photo-, of solids, 18720
 of rocks, meas., 17853
 semiconductor, determ., 15939
 of solutions, digital meas. device, 17597

Electrical equipment

angle and length meas. using capacitors and voltage dividers, 16935
 chemical industry, protection against explosion, 18587
 digital transistor tester, 15814
 for HV testing, 16699
 measurement apparatus design, interference voltages considerations, 16810
 passive components, correct measurement processes, 15689
 for stellar photoelectric spectrometer, 17087
 transistor-MOSFET-diode, combined tester, 15815

Electrical instruments

accuracy and errors in, 16213
 AC/DC comparator for precision meas. on high frequency active power, 16531

AC meas., sensing elements, 16524
 current comparators, 16242
 digital measurement and display range, 16244
 digital measurements, state-of-the-art, 16216
 dip-meter, calibration and construction, 16826
 dynamometer, Ayrton-Jones current balance, modifications, 16806
 for highly-sensitive meas., utilization of interfering currents in superconductors, 17130
 introduction to, 16773
 low resistance meas., portable instrument, 16814
 measurement of electrical quantities, 16215
 meters, survey, 17657
 portable test, use of, 16679
 probes for oscilloscopes, in electrical measurements, 15683
 pyroelectric detector, 16237
 ratiometer, electrostatic, 16225
 using r.f. SQUID, 17609
 static electricity events detector, 17594
 tachometers, 16951
 testing by digital voltmeters, 15936
 thermoelectric/magnetolectric comparator, AC/DC, 16247

Electric charge

carrier mobility meas. by Van Heek method, cct. for, 16229
 cloud droplets, drizzle and raindrops, meas., 16166
 measuring instrument for insulating surfaces, 18185
 raindrops, disdrometer, 17073
 sampling method for low current meas., 16523

Electric field

in atmosphere, meas. techniques, 17563
 electronic meas. equip., 17918
 in ocean, meas., 17350
 recording on sea floor with short span instruments, 18374
 stratospheric, balloon-borne meas. equipment, 18097

Electrochemistry

analytical, application of pseudorandom signals and cross-correlation techniques, 15975
 chemotronic analyzer of electrical signals, 15695
 conductometers, high-frequency electrodeless, design of inductive meas. cells, 16618
 digitally controlled potentiostat, 18777
 exhaust gas sensor, 17555
 Faradaic processes, linear sweep voltammetry, 15935
 gas rate evolution in reactions, meas. technique, 18778
 microwave dosimetry applic., 16228
 surface area meter, 16947
 trace analysis instrumentation, 16306

voltammetry, cyclic fundamental and second harmonic a.c., with phase-selective detection, 16304

Electrodes

contact potential differences, pendulum meas. device, 16224
 earthing, resistance meas., 16527
 liquid level control applic., 17243
 mercury drop, for stripping voltammetry in glass-corrosive media, 15686
 pH system, 3-electrode, 17969
 potential, current, temp. and heat flow, simultaneous meas., 16916
 rotation rate, continuous monitoring, 15985
 for spectrographic analysis of non-aqueous solutions, 16611
 standard reference, for pH meters, 15741
 viscosity meas. applic., 18823

Electroluminescence

display panels, 16211
 displays, direct current, 16515
 materials and displays, progress, 16796
 thin film panels, 18162

Electromagnetic

balance for precision shipboard weighing, 17492
 distance meas. by e.m. waves, 17482
 flaw detector for testing pipes, 16694
 flow measurement, review of applics., 17991
 flowmeter for fast-varying flows, 17233
 flowmeters, 16918, 17987, 18266
 inspection, threshold device, 16418
 materials props. meas., 16542
 microbalance, review, 17493
 NDT methods, 18578
 numerical display systems, 15923
 wideband field strength meter, 18721

Electromagnetic radiation

optoelectronic sensors, instrumentation with, 15643

Electrometers

amplifier with modulator using voltage-variable surface diodes, 16811
 calibration with shock excitation cct., 15680
 differential self-compensating, 17140
 electrostatic field potentials meas. in air, 16535
 high-sensitivity integrating, 18718
 levitation, dynamically regulated, in search for fractional charges, 16534
 optoelectronic feedback, 17593
 ratiometer, electrostatic, 16225
 temperature-compensated, for environmental meas., 16467

Electron

density of plasma, 337 microns high-

resolution interferometry, 15748
 ESCA instrumentation, 18237
 microprobe, 18764
 pulsed relativistic beams, dynamic stress generation meas. in exposed materials, 16686
 spectrometer, Auger, using concentric hemispheres, 16631
 spectrometer, cooled Si (Li), 16630
 spectroscopy for chemical analysis, 18236

Electronic components

for borehole instruments, 17059
 micro-, impact on instrumentation, 16772

Electronic equipment

acceleration measurement system, 17487
 accuracy and errors in, 16213
 AC power meter, IC-oriented, 17143
 in agriculture, review, 18595
 for biomedical characteristics meas., 17534
 calculators, fluorescent displays for, 17122
 choppers in meas. techniques, 17097
 clock, 16836
 clock, digital, 16834
 clocks and watches, 16835
 constructional details, 16521
 developments, 17129
 for dielectric constant meas., 17930
 distance meter, microprocessor-controlled, 17258
 exposure meter for photography, 16862
 frequency comparator, 18442
 high-precision, for electrical power and energy meas., 16820
 image electronics and display systems, 17382
 for industrial meas., 16993
 instrumentation, progress, 16214
 Josephson junction fabrication, 17176
 for length meas., digital, 16934
 measurement, East German industry, 17575
 measurement instruments, 17918
 measurements, review, 17254
 multimeter, 17576, 18697
 multimeter with analogue indication, 18698
 Polish-made meas. instruments, 16218
 for pollution control and monitoring, 17549
 pollution monitoring applic., 16737
 railways, speed and distance meas. system, 17527
 recording, multi-channel, 16512
 relay springs testing, tensiometer for, 17291
 Schottky diodes, submillimeter detection and mixing applic., 15731
 stop-clock, 17161
 tachometer, 16376, 18288, 18594
 tachometer, reversible, 18544
 for telescopes, large astronomical, 17089

thermometer, 16838, 17611, 17940
 thermostat for semiconductor device meas., 15699
 transistors, m.o.s., meas. instrument with automatic range switching, 15940
 voltmeter, 17667
 watch, electronic, market, 17530
 water gauge, 18019
 watt-hour meter, 16254, 18183
 weight increments detmn., 18547

Electron microscopes

Auger, for surface studies, 18674
 dark field high resolution, focusing of images, 15652
 developments and market trends, 17104
 energy selecting, with double magnetic prism, 18143
 field-emission, 100 kV development, 17398
 high-resolution, 16780
 image improvement, 18673
 imaging system, contrast transfer characteristics obtained using tilted specimens, 15651
 in modern metallurgy, 18316
 operation and calibration, 18400
 photoemission, using electron multiplier array, 15649
 scanning, 18672
 scanning, analytical, 17394
 scanning, application to forensic sciences, 18675
 scanning, biophysics applic., 18878
 scanning, comparison of deflection aberrations, 16509
 scanning, desk-top, 17395
 scanning, development, 16789
 scanning, field emission type, 17399
 scanning, for materials studies and microfabrication, 15904
 scanning, high resolution, 17108
 scanning, in forensic science, 17531
 scanning, in mirror and low voltage modes, 17107
 scanning, Mini-Sem, 17396
 scanning, optimization, 16787
 scanning, photogrammetric treatment of imagery, 16788
 scanning, signal derivative processing, 15650
 scanning, Stereascan 180, 16202
 scanning, with facilities for Auger emission spectroscopy, 17397
 shielded scanning, 17901
 thickness detmn. in, backscattering cartridge, 16360
 transmission, high resolution, uses, 17392
 TV emission, 17391
 X-ray leakage from, radiological significance, 16143

Electron microscopy

analytical transmission, of thin films, 18503
 biology, metallurgy and material sciences applics., 17010
 cathodoluminescence, 16790

field emission, using high probe current densities, 17105
 high- β prebreakdown currents, imaging, 15909
 high-resolution reflection, development, 18142
 HV, developments, 16782
 HV, scientific applics., 16783
 improvements in, 18139
 Lorentz, high resolution in-focus, 17393
 probe, high resolution, 15903
 quantitative scanning, 18401
 recent advances, 17102
 reflection, low energy, prospects, 18140
 scanning, 15659, 16784
 scanning and transmission, of individual cells, 15653
 scanning, fracture mechanics and failure analysis, 17292
 scanning, high-resolution, at low accelerating voltages, 17106
 scanning transmission, 16786
 scanning transmission, at high resolution, 16508
 scanning, trends and prospects, 16785
 state-of-the-art review, 17103
 transmission, image formation in, 17387
 transmission, preparation of thin silver foils, 15901
 transmission, trends, 18141
 trends, 16781

Electro-optics

angular measurements and transmission apparatus, automatic, 16368
 data processing and communications, 15916
 fluid velocity meas. by particle tracking, 17984
 image quality testing, 18405
 imaging systems, OTF, 18676
 position transducer for meas. of large length changes in muscle, 16138
 telemeters, visual and distance ranges, 16477
 telemeter, testing, 16475
 telemetry, advantages of tiltable reflector, 16476
 TV display system with electron beam write in, 15669
 voltage and current meas. methods, 17581

Electrophoresis

delta potentials of colloidal particles, meas., 16617

Ellipsometry

differential meter, 17950
 f.e.t. gate insulator thickness meas., automated ellipsometer, 15729
 high-temperature ellipsometer, automated, design and operation, 17192
 photoelectric, 17628
 scanning, high precision, 17709

surface problems applics., 17756
 system for reducing effects of photo-detector sensitivity to polarization, 18223

Emulsions

analysis instrument, 18489
 photographic, for recording three-dimensional holograms, 15662
 silver halide, photographic latent image formation, 15654

Engines

car, combustion efficiency monitor, 17007
 diesel, V-6, noise meas., 15824
 internal combustion, combustion quality monitoring, 18327
 internal combustion, hot-wire probes for gas and liquid velocity meas., 18868
 jet, oil analysis by atomic absorption spectrometry, 16704

Environmental testing

monitoring of plutonium, 16463
 probing the environment, 16156
 radiation assessment systems and instrumentation, 16465
 radiation monitoring with TLD systems, performance criteria, 16464
 radiological monitoring, 16462

Environments

coastal and wetland, radar geomorphology, 17036
 deep snow meas. using cosmic radiation, 18087
 dosimetric methods used in, 16736
 electrometer, temperature-compensated, 16467
 inhomogeneous media, remote probing techniques, 18343
 meson dosimetry, 16469
 national park resource inventory process using remote sensing techniques, 17051
 noise measurement in sub-freezing weather, 15869

Errors

in coating thickness meas. with double-beam interference microscope, 16664
 in echo method for testing materials, 16388
 electric active and reactive energy meas., 16230
 in electrical and electronic meas. instruments, 16213
 estimation in dynamic meas., 17897
 laser-Doppler estimates in nonuniform flow, estimates, 17228
 in laser wavelength meas. using Fabry-Perot interferometer, 16567
 linear measurements, temp. errors detmn., 18281
 measurements, 17379
 measurement, estimating results, 16501
 in numerical processing of measure-

ment results, 17378
ohmmeter, reduction, 16526
parietal friction in turbulent flow, 15784
in photogrammetry, 16728
telescope, auto-collimation, effect of objective aberrations on meas. uncertainty, 17362
textures, quantitative detmn., 16320
in time-varying quantities meas., improved method, 17608

Exhibitions
Micro '74 on microscopy, 17100

Extensometers
diametral, for small strains meas. in tension-compression testing, 16960
electronic, apparatus for mechanical testing of materials, 16075
photoelectric, for meas. strain in materials at high temps., 16961

Eye
anomaloscope, interference filter type, 16725
bank recorder, cornea freezing, 15867
movement, laboratory unit for recording, 17336
optometer, dynamic, 16152
refractive defects meas. with gas laser, 17337
refractive state measurement at distance, photorefraction technique, 16151
tissues, acoustic differentiation by quantitative echography, 17842

Fatigue
bending and torsion combined, testing machine, 16972
bending, testing machine, 18305
biaxial testing rig, 18565
corrosion, apparatus for tests of fine wire specimens, 16406
and corrosion-fatigue tests, comparison, 18566
crack detection by NDT methods, 18039
crack development recording on welded testpieces, 18840
crack growth monitoring by acoustic emission techniques, 16092
crack growth monitoring methods, 17508
crack length meas. by nondestructive test, 16407
crack length meas. in testpieces, applied to liquid metals, 15813
crack signallers, 16405
diameter meas. device, noncontact, 18828
fracture mechanics and SEM failure analysis, 17292
fretting corrosion studies, 18567
impact testing machine, 17506
impact, testing machine, on mild steel, 16404
life under stationary Gaussian

random loads, 16088
simultaneous testing of several specimens, apparatus, 18568
slow-crack velocity in brittle solids, microprobe technique, 15816
strength of thin sheet specimens detmn., instrument, 18569
tests by modified staircase method, 17507
tests in vacuum at low temps., apparatus, 16683
thermal tests, strain meas. by photographic method, 16965

Fibre optics

blood flow velocity meas., 17843
diameter meas., 16063
displacement sensor, 16374
dosimetry, 17757
flat panel display, 16801
fluid mechanics meas. applic., 16028
hypodermic fiberscope, 17540
laser-Raman spectrometer, 18235
semiconductor devices testing and sorting sensor, 16113
unclad, refractive index and diameter meas., 15968

Fibres

temperature meas. in texturing process, 18871

Flames

alkali and photometric detectors, 15742
fire detection system using insulation resistance/temp. changes in polymeric dielectrics, 16280
photometric chemical analysis using atomic absorption spectrophotometer, 17203
plasma diagnostic techniques, 16619
pressure, velocity and turbulence meas., 18011
pyrometer, Venturi type, 17178
spectrophotometer, 16876
temp. and radiation characteristics detmn. by beam-length variation technique, 15952

Flow

AC Langmuir probe in high-pressure flowing plasma, 16041
air, measurement using temp. fluctuation, 17465
blood, in carotid artery, ultrasonic meas. technique, 17846
blood in small vessels, meas. by u.s. Doppler system, 18076
blood, measurement by NMR techniques, 18078
blood, proton spin technique, 18605
blood, thermal conductance method, 18609
breath, measurement techniques, 16453
cardiac output, continuous monitoring, 17332
characteristics of gas filters, detmn., 18520
elastomer, point-pressure pickups, 16341

electromagnetic, review of applics., 17991
in flames, 18011
gas, by plume analysis with Barringer correlation spectrometer, 18000
gases, high-temperature, automatic meas. by X-rays, 17999
high-velocity, density profiles, holographic interferometer system, 16033
hot-wire sondes in air, new calibration method, 16030
ink droplets, light sensor, 16334
large volume, meas. by sonic techniques, 17994
low-density, static pressure, contribution to meas. technique, 16045
mass, measurement, 18518
mass transfer study by laser holography, 18273
measurement applications, 18517
measurement by chemical tracing, 18270
measurement by laser Doppler techniques, 17226
measurement by particle tracking, 17984
measurement in tidal streams, 18893
measurement in vortex flows, 17990
measurement techniques, advances, 17459
measurement techniques, survey, 17224
measurement under any condition, 17979
moving powders, applic. of terametrology to location of surfaces, 16333
NMR measurement technique, 17230
North Sea oil, meas., 18588
oil, metering with electronic control, 15842
optical measurement technique, 18809
parietal friction meas. errors using floating element balance, 15784
powder, measurement method, 17229
precision measurement, 17457
sound-absorbing materials, flow resistivity meas. device, 18524
stagnation pressure probe for supersonic and subsonic flows, 17234
steady and pulsatile, thermal dilution technique, evaluation, 18886
surface, measurement using particles and laser light source, 16038
survey of measuring techniques, 17460
thermal flow density in high temp. meas., 15715
three-dimensional, skin-friction meas., new device, 18817
transonic direction, miniature probe, 18807
turbulence detection cct., 16650
turbulence of liquid, meas. by continual pursuit of tracer particle motion, 16649
two-phase, holograph meas. method, 16904
two-phase measurements, 18264
ultrasonic measurement, 18265

visualisation by double exposure method in holography, 16641
 visualization by optical, tracer and surface indicator techniques, 16029
 volume, of gas, 18269
 wastewater, measurement, 18049

Flowmeters

acoustic method, 16339
 airborne laser Doppler velocimeter, 17982
 for air flow meas., 17980
 averaging mass, 16031
 blood, catheter-tip, single-crystal ultrasonic probe, 17333
 blood, continuous wave Doppler instruments, 18073
 blood, cutaneous, photoelectric plethysmograph, 16718
 blood, pulsed Doppler ultrasonic, real-time velocity profiles, 18075
 blood, thin film gauges for fluctuating velocity meas. in, 17026
 blood, ultrasonic, 18339
 blood, ultrasonic catheter-tip probe, 18077
 blood, ultrasonic Doppler shift, 16922
 blood, using fibre optic catheter and optical mixing spectroscopy, 17843
 calibrating and testing, device for, 16640
 calibration, 17458
 calorimetric, with radiant heat source, 18806
 compressible fluids, 15786
 compressible, online computer controlled, 17772
 cross-correlation technique, 16336
 cross-section variable area, high pressure tests, 17766
 cryogenic, positive displacement volumetric, 18004
 current, in shallow water, comparison, 17561
 differential capacitance, 17765
 for difficult installations, 18263
 diffusion measurement at boiling points, three-compartment cell, 16652
 electromagnetic, 16918, 17987, 18266
 electromagnetic, for fast-varying flows, 17233
 fine wire grid, sensor with, 16337
 float-area-type, discharge coeffs., 16344
 gas, high sensitivity, 16645
 gas, volumetric system, 17769
 using gear pumps, 18267
 heat flux probe as flowfield diagnostic, 16340
 high-speed flows, hot-wire coil probe, 16343
 hot-wire anemometers, research and industrial applics., 17822
 hot-wire probes for gas and liquid velocity meas. in IC engines, 18868
 insertion, 18810

instrument checking, 18519
 jet velocity sensor, 17770
 laser, 17776
 laser Doppler, 16338, 16917, 17768
 laser Doppler, as optoelectronic data processing system, 17774
 laser Doppler, for velocity profiles meas., 17778
 laser Doppler, hydraulic machines applic., 18811
 laser Doppler interferometer, 17949
 laser-Doppler, measurement in non-uniform flow, error estimates, 17228
 laser Doppler microscope, 16647
 laser Doppler scalar, 17227
 laser Doppler velocimeter with variable optical frequency shift, 18526
 laser Doppler, with high spatial and temporal resolution, 17777
 laser, for corrosive media, 17992
 laser, for process control, 17314
 linear momentum mass, design and performance, 18005
 long-range, 17784
 for low flowrates, 16342
 low-range, for pulverized solids, 17461
 magnetic, corrosion-resistant, 16921
 mass, cryogenic, 18003
 mass, interface detection system, 18006
 mass, survey, 18001
 microwave-Doppler, 17775
 NMR, design, 18009
 NMR, in process flow meas., 18008
 ocean current, retrievable bottom-mounted, 17043
 oil displacement, 17232
 oil, domestic, 16646
 optical Doppler, for gases, 18271
 orifice, 17783
 with oscillating prisms, 17986
 in paper mills, for wastage prevention and cleaning elimination, 15781
 performance, use for liquids and gases, 16643
 pipes, measurement of flow in by external means, thermal transient instrument, 16923
 propeller-type, 17225
 for pulsating flow, 18007
 Raman and laser, simultaneous meas., 17983
 recirculating water, calibration and use of conical hot film anemometer probe, 16644
 resonant laser Doppler, 18812
 selection of, guidelines, 17771
 shock-wave velocity meas. using Doppler principle, 17236
 sizing guidelines, 17978
 solid-liquid flow, modified Venturimeter, 17993
 sonic throat, 18002
 survey and comparison, 18802
 thermal, 17464, 18805
 thermal devices, survey, 17762
 thermal, with constant heating power, 17180
 thermodynamic meas. system, 16639

turbine, 18521
 turbine, calibration, 16919
 turbine, review, 17763
 turbulence gauge for liquids, 18010
 ultrasonic, 17773, 17995, 17996
 with ultrasonic beam, 17997
 ultrasonic correlation, 17767
 ultrasonic Doppler, frequency modulated, 17764
 ultrasonic random-signal system, 17785
 uro-, for routine clinical use, 17847
 viscous, 17998
 volume, automatic, 17985
 vortex, 16920, 17989
 vortex shedding, 17988, 18522
 vortex shedding, accuracy and reliability, 18803
 vortex shedding, in cryogenics, 18804
 vortex shedding principle, 17466
 weighing of bulk solids applic., 16032

Fluidics

nuclear reactor failed fuel detection system, 16702
 position sensing, air logic cct., 18540
 sensors and controls, 16108
 shock tube instrumentation, some modern aspects, 16042
 wind sensors applic., 17779
 wind tunnel measurements, photon correlation analysis application, 16127

Fluids

analysis, 17759
 compressible, measurement, 15786

Fluorescence

colour measurement and formulation, 16580
 displays for electronic calculators, 17122
 display units, 18163
 imaging system, large scale fluoroscopic, performance, 17903
 microscope and applics., 17109
 oil pollution monitoring applic., 18368
 quenchers, use in resonance Raman spectroscopy, 18758
 rocketborne electron beam probes for upper atmospheric composition meas., 16183
 spectrometry, acoustic, 17960
 spectrometry, high-intensity pulsed source atomic, 17719
 spectrometry, multielement non-dispersive atomic, in TDM mode, 17717
 temperature-jump apparatus for meas., 16594
 videofluorography, 18597
 X-ray analysis, calibration for interelement effects, 15999
 X-ray analysis of small amounts of material, 16323
 X-ray analysis, single standard method, 16884
 X-ray, determination of concentra-

- tion in chemical elements applic., 16331
- X-ray, film dosimetry applic., 18800
- X-ray, for trace-element analysis, 18247
- X-ray, remote meas. of fluid volume, intracranial pressure meas. applic., 18614
- X-ray spectrometer, Apollo, 16322
- X-ray spectrometer for rock and mineral analysis, 15998
- X-ray spectrometer, portable dispersive, with excitation by windowless gas tube, 16883
- X-ray thyroid scanners, neutron and photon flux, 16145
- X-ray, use for chemical analysis, 16881
- Fluorimeters**
- laser remote sensing, for water pollution detection, 17866
- microspectro-, direct recording, for biological use, 18330
- microwave Doppler-effect, 18272
- phase, 17718, 18760
- review, 16289
- spectrofluorophosphorimeter, electronically compensated 17721
- spectrophotofluorimeter, automated, using pyroelectric detector for correction, 17720
- spectro-, sea water luminescence study, 18638
- spectro-, with tunable laser source and optical systems, 18497
- Food**
- fermentation plant control, 17529
- Force**
- dynamic, in endurance sports, telemetry, 18067
- dynamometers using mechanical linkages, 16670
- dynamometer, 2-D, in cutting process of peripheral milling, 17316
- four-component dynamometer, 17801
- in impact bending tests, dynamometer, 18571
- maximum compressive, dynamometer, 18561
- piezoelectric meas., 18829
- process industries, meas. in, 17821
- in rolling, magnetoanisotropic transducers, 18318
- sensors, applications, 17494
- spring, in instruments, 18562
- transducers, review, 17495
- Frequency**
- analyzer for clinical phoniatrics, 18620
- atomic, standards, 17431
- beat frequency detector for cyclotrons and synchro-cyclotrons, 15945
- capacitor, meter with linear conversion function, 15944

- cardiac tachometer, linear pulse-to-pulse, 17024
- colour display by nematic liquid crystals, 15930
- comparator, electronic, 18442
- converter, nonlinear, as infrared spectrometer and receiver, 17438
- counters, portable 1100-MHz, 18443
- counters, 10 Hz to 512 MHz portable, 15692
- counter with time multiplex indication, 17674
- digital meter, high-speed micro-electronic, 15691
- high, measurements, international comparisons, 18714
- high-precision measurements, 17936
- low rated, indicating meter, 16264
- measurement apparatus, 17934
- measurement problems, 18188
- measurement trends, 17159
- phase-frequency response meter, 15947
- radio, instrumentation for automatic testing, 17141
- resonance, transducers, 18018
- transistor meter for meas. thickness and growth rate of films, 15799
- of voltages and currents, digital meas. method, 15685

Friction

- parietal, using floating element balance in turbulent flow, 15784
- polymer monofilaments, coeff. of, detmn., 16414
- skin, in three-dimensional flows, new device, 18817
- tribology for atomic and space industries, 17009
- wear of materials, testing under reciprocating-rotary motion and dynamic loading, 17295

Fuels

- LMFBR thermal hydraulic tests, infrared NDT of electrical fuel pin simulators, 16439
- nuclear reactor failed fuel detection, fluidic system, 16702

Furnaces

- arc, measurement and evaluation of current fluctuations, 16115
- arc, measurement of voltage fluctuations caused by, 16114
- arc, voltage measurement, 17523
- liquid level control bubbler, automatic, 16051
- refractory brick thermal conductivity meas. by hot wire method, 16116

Gas

- calibration, cross-reference service, 18769
- calibration standards, 18894
- leak detection, 18309
- volume measurement, 18525
- wells, pressure meas. devices, 17319

Gases

- content measurement in liquids, 15787
- evolution rate in electrochemical reactions, meas. technique, 18778
- flow, high-temperature, automatic meas. by X-rays, 17999
- pressure measurement, accuracy, 18012
- pyrometer, Venturi type, 17178
- velocity meas., rotating-mirror method, 18268
- volugraph for recording gas evolved versus time, 17057
- volume flow rate detmn., 18269

Gears

- dynamic loads registration, radio-telemetric method, 16109
- kinemometer, optical-mechanical, 17798
- precision circle division using redundant interval meas., 16945

Geophysics

- borehole instruments, materials and components from electronics technology, 17059
- boreholes, measurement and inspection by ultrasound, 17355
- borehold thermometers, precision, 17568
- borehole thermometer with capacitance transducer, 17567
- broad-band geomagnetic induction instrumentation evaluation, 16174
- electrical properties of media, resonant linear antenna probe, 17056
- electroprospecting, 2-aircraft, increase in separation, 17053
- gas-volugraph for recording gas evolved versus time, 17057
- geomagnetic field meas. by gradient method, 16484
- gyroseismometer, long-period, 18345
- instrumentation, 18081
- ion microprobe mass analyser as geochronological tool, 17443
- marine seismic system, 17060
- nuclear, stabilization of bore-hole gamma spectrometer by injection diode, 16173
- phase radiogeodetic system, electromechanical phase meter for, 16730
- prospecting, applic. of superconducting quantum interference magnetometers, 17054
- radio-interferometry, long baseline, 17854
- remote sensing of natural formations from radiance coeffs. meas., 18632
- rocks, air porosimeter calibration curve, 17354
- rocks and soils, spectral reflectance meas., 17055
- rocks, electrical conductivity meas., 17853
- rocks, strain and creep meas. by

holographic interferometry, 17852
 seismic detector, piezoelectric, 18635
 seismic events, automatic detector
 at Tonto Forest, 18082
 seismic refraction method, 18346
 seismic system, gain-ranging analogue
 or digital, 17062
 seismic technique for oil searching,
 18889
 seismograph, low natural frequency
 vibration isolator, 16731
 seismograph, miniature long-period,
 17061
 seismograph, monitor of Laboratory
 for the Geographics of the
 Lithosphere, 18888
 shipboard nuclear-precession Z-
 magnetometer, 16485
 snow sample wetness, electronic
 meas., 17871
 strata inclinometer with induction
 orientation sensor, 16483

Glasses

colours, faint, measurement, 16298
 dosimeters, high exposure, glass
 plates as, 17220
 fibreglass surfaces study, applic. of
 X-ray photoelectron spectroscopy,
 16990
 glassmaking instrumentation and
 control systems, 16111
 optical, homogeneity testing using
 laser, 16572
 production, portable pyrometer,
 17826
 structure analysis using infrared
 reflection spectra, 16614

Gravity

load forces at bottom of reservoir,
 meas. of increases using gravimeters
 16171
 mechanical resonator of fused
 quartz, 17356
 microgravimeters, 18887
 radiation, gravitational, detectors,
 16190
 shipboard measurements, 16172
 SI units in gravimetry, 17565
 stabilized laser gravimeter, 17566
 superconductivity, gravimetry
 applic., 18347
 wave detection, two sensor correlation
 technique, 17850

Grinding

using laser interferometry, 18311
 temperature meas. during, 16272

Gyroscopes

seismometer, long-period, 18345

Hardness

impact, review of methods for
 detmn., 18300
 in liquid helium medium, meas.
 device, 17293
 of materials, ultrasonic detmn.,
 17516
 micro-, measurement in liquid

metal media, 16988
 pentagonal indenter for meas.,
 18573
 pulses, in magnetic field, CdS bolo-
 meter for detection, 17695
 Rockwell, meas. method, 18572
 standard instruments with line marks
 and meas. microscope, 16094
 steel, ultrasonic inspection, 18299
 testing block, values for Rockwell C,
 16095
 viscoelastic material indentation
 test, 18042

Heat

capacity measurement of nuclear
 materials by laser flash method,
 16563
 industrial heating, temp. meas. and
 control, 17519
 pyroelectric detector, microphonically
 balanced, 16557
 specific heat, use in NDT analysis
 of silver-copper alloy coins,
 18791
 specific, low-temp. meas. by
 adiabatic technique, 18471
 steels and alloys with protective
 coatings, heat resistance testing
 device, 16709

Heat flux

probe as flowfield diagnostic, 16340
 yaw sphere-thermometer, calibra-
 tion and tests, 16553

Heat transfer

local coefficients detmn. by use of
 liquid crystals, 16555

Holography

acoustical, 17405
 acoustic, applics., 17645
 and applications, 15660, 16203
 bibliography, 15658
 coherence measurement applic.,
 18478
 colour, 17403
 commercial, 18856
 data processing and communications,
 15916
 data storage in thick photosensitive
 materials, 15918
 double exposure method, flow
 visualisation, 16641

 radiographic film storage, 16208
 recording and reconstruction by semi-
 conductor laser, 15661
 shape recognition, coherent optic
 device, 15804
 special applications, 18679
 speckle noise reduction by random
 phase shifters, 15912
 thermoplastic films, recording on,
 16207
 uniaxial holograms in image multi-
 plication, 17904
 vacuum ultraviolet, 17404
 vibration and sound visualization
 applic., 16952
 X-ray microscopy, 17110

Humidity

control, applications, 18258
 dosimeters for personnel monitor-
 ing, effect on, 16721
 measurement and monitoring,
 18731
 relative, in insulating oils, meas.,
 16316
 relative, of air, potentiation metric meas.
 method, 16620
 thermohygrometer with heater-type
 moisture sensitive element,
 17973

Hygrometers

dew-point, using radioisotopes,
 18783
 thermo-, with heater-type moisture
 sensitive element, 17973

Ice

buried glacial and ground, detection
 with thermal infrared remote
 sensing, 17868
 crevasse detection using impulse
 radar, 18088
 glaciers, measurement of surface
 strain rates using embedded wire
 strain gauges, 16169
 particle counters, automatic, response
 characteristics, 17069
 polar, spectrophotometer for meas.
 of light in, 17072
 satellites in meas. of, 17872

Image converters

and intensifiers, 17642
 penetrating, radiation, 17385
 Phototitus, light valve, 18148
 for solar studies, 17570

Image detector

at telescope, 17363

Image intensifiers

- for astronomy, 18906
- bioluminescence studies, 18882
- and convertors, 17642
- image evaluation of, 18403
- for night vision, 18147
- night vision aids, 18580
- night vision, progress, 16791
- performance standards, 17902
- for plastic scintillators, 16200
- projection on large screen using liquid crystals, 18146
- proximity focused, for photographic camera systems, 15655
- X-ray, 17386
- X-ray, production testing, 18063

Images

- assessment for automated testing of mirror flatness, 18404
- computerized analysis, applics., 17111
- dynamic interactive television processing, 15910
- electro-optical devices, image quality testing, 18405
- field-ion microscope, unusual features at 4.2 K, 15648
- optics, precision meas. and calibration, 17383
- quality assessment by means of OTF, 18297
- recorders, optimization of information display, 18687
- visual data transmission from remote locations, 15911
- X-ray TV, perceptibility, 18407
- zoom lenses, image quality, 16504

Image tubes

- orthicons, performance analysis, 15906
- self-scanned digital, for use in astronomy, 18108
- X-ray, 17646

Imaging

- accuracy in special microscopy techniques, 18145
- auroral imagery, DAPP, in study of magnetic substorms, 15887
- biomedical diagnosis, acoustic system, 16131
- characteristics of X-ray tubes, detmn., 18408
- charge-coupled imagers, prospects, 15908
- colour CRT screens, image formation in dichromate resists, 16505
- comparison of systems for specific object distribution, 16503
- digital image processing, 17112
- direct ultrasonic visualisation, 16408
- electron microprobe scanning, 18673
- electron microscope, high resolution dark field, focusing of images, 15652
- electron microscope system, contrast transfer characteristics obtained using tilted specimens, 15651
- electro-optical systems, OTF, 18676
- fluoroscopic large screen system,

- performance, 17903
- Fourier, in image subtraction, 18406
- gamma ray systems, sensitivity meas., 16201
- Hadamard spectroscopic imager, two-dimensional encoding masks, 15657
- holography, image multiplication in, 17643
- infrared, using charge-coupled devices, 17702
- magnification, optimal, for visual microscopy, 15900
- medical X-ray, state-of-the-art, 18069
- nuclear medicine organ image transmission, 18070
- in nuclear medicine, techniques, 16720
- orthicons, characteristics, 15656
- OTF measuring equipment trends, 18677
- pattern recognition, nuclear core component surveillance applic., 16438
- pupil, in astronomical spectrographs, 16488
- radiation detectors, infrared and visible, and applics., 17631
- radioisotope devices in medicine, 18602
- radionuclide image quantification, 15854
- remote sensor image contrast, 17040
- restoration and enhancement, 16779
- Ruticon, optical processing capabilities, 15907
- satellite, for remote sensing of Earth resources, 15884
- silver halide emulsion, photographic latent image formation, 15654
- solid state devices in, review, 18402
- solid state sensors, 16502
- solid state sensors for biomedical applics., 16714
- speckle noise reduction by random phase shifters, 15912
- systems, gas counters as, 17977
- thermal, FLIR systems, 15926
- thermal, state-of-the-art, 18678
- thermal systems, assessment, 18149
- thermvision, 17384
- tomography, electrofluoroplanigraphy, 16457
- transparent ceramic image storage and display material, 17417
- ultrasonic, in medicine, 17328
- ultrasonic, of arterial wall echoes, 15861
- ultrasonic system using time delay spectrometry, 15860

Impact

- cyclic, device for testing at elevated temps., 16975
- hardness, review of methods for detmn., 18300

Impedance

- bioelectric, meas. at low frequencies, 17334
- as biology and medicine, meas., 17835

- Hall effect analogue meas. device, 17931
- loop, measuring instrument, 16243
- lumped parameter, meas., 17598
- matcher for waveguide and coaxial systems, 15705
- respiration monitor, 18612
- respiratory, direct meas., 17541
- short cct., in electric power networks, meas., 16435
- tissue, in vitro meas. over wide frequency range, 15850
- urinary bladder emptying meas. applic., 18617

Inductance

- machine, measurement using operational amplifier integrator, 16256
- measurement using bridge cct., 16532
- precision measurement, 18187
- static convertors, 16219

Infrared

- astronomical observations, techniques, 17359
- astronomy telescope, airborne, 18116
- bacteria mass and size meas. method, 18596
- bolometer in helium bath, for spectroscopy, 18742
- gas-solid interface studies, variable temp. infrared cell, 15980
- grating spectrophotometer, 17202
- imaging, state-of-the-art, 18678
- interferometer, fast-scanning Fabry-Perot, 17948
- interferometers, far IR, double-beam modification, 16290
- interferometer, shuttle-borne, requirements, 18650
- laser interferometer, 18221
- lasers, output power meter for, 16566
- laser wavelength measurement, 17952
- microwave double resonance spectroscopy and microwave transient nutation, 17747
- multi-colour photometry and polarimetry, 18103
- optics, developments, 18220
- photoabsorptiometer, parameters in near infrared, 15725
- polarimeter, airborne, 18895
- prism interferometer-spectrometer using gas-lubricated drive bearing, 17434
- Raman spectrometry, literature review, 17204
- reflection spectra, analysis of glass structure applic., 16614
- scintillation counters, gas-proportional, 16329
- solar spectroscopy, airborne far infrared, 18104
- spectra measurement by Fourier transform spectroscopy, photometric precision, 17732
- spectrometer and receiver, nonlinear frequency converter, 17438
- spectrometer, Hadamard-transform,

for analytical spectrochemistry, 16873
 spectrometer, high resolution, in 8–10 μm range, 16874
 spectrometer, rapid scanning Michelson interferometer in astronomy, 18102
 spectrometry, literature review, 17201
 spectrophotometer, circular dichroism and linear dichroism, 17958
 spectroscopy, computerized, via Fourier transform techniques, 17733
 spectroscopy, Fourier, 16307
 spectroscopy, identification of microsamples of organic compounds, 16900
 spectroscopy with Fourier transformation, 17196
 stellar interferometer, 10-micron heterodyne, 17573
 stratospheric composition meas., 16743
 temperature profile radiometer, atmospheric experiment, 16185
 up-conversion display devices, 17121
 vidicon technique for meas. of thermal lensing from laser windows, 16281

Infrared detectors

AC arcs, total radiation meas., 15828
 applications, 17631
 bolometer, far IR, 16561
 charge-coupled devices, 17702
 coal mining, remote sensing for thermal activity, 17000
 CO₂ laser energy, 18211
 cryogenic grating spectrometer, 18761
 developments, 16276
 diffused junction photovoltaic, 18467
 epitaxial PbSe Schottky-barrier diodes, 16855

 heterodyne, for astronomy, 18656
 ice, buried glacial and ground, detection with thermal remote sensing, 17868
 indicator based on semiconductor-ferroelectric SbSi, 18468
 In Sb, high detectivity, 18466
 interferometer and applics., 18485
 interferometry, scanned IR, 16868
 metal-oxide-metal diode, 18476
 military applications, 17862
 narrow bandpass fast, 18465
 night-vision systems, 16176
 oil films on water monitoring, 18890
 overview, 18744
 Pb Te r.f. sputtered, 15721
 photo-electric, recent developments, 15963
 pocket device, 16560
 pollution monitoring applic., 17551
 pyroelectric, 18209
 pyroelectric, state-of-the-art, 17945
 radial temperature gradient, for integrated cct. manufacture, 17179
 in remote sensing, 17863

review, 15962, 18745
 RF sputtered arrays, 16277
 semiconductor, 17630
 silicon MOSFET, design for, 16856
 temperature autostabilized, using vibrating TGS plate, 17183
 thermal, 16278, 17701
 thermal, production and properties, 17944
 thermistor flakes, 18210
 thermometer, 17691
 thermovision imaging, 17384

Inspection

automatic, adaptive logic unit for, 16776
 bottles, automated apparatus, 17322
 defect marker, two-coordinate, 16415
 maxi-check dimension 4 3-axis machine, 18557
 pressure vessels, in-service programme, 16118
 rail, comparison of effectiveness of units, 16445
 rail gauge, automated, 17311
 sound level meters by low meas., 16382
 strength characteristics of composite materials, 16695

Instrumentation

amplifiers for, 16496
 for astronomy, optical, 17078
 atmospheric, solid state, 17857
 in automobile industry, 18326
 biomedical, applied physics course, 18059
 biomedical, use of state logic, 17325
 calculator-based meas. package, 17114
 city water works, 18593
 control, constant current power supplies, 17922
 design and operating experience problems, 16194
 for dry-cct. contact resistance meas., 17927
 efficiency aspects, 18661
 in EHV substations, 18323
 electronic, progress, 16214
 explosion-proof, design and production, 17893
 flight test, 17528
 future trends, 18662
 geoscience, 18081
 glassmaking, 16111
 hypervelocity aerodynamics, 17467
 industrial, operational reliability, 18047
 in industrial plants, care and use, 16697
 interface links in systems, 18130
 magnetic susceptibility, trends, 17152
 marine, developments, 18369
 measurement automation and mechanisation, 16495
 medicine, measurement for, 16448
 microelectronics, impact of, 16772
 modular apparatus, trend to, 17092
 module philosophy, 17884
 NQR, and techniques, 17968
 for nuclear reactor pressure vessels,

prestressed concrete, 16117
 nuclear reactor, survey, 18054
 nuclear, trends, 17216
 with optoelectronic sensors, 15643
 in processing plants, review, 17521
 review, 18124
 Space Shuttle Transportation System, 16768
 standards and practice for, 17634
 systems, modular accessories, 17895
 systems, putting together at minimum cost, 17887
 of universal measuring system, 18429
 vibration, for nuclear reactors, 16442
 for water pollution control, 17557

Instrument industry

astrophysical, in USSR, 17079
 communications, maintenance and calibration, 17006
 control system design aspects, 17637
 electronic equipment, East German, 17575
 mechanics training, 17635
 precision components, c.-a.d. process, 17892
 rider card index in meas. equip. lab., 16491
 safety act, U.S., effects on, 17820
 ship, use of subcontractors, 17526
 standards for ensuring accuracy, 16191
 test, progress, 16385
 thermometer suppliers, 18738
 watch, survey, 18451

Instruments

borehole, materials and components from electronics technology, 17059
 Bureau National de Metrologie, evaluation and approval system, 18670
 design techniques, 18391
 digital data, 18134
 digital, interface bus, 17647
 educational courses on instrument science in UK, survey, 17636
 interface standard, 18681
 with liquid crystals, 18411
 low-cost, design, 18392
 measurement, and computers, apparatus and programming relationships between, 16196
 measurement and control, rate of failures, 17380
 mechanical systems in, high-speed cine camera for dynamic studies, 17270
 microprocessors in, trends, 18663
 minimum cost, for systems use, 17886
 moving coil, dynamic characteristics meas., 17381
 multiscale, experimental evaluation, 18131
 noise pollution level instrument, 15810
 nuclear reactor, automation, state of the art, 17829
 photoelectric, FEM3 and FEM4, 18227

pneumatic, Vumatik range, 15895
 portable, developments, 18132
 programmed cell, for digital Raman difference spectroscopy, 16589
 relaxometer, integrating, for meas. of electron paramagnetic relaxation times, 16010
 reliability and other aspects, 18021
 repair, estimating economic desirability, 15642
 safety, in hospitals, 18604
 selection, economics of, 15641
 silt analysis and air entrainment meas., 16735
 spring force inspection, 18562
 statistical comparison, problem, 18667
 stochasticmeter, simulation and meas., 16195

Interference: electrical

measurement apparatus, effects on, 16810
 in superconductors, use in highly-sensitive electrical meas. instruments, 17130

Interference: optical

angular displacements, automatic meas. method, 17263
 length measurement, 16937

Interferometers

astronomical Twyman-Green system, 18101
 coherence, for direct meas. of atmospheric transfer function, 16766
 confocal, with extra-axial beam input, 17625
 digital wavefront meas., for testing optical surfaces and lenses, 17626
 double Mach-Zehnder heterodyne intensity, 18486
 Fabry-Perot, fast-scanning far-infrared, 17948
 Fabry-Perot, scanning; applic. to space research, 18651
 Fabry-Perot, use in laser-Doppler anemometer, 17782
 Fabry-Perot, system errors in laser wavelength meas., 16567
 far infrared, double-beam modification, 16290
 heterodyne laser, with acousto-optical modulator, 17189
 with independently adjustable parameters, 18747
 infrared, and applics., 18485
 infrared laser, 18221
 large aperture, 16865
 laser, based on shadowgraph, 15734
 laser differential, 16866
 laser Doppler, 17949
 laser, variable shear and tilt, 18748
 with lateral resolution, Jamin-Lebedeff, 17707
 Michelson, Fourier-transform spectroscopy with, 17957
 microinterferometer, scanning and integrating, 18328
 phase and water vapour meas., 16472

portable, as fast explosive-gas analyzer for use in mines, 18050
 radial-shear, simple, 18222
 rapid scanning Michelson, as infrared spectrometer in astronomy, 18102
 ring, accuracy of small optical rotation meas. using, 17190
 scanning Fabry-Perot, for precision meas., 18750
 shearing, for refractive-index studies, 18751
 shuttle-borne infrared, requirements, 18650
 solar, 35 GHz, 17572
 speckle pattern three-beam, elastic constant and strain meas. applics., 16958
 speckle-shearing, for meas. derivatives of surface displacements, 16967
 spectrometer, cryogenic, 17731
 spectrometer, infrared prism, using gas-lubricated drive bearing, 17434
 stellar, comparison, 18657
 stellar heterodyne, 18658
 stellar, 10-micron heterodyne, 17573
 strain-ratio meas. by, 17500
 wavefront shearing, lens testing applic., 16494
 X-ray, 15746
 X-ray, four-block, 15747
 zone plate, 16867

Interferometry

crystal vibration meas., 16379
 developments, esp. use of lasers, 16291
 digital fringe-fraction meas. instrument, 17710
 dilatometers, fast, 17698
 for electron density of plasma, 337
 microns, high-resolution, 15748
 Fabry-Perot etalon, method for finding instrumental profile, 15902
 film thickness on curved substrates, meas., 16362
 ion and neutral motions, simultaneous meas. by radar and optical techniques, 15876
 laser, applied to mercury surfaces of manometer, 17788
 laser Doppler heterodyning in vibration meas., 17806
 laser, in manufacture, 18311
 laser, test and examination of distance meas. system, 16355
 length meas. by He-Ne lasers, 18022
 liquid surface, topography study, 16335
 moiré method for recording carcass shape, 16133
 Nomarski, small wedge angles, small semiconductor samples applic., 16065
 opaque surfaces, in-plane displacements meas., 16068
 optical glass homogeneity testing using laser, 16572
 parallelism and prism angles checking, 16570
 plane surface checking methods,

16569

radioastronomy, aperture synthesis with non-regular distribution, 16758
 radio, long baseline, 17854
 RF, sea state meas., 18371
 rotational Raman, gas temp. meas., 17942
 scanned IR, 16868
 speckle, and possible extensions, 16748
 speckle, for in-plane deformation meas., 18484
 speckle-shearing technique for strain gauge, 18307
 spherical surfaces, checking shapes, 16571
 stellar, achromatic, 17366
 of stellar sources in global clock synchronization, 16175
 strain gauge, 17503
 at sub-mm wavelength, three element optical systems, 16864
 surface measurements, 18749
 thickness measurement of films on transparent substrates by photoelectric detection, 16361
 topography, shadowless Moiré, using single light source, 16370
 very long baseline, in southern hemisphere, 16761

Interferometry: holographic

acoustical, 18556
 adhesion fault detection applic., 17302
 circuit-breaker arcs, diagnostic methods, 15829
 crack detection, 16091
 crack detection in large metal objects, 16093
 deformation measurement applications, 17505
 displacement and strain meas., 16066
 displacement and strain meas. applic., 16067
 for high-velocity flow density profiles, 16033
 particle sizing techniques, 17223
 Poisson's ratio, study of end effects associated with four-point bending technique, 16084
 pulsed HF laser, 18219
 radial shear interferometer, 17188
 rocks, strain and creep meas. on, 17852
 shear, radial and lateral, 17289
 speckle-pattern, plane-surface strain examination, 16081
 speckle-pattern, strain meas. and elastic-constant meas., 16080
 speckle photography, in-plane strain meas. using Young's fringes, 16082
 speckle techniques, 16511
 spherical surfaces, checking shapes, 16571
 straightness of generatrices of cylindrical surfaces, direct testing, 16364
 strain analysis, 18845

surface contours meas., 15803
 techniques, 17402
 transient stresses study, 16083
 for vibration analysis, 18031

Ionization

air velocity and mass flow meas.
 device, 17780
 chamber, in fast neutron beam
 dosimetry, 16148
 exoelectrons and photoelectron
 detection, efficiency of open
 ionization counters, 16014
 field, mass spectrometry, 16002
 gauge for meas. of relatively high
 pressures, 16043
 gauges, high-pressure, linearizing
 characteristics of, 16421
 gauge, stabilization of sensitivity,
 16317
 gauges with radioactive isotopes,
 literature review, 18795
 mass spectrometer for studies,
 17739
 modulated currents, amplifier for
 meas., 16226
 natural background radiation, ioniza-
 tion chamber meas., 16011
 vacuum gauges, sensitivity, 16047

Laboratories

chart recorder for, 17409
 high-power testing, 17517
 HV, Polish, 17522
 magnetometry of rocks and coals,
 simplification of procedures, 16541
 measuring equipment testing, 18388
 measuring equipment, use of rider
 card index, 16491
 medical equipment calibration, 61140
 railway coach, testing and meas.
 apparatus, 16444
 UHV, and test facilities, 16255

Lasers

airborne Doppler velocimeter, 17982
 airflow measurement using Doppler-
 difference technique, 17231
 anemometer, Doppler, for turbulence
 meas., 16651
 for angle of rotation meas., 15805
 applications and operational require-
 ments, 17891
 atomic fluorescence spectrometry,
 high intensity pulsed source,
 17719
 clocks synchronisation to precision
 of few nanoseconds applic., 17607
 CO₂, detection of water pollutants
 by, 17035
 CO₂ laser energy detector, 18211
 CO₂-TEA, with Rogowski profile,
 parametric meas., 15733
 CW dye, rapidly tunable, direct
 absorption spectroscopy applic.,
 16872
 differential interferometer, 16866
 digital Raman difference spectroscopy,
 programmed cell instrument, 16589
 displacement meas. systems used in
 length meas. techniques, 17255

displays, GaP monolithic, laser-
 machined, 15928
 distance measurement system, 17257
 Doppler anemometer, hypersonic
 flow velocity meas., 17235
 Doppler anemometer using Febry-
 Perot interferometer, 17782
 Doppler anemometry, 17981
 Doppler anemometry, applications,
 18262
 Doppler flowmeter, 16917, 17768
 Doppler heterodyning in vibration
 meas., 17806
 Doppler interferometer, 17949
 Doppler measurement on sloping
 beach, 16035
 Doppler spectrometer for study of
 electrokinetic phenomena, 16312
 Doppler velocimeter as optoelectronic
 data processing system, 17774
 Doppler velocimeter, hydraulic
 machines applic., 18811
 Doppler velocimeter measurement in
 nonuniform flow, error estimates,
 17228
 Doppler velocity meter, 16338
 Doppler velocimeter to measure
 velocity profiles, 17778
 Doppler velocimeter with high
 spatial and temporal resolution,
 17777
 in double resonance spectroscopy,
 review, 17748
 dye, advances, 17714
 dye, intercavity atomic absorption,
 18491
 dye, intra-cavity enhanced absorption
 meas. using photodiode array
 direct reading spectrometer,
 15969
 dye laser enhanced spectroscopy,
 17437
 electron-optics analyzer with set of
 different sweeps, 15897
 experimental and applics., 18490
 fibre diameter meas. by laser diffrac-
 tion, 17260
 flash method for heat capacity meas.
 of nuclear materials, 16563
 flowmeter, Doppler scalar, 17227
 fluid surface velocities meas. applic.,
 16038
 fluid velocity meas. by laser Doppler
 techniques, 17226
 fluid velocity sensor, 17776
 fluorometer, remote sensing, for
 water pollution detection, 17866
 gas, alignment and levelling with,
 17796
 gas, visual refractive defects meas.,
 17337
 granulometer, 17971
 gravimeter, stabilized, 17566
 He-Ne, wavelength stabilization and
 interferometric length meas.,
 18022
 heterodyne meas. of small arbitrary
 displacements, 16373
 holography, meas. techniques using,
 17113
 industrial control equipment applics.,
 16105

information and meas. technique
 applic., 16497
 infrared, output power meter, 16566
 infrared wavelength meas., 17952
 interferometer based on shadowgraph,
 15734
 interferometer, confocal, with extra-
 axial beam input, 17625
 interferometer, heterodyne, with
 acousto-optical modulator, 17189
 interferometer, infrared, 18221
 interferometer with variable shear
 and tilt, 18748
 interferometric applics. for test and
 examination of distance meas.
 system, 16355
 interferometry applied to mercury
 surfaces of manometer, 17788
 in interferometry, developments,
 16291
 interferometry in manufacture, 18311
 inverse Raman spectroscopic
 technique, 17729
 lidar for atmospheric meas., 17564
 lidar measurement of temperature,
 17680
 lunar laser ranging station, 16189
 magnetic bubble sensing applic.,
 16543
 manometer-flowmeter for corrosive
 media, 17992
 maser techniques for sensitivities of
 ESR spectrometers, 16008
 in measurement and testing, 18390
 mechanical values meas. methods,
 16058
 mechanical vibration meter, 18292
 microscope, laser Doppler, 16647
 microspectral analyzer, investigation,
 16587
 mirrors, meas. of optical absorptivity
 in, 16573
 mirror surface flatness meas., 17711
 multicoloured system for small
 technicolour displays, 16517
 multi-pulse, for recording high-speed
 events, 15665
 multi-purpose laser, 15644
 night vision applics., 16791
 noble-gas ion, length meas., 16936
 optical fibre diameter meas. applic.,
 16063
 optical glass homogeneity testing
 applic., 16572
 optoacoustic air pollution detectors
 calibration system, 17034
 parameters of, measurement, 17890
 parametric tunable, use in remote
 detection of CO, 16160
 polar nephelometer, 18898
 porosity measurement applications,
 17455
 projection microscope, 17101
 pulsed, standard calorimeter, 18741
 pulses, giant, meas. and centralisation
 of peak-values, 16568
 radar system, sea surface wind velocity
 meas., 17068
 Raman instrumentation, 17436
 Raman lidar, gaseous pollutant
 detection, 18626
 Raman, spectrography device, 16311

Raman spectrometer, optical fibre, 18235
 saturation spectroscopy, survey, 17715
 semiconducting, hologram recording and reconstruction, 15661
 shock wave velocity meas. using Doppler principle, 17236
 sound velocity meas. using phase detection of optical beat, 17807
 spectrometer, direct reading, 17197
 spectroscopic analysis applic., 16586
 spectroscopy, in atmospheric diagnostics, 17860
 spectroscopy, mode-locked laser Raman, technique for rejection of interfering background luminescence signals, 15995
 strainmeters, iodine stabilized laser, 17810
 in surface inspection and classification, automatic, 17296
 thickness measurement applics. in sheeting and extruding, 17262
 torque measuring device, 16986
 tunable dye, atomic spectroscopy applic., 16313
 tunable, in spectrofluorometer, 18497
 tunable spin-flip Raman, in CW molecular spectroscopy, 18759
 velocimeter for process control, 17314
 velocimeter measurement, 17983
 velocimeter, resonant Doppler, 18812
 velocity of light meas. applic., review, 17632
 visible CW dye, in opto-acoustic spectroscopy, 18494
 wavelength measurement and stability, 15974
 wavelength measurement using Fabry-Perot interferometer, system errors, 16567
 wavelengths of, meas. equipment, 18231
 windows, infrared vidicon technique for thermal lensing meas., 16281

Leak detection

automatic, applicability and limits, 18046
 cable pressure telemetry system, 18581
 gas, 18309
 vacuum bubbler for, 16982

Length

back focal, of lenses, meas. instrument, 17712
 batch meas. system, 15795
 cable elongation meas. apparatus, 16436
 crack length meas. in testpieces, 15813
 digital electronic meas. device, 16934
 fatigue crack, meas. by nondestructive test, 16407
 focal, of lenses, meas., 18479, 18753
 interference, measurement, 16937
 interferometric measurement by

He-Ne lasers, 18022
 International Metre by laser wavelength stability, 15974
 laser interferometric meas., 16355
 linear system, 18538
 measurement, acoustic-optical raster as grating for, 16354
 measurement techniques, instruction and research, 17253
 measurement techniques using laser displacement meas. systems, 17255
 measurement using capacitors and voltage dividers, 16935
 metre definition, metrological problems, 17099
 metre standard unit, 16932
 metrology, accuracy improvements, 16198
 muscles, instrument for dynamic and static meas. of large length changes, 16138
 noble-gas ion-laser, length meas., 16936
 noncontacting comparator with 10 nanometer precision, 16661
 pneumatic meas. methods, 18826
 precise measurement using capacitors and voltage dividers, 17481
 standards, geometrical meas. with curved and plane surfaces related to light wavelengths, 16938

Lenses

afocal systems for straightness meas., 17252
 back focal length meas. instrument, 17712
 checklist for, 16192
 decentering and deformation testing during assembly of objectives, 16493
 design review, 16492
 focal length measurement, 18479, 18753
 interferometer, digital wavefront meas., for testing, 17626
 optical transfer function, simultaneous meas. at three field points, 15723
 photographic, evaluation criteria, 18230
 photographic, MTF routines for assessment, 18482
 projection, tests for, 18228
 standard reference, set of, 18128
 testing with wavefront shearing interferometer, 16494
 wide-field triple lens paraboloid field corrector, 15891
 zoom, image quality, 16504

Level (depth)

aerodynamic gauge, 15790
 alarm and control devices, trends, 17471
 capacitive indicator for stone industry, 18590
 china clay production, detection and control in, 17827
 control bubbler, automatic, 16051
 gauges, construction, 18280
 hydrostatic meter, calibration, 16050
 LED display, 18533

of liquids, control using electrodes, 17243
 measurements, esp. for process control, 17241
 modifications to equipment to avoid contamination, 16929
 non-contact measurement by radio-activity, 18024
 plethysmograph, capacitance, for small volume changes meas., 17027
 snow, measurement with terrestrial photos, 17548
 in steam boilers and tanks, monitoring apparatus, 17245
 ultrasonic meas. instruments, 17773
 of viscous liquids, gauge, 18534
 water, effects with capacitive sensors, 16049
 water gauge, electronic, 18019

Level (tilt)

inclinometer with induction orientation sensor, 16483
 slope detmn. by glass rod, 16943

Light

acoustical modulation, phase methods for linear displacements meas., 18283
 bombardment-induced emission for analysis of surfaces, 17753
 intensity distribution and luminous flux meas., 17700
 meter, integrating, 17699
 multichannel forward scattering meter for oceanography, 16178
 photographic flashmeter, 16863
 sensing devices for industrial meas., 17309
 spectral lamp constant-current sources, design criteria, 15894
 speed of, measurement, 16859, 17186
 speed of, meter, 16297
 velocity of, use of lasers for meas., review, 17632
 weak fluxes, system for intensity meas., 17624
 weak signals detection, 17623

Light sources

blackbody as standard, 18127
 discharge lamps, photometric meas., 18477
 lamps, ultrastable, reference signal compensation technique, 16296
 length standards, geometrical meas. with curved and plane surfaces related to light wavelengths, 16938
 luminous intensity distribution and luminous flux, automatic photometric system, 16295
 shadowless Moire topography using single source, 16370
 spectral irradiance distributions, 17373
 two-frequency radiation, optical heterodyne arrangements for mechanical vibration meas., 16673

Linear dimensions

expansivity measurement, 16853
 inductive pressure transducer, 17275

in France, research and organisation, 16057
 Ronchi gratings for small linear meas., 16353
 straightness measurements, afocal lens systems for, 17252
 temperature errors in meas., detmn., 18281
 unevenness, two-surface method for meas., 16939

Liquids

acoustic resonator, 18598
 aqueous samples, 1 GHz ESR spectrometer for study, 16897
 complex permittivity of, meas., 16538
 concentration, differential ultrasonic device for continuous meas., 17249
 density, automated apparatus for precision meas., 16657
 density measurement by means of weighing, 17247
 electrical conductivity meas., 17151
 films, thin, thickness meas. by fluorescence technique, 17259
 gas content and vapour pressure measurement, 15787
 Kerr constants, unit for relative method, 15735
 metal, applic. of crack length meas. in testpieces, 15813
 mobility measurement in, optimization photocathode for, 16642
 pressure measurements, accuracy, 18012
 refractive index of, instrument for meas. and control, 17191
 stream boundary layers, laser Doppler velocity meas., 15783
 surface interferometry for topography study, 16335
 tribology for atomic and space industries, 17009
 turbulence measurement by continual pursuit of tracer particle motion, 16649
 ultrasonic fields in, megahertz, meas. using probes, 18838
 velocity-dispersion measurement, 18527
 viscous, gauge for level and specific weight, 18534

Luminescence

bioluminescence studies, image intensifier-spectroscope system, 18882
 cathodo-, microscopy, 16790
 chemi-, air pollution monitors based on, 17345
 dosimetry, high radiation dose, 16027
 dosimetry vs. film badge dosimetry, 18080
 excitation spectra, meas., 16877
 of sea water, spectrofluorometer, 18638
 spectrometry, derivative, 17961
 spectrometry, kinetic, computerized, 18496
 spectroscopy, mode-locked laser

Raman, technique for rejection of interfering background luminescence signals, 15995

Machine tools

carriage displacement meas. by photoelectric microscope, 18314
 drills, geometric parameters monitoring instruments, 16705

Machining

displays, GaP monolithic, laser-machined, 15928
 peripheral milling, 2-D force dynamometer in cutting process, 17316
 twist drill geometry checking, guro-meter, 16706

Magnetic

balance, increasing precision of, 18549
 bubble display, 17656
 bubble domain display, 17429
 bubbles, electrical sensing, 16543
 concentration of suspensions, analyzer, 16616
 crack testing, instruments, 17509
 flowmeters, corrosion-resistant, 16921
 instruments using r.f. SQUID, 17609
 magnetotherapy, low-frequency, instrumentation, 18335
 monopole detector, 15780
 non-destructive testing methods, 18045, 18578
 osmometer, magnetic suspension, 16039
 recorder in water temp. meter, 18641
 recorders, analogue and digital, 18151
 saturation induction utilised in temp. meas., 17166
 susceptibility balance for weak magnetic materials, 15712
 susceptibility measurements, high-temp. apparatus, 17602
 substorms, use of DAPP auroral imagery in study, 15887
 temperature probe, magnetically operated, 17681

Magnetic field

broad-band geomagnetic induction instrumentation evaluation, 16174
 geomagnetic, meas. by gradient method, 16484
 Hall probes for range up to 3T, calibration, 16257
 Hall sensors measurement system controlled by NMR, 16540
 heat pulses in, CdS bolometer for detection, 17695
 induction meter, 17605
 intensity measuring instrument, 15949
 intensity meters, checking equip. with ferrite antennas, 16536
 measurement Hall transducers, 18723
 produced by human heart, brain and lungs, meas., 18337

solar, influence of instrumental polarization on meas., 17357
 superconducting ELF sensors for submarine communications, 15709
 susceptibility measurement using superconducting magnetometer, 16260
 transducers, electron-tube, 18446

Magnetic flux

induction transducer with compensating device, 16259
 meter, converted from digital voltmeter, 18181
 0 to 30 kOe, superconducting quantum flux meter, 15710

Magnetic materials

ferromagnetic films, magnetoelasticity meas. instrument, 15713

Magnetic properties

easy axis declination meas. and skewmeter, 18725
 field modulation technique with synchronous detection in time-dependent fields, 16832
 high-sensitivity balance, 16544
 instruments for measurement, 17605
 measurement techniques, 16542
 pendular balance measurement, 17933
 permanent magnet instability testing by differential-ballistic method, 15711
 precise measurement on materials, 17601
 susceptibility, measurement by Faraday method, 17153
 susceptibility measurement, superconducting magnetometer for, 18191
 susceptibility, trends in instrumentation, 17152

Magnetic resonances

electron paramagnetic relaxation times meas., integrating relaxometer, 16010
 EPR detection by Faraday effect sensitivity, 16603
 magnetic field meas., Hall sensors controlled by NMR, 16540
 NMR, microscopy in vivo applic., 18880
 NMR, velocity meas. in flowing fluids applic., 17230
 NQR instrumentation and techniques, 17968
 nuclear, blood flow meas. applic., 18078
 nuclear, flowmeter design, 18009
 nuclear, flowmeter, process flow meas., 18008
 nuclear, measurements on cellulosic materials, sealable sample holder with internal reference, 15770
 nuclear, pressure-resisting glass cell for meas., 16600
 nuclear, relaxation times meas., pulse train technique, 15771
 nuclear, ultrahigh precision spectral analysis, 17745
 nuclear, use for meas. of residual

lattice strain in nonmagnetic metals, 16399
 pulsed NQR method of meas. stress in solids, 17284
 pulsed nuclear, thermometer for use below 100 mK, 16286
 spectra, precision in meas., 16871

Magnetometers

astronomical observations applications 17875
 automatic observatory system, 17063
 ballistic, 18722
 bias coil systems for, compact, 17066
 broadband thin-film SQUID, pumped at 10 GHz, 17155
 checking equipment, 18447
 differential Hall effect, 18448
 digital three-component ferroprobe, 15948
 electro-prospecting, causes of temperature instability, 16733
 ferromagnetic probe, with rectangular excitation, 16261
 field microelectron proton, with digital output, 18449
 follow-up, 17154
 gradiometer, superconducting second-derivative, 16833
 Hall, sensitive, 16262
 at liquid helium temps., 16539
 low-temperature silicon diode, 17677
 marine proton, in aerial surveying, 16729
 nuclear free precession, using optically polarized He^3 gas, 17065
 nuclear precession, 17603
 nuclear-precession sensor, shipboard, 16485
 prospecting, with wideband sensitive element, 16732
 quantum and nuclear precession, universal meas. instrument, 17604
 Rb, wide range and high sensitivity, 16258
 for rocks and coals, simplification of laboratory procedures, 16541
 spacecraft, high fluxgate, 18904
 SQUID, use for geomagnetic meas., 17064
 superconducting, 18445
 superconducting, for susceptibility meas., 18191
 superconducting, magnetic susceptibility meas., 16260
 superconducting quantum interference, geophysical prospecting applic., 17054
 thin-film inductance-variation, developments, 16830
 with transducer, 17156
 triaxial induction, for meas. of artificial magnetic fields between 4 Hz and 4 kHz, 16831
 UHF SQUID, 18190
 UHF superconducting, with thin film sensor, 18724

Maintenance

chemical analysis methods, 16305
 communications industry, meas. instruments, 17006

instrumentation in modern industrial plants, 16697
 instrument, reduction with refrigeration, 18053
 of manometers, review, 17476
 planning of repairs aided by computer, 16777
 recorder, aided by test and calibration set, 15919
 refinery control loops service factors, 17823
 repair of measuring equipment, estimating economic desirability, 15642
 spectrophotometers, atomic absorption, 15986
 telescope, 91 cm reflecting, 18649

Management

dimensional metrology in France, research and organisation, 16057
 instrument accuracy, standards for ensuring, 16191
 planning of repairs aided by computer, 16777
 rider card index in meas. equip. lab., 16491

Manometers

catheter calibrator, 18333
 central venous electromanometer, self-levelling, 17025
 high-pressure p-n junction, 17475
 instrument checking, 18519
 ionization, Orbitron type, 17241
 laser, for corrosive media, 17992
 mercury U-tube, high sensitivity, 16655
 oil, automated positive pressure, 15788
 review of maintenance procedures, 17476
 sphygmomanometer, instrument for calibration of, 17331
 temperature control with thermomanometric meas. probe, 16266
 transfer, rack-mounted, 18014
 U-tube, laser fringe-counting interferometry for mercury level changes meas., 17788

Manufacture

cable testing during, unit, 18320
 of concave parabola, optical testing technique, 16858
 of counters, 17374
 of dip-meter, 16826
 of electronic measuring instruments, 16521
 of explosion-proof instrumentation, 17893
 gas panel displays, 18168
 glassmaking instrumentation and control systems, 16111
 of holographic equipment, economic problems, 17638
 hot-pressing process, apparatus for investigation, 15839
 Josephson junction fabrication, 17176
 level gauges, 18280
 mobile radio, testing, 18874

optical instruments, German-English dictionary, 17621
 of temperature gauges, industrial, 17520
 testing, 18848
 thermal infrared radiation detectors, 17944
 wire, drawing stress meas., 16999

Marketing

digital multimeter, purchase guide, 18696
 oscilloscopes, review, 17371

Markets

automatic test equipment, 17639
 digital panel meters, 17888
 multimeter, digital, survey, 17578
 for transducers, trends, 18126
 watch electronic, 17530

Mass

metrology, accuracy improvements, 16198
 sensors, applics., 17494

Mass spectrometers

atomic masses, precise detmn., 16327
 balloon-borne, cryopumping system, 16474
 with broad mass spectrum recording, 17736
 for chemical ionisation studies, 17739
 for complex organic compounds, 15766
 with crossed electric and magnetic fields, 16889
 cycloidal, characteristics, 15763
 double-beam, 18244
 double-focusing, for partial pressure meas., 17242
 double-focusing, voltage divider for, 17742
 field-emission ion source energy analyzer, 15768
 gas chromatograph, computerized, 18253
 for gaseous samples, adaptation, 17211
 impurity concentration distributions in solids, in-depth analyzer, 16891
 integrating multiscanning field ionization, 18773
 interface for liquid chromatograph, 18779
 isotopic abundance ratio, direct indication, 16597
 for isotopic analysis, 16892
 magnetic, multicollector cycloidal focusing, 16893
 miniature Mattauch-Herzog, 16595
 modulated molecular beam source, 18774
 with multi-collectors and peak selectors for continuous gas analysis, 17209
 multi-ion, 16894
 neutral and ion, AEROS satellite, 17737

panoramic RF high-speed, 16004
 positive ion, for studies of lower ionosphere, 17358
 programmable, 18246
 programmable quadrupole, 17210
 quadrupole, for operation in high vacuum systems, 16308
 quadrupole, review, 16598
 remote operation quadrupole, using custom radio-frequency link approach, 16003
 spark source, applics., 18501
 static operation, 18245
 tandem, for ion molecule reactions study, 17738
 tandem, for study of ion-molecule reactions, 16599
 time-of-flight beam-modulated, 16005
 time-of-flight nonmagnetic, with high resolution, 15767
 trapped-ion, for study of ion-molecule reactions, 17741
 unipolar, based on semiconductor elements, 17740

Mass spectrometry

analysis of samples with small amount of matter, 15769
 computerised, recent improvements, 17965
 field ionization, 16002
 gas chromatography, state-of-the-art, 17212
 glow-discharge, for elemental composition profiles in solids detmn., 16895
 ion kinetic energy, 17213
 literature review, 17208
 mass measurement of high accuracy, 15765
 negative ion, 16890
 peak detector for continuous meas., 16596
 quadrupole, computerised, in pollutant contents of samples analysis, 17032
 quadrupole secondary, apparatus with enhanced transmission, 17743
 secondary ion, applic. to thin film and surface layer research, 17966
 secondary-ion, review, 18243
 of secondary ions, 17444
 secondary ion, thin film and surface analysis applic., 17754
 time-resolved, direct digital output of data, 15764
 water pollution analysis, 18096

Mass spectroscopy

nonvolatile samples, adaptation, 18502

Materials

calibration, for particle size analysis, 16319
 cellulosic, sealable sample holder with internal reference for NMR meas., 15770
 composite, inspecting strength characteristics, 16695

dielectric and magnetic, precise meas., 17601
 dynamic testing techniques, 18036
 electroluminescent, progress, 16796
 electron microscopy, material sciences applic., 17010
 fibre diameter meas. by laser diffraction, 17260
 nuclear, heat capacity meas. by laser flash method, 16563
 optoelectronic, advances, 17117
 polymers, dynamic mechanical props. investigation by resonance vibration method, 16696
 porous, structure assessment, 18507
 radioactive nuclear, zoom microscope for, 17450
 scanning electron microscope system for studies, 15904
 sheet, attenuation-based microwave moisture gauge for, 16903
 sheet, surface-wave method for moisture content meas., 16314
 soft ductile and elastic, unit for determining damping props. in plane stressed condition, 16389
 spectral radiation coeffs. meas. by comparison with black body, 16556
 stress analysis and research, 16680
 testing machine, 16682
 texture analysis system, 16688
 textures, source of errors in quantitative detmn., 16320
 thermal properties, differential method for determining, 15958
 for thermometers, low-temp. semiconductor resistance, choice, 17174
 visco-elastic, equip. for short-cycle bending testing, 16974
 wear under reciprocating-rotary motion and dynamic loading, machine for investigation, 17295

Measurement

automatic, adaptive logic unit for, 16776
 cleaning of components used in, 16499
 by computer, possibilities and advantages, 18664
 computers in meas. systems, 16774
 in continuous processes, developments 17310
 co-ordinate measuring machine, 18025
 digital techniques, 18694, 18695
 economic analysis of inventions, 18125
 electronic equipment, East German industry, 17575
 errors, 17379
 fluid mechanics, applic. of fibre optics, 16028
 frequency scanning method in automation of meas. processes, 17096
 gauge blocks, utilisation progress, 16059
 industrial, light sensing devices for, 17309
 instruments and installations, 18389

using lasers, 18390
 using minicomputers, present status and development trends, 16771
 on-line, in continuous processes, immediate problems, 15818
 precision equipment design, 18129
 statistical comparison of instruments, 18667
 techniques, state-of-the-art and trends, 16770
 theory, overview, 17094
 viability study for system, 18689

Mechanical

engineering, gauge block utilisation progress, 16059
 optimization of meas. techniques, 18824
 optoelectronic methods for meas. of values, 16058
 systems in meas. instruments, high-speed cine camera for dynamic studies, 17270

Mechanical components

linkages in use of dynamometers, 16670
 optical element mountings, 17095
 relay springs testing, tensiometer for, 17291
 rotating machine elements, transducers for temp. meas., 17315
 screw threads, meas. of form and position deviations on flanks, 16944

Mechanical properties

dynamic, of polymers, investigation by resonance vibration method, 16696
 hysteresis of thin sheet specimens, instrument, 18569
 moment of inertia meas. instruments, 17274
 torsional damping, piezoelectric meas. method, 16973
 wear testing machine, 18559

Medicine

calibrations laboratory, 16140
 cytology and hematology, new instruments, 18336
 dynamic interactive television image processing in radiology, 15910
 examinations, hand-held contact microscope for, 18071
 fast neutron radiotherapy, control and monitor systems, 16146
 heart rate monitor, portable, with digital readout, 18079
 high-energy particles, applics., 18600
 insulation resistance meter for hospitals, 15687
 internal, and paediatrics, use of instant replay television, 15847
 magnetotherapy, low-frequency, instrumentation, 18335
 measurement in, instrumentation, 16448
 micro-videomat in medical research, 18334

neutron dosimetry in, 18881
 nuclear, advances in dosimetry, 17838
 nucleonics in, 17535
 pressure transducers for, 15844
 image transmission from remote locations, 15911
 radioisotope imaging devices in, 18602
 safety instruments in hospitals, 18604
 telemetry, 15843
 therapy, fast neutron, silicon diodes as dosimeters, 16147
 ultrasonic diagnostics, 17012, 18883
 ultrasonics, uses, 16713
 ultrasound, bibliography of diagnostic uses, 15856, 15857

Metals

atomic absorption in metallurgy, 17959
 cold rolling mills, nondestructive inspection of working rolls, 16110
 crack detection by holographic interferometry, 16093
 elastic constants, ultrasonic meas. at low temps., 16954
 electron microscope in modern metallurgy, 18316
 electron microscopy, metallurgical applic., 17010
 electron probe microanalyses, industrial applics., 16995
 hardness in liquid helium medium, meas. device, 17293
 hot pressing process, apparatus for investigation, 15833
 liquid, and alloys, density meas., 16930
 liquid, applic. of crack length meas. in testpieces, 15813
 liquid, density meas. by areometric method, 17473
 liquid, density meas. using gamma radiation, 17246
 liquid, high-temperature viscometer, 16711
 magnetic susceptibility meas., high-temp. apparatus, 17602
 memory material, plastic strain meas. techniques, 17501
 molten refractory, vacuum apparatus for surface tension meas., 16659
 Mössbauer spectroscopy; local spin relaxation, 18500
 non-destructive inspection using ultrasonic signal analysis, 17304
 nonmagnetic, use of NMR for meas. of residual lattice strain, 16399
 position lifetime spectrometer for studies, 16908
 silver-copper alloy coins, non-destructive testing, use of specific heat, 18791
 sintered iron parts, complex investigation of densification, 15817
 tensile testing at high rates of deformation, device, 16386
 tensile tests below 1 K, 16400
 thickness gauge, microwave, 16358

Meteorology

air-mass transfer regions, 15890
 air pollution, remote sensing, 17865
 automatic weather station, 17859
 buoy for measurements, 17560
 ceilometer, eyesafe Er laser range-finder, 16165
 climatological instrumentation systems for use in remote locations, 17856
 cloud droplets, drizzle and rain drops, meas. of electric charge, 16166
 dimensional, information on research and organisation, 16057
 history, 16481
 polar snow, spectrophotometer for meas. of light in, 17072
 portable weather station for expedition use, 17067
 radar altimeters, lightweight, 16356
 radar, applications, 16480
 radar methods in, 17547
 rain and snow gauges compared, 17071
 raindrops, measurement of charge and size, disdrometer, 17073
 rainfall sampler, automatic sequential, 18086
 rain gauge catch deficiency, 15868
 rain gauge, tipping-bucket type, 17861
 remote sensing from satellites, applics., 17864
 research telemetry network, 16161
 satellite, advances, 17855
 satellite ground station, 17858
 satellite 'Meteosat', 18349
 satellites, Soviet, 16162
 snowfall measurement, 17869
 snowfall ratemeter, neutron moderation, 17352
 snowfall, remote radar measurement, 17070
 space sensors for, 18350
 telemetry survey, 16479
 weather radar data, computer generated graphic display, 16163

Meters

acoustic wattmeter, field type, 17279
 AC power, IC-oriented, 17143
 analogue and digital multimeters, comparison, 18175
 audio distortion factor, solid state, 17497
 automatic reading, progress, 18324
 avometers, digital panel, using IC, 17666
 of biological pressures, 17533
 for blind, digital, with audible balance indication, 17020
 blood parameters, conductometer, 18608
 calibration by computer, 18173
 capacitance, 18440, 18441
 capacitance, digital, 17670
 capacitance, MIS, 18710
 conductivity, miniature, 18699
 curvimeter for area meas., 17485
 decibel, direct scale, 16953
 densitometer, electronic, with linear scale, 15726
 density, evaluation, 17791
 digital high-speed, of phase shifts in

radio pulses, 16231
 digital LCR, 15941
 digital multimeter, 17580, 17662
 digital multimeter, battery-operated, instrument design using LSI, 17131
 digital multimeter, miniature plug-in system, 15671
 digital multimeters, survey, 18174
 digital panel, market, 17888
 dip, construction and calibration, 16826
 distance, electrooptical, comparative studies, 15794
 distance, micro-processor-controlled electronic, 17258
 distorted AC, digital r.m.s. and power meas., 16249
 dynamometer for testing aircraft tyres, wheels and brakes, 17320
 electrical, digital, 18695
 electrical measuring instruments, 16215
 electric, electronic, present potential, 18172
 electricity, reliability, 18425
 electricity, survey, 17657
 electricity, working life, 15679
 electrochemical surface area, 16947
 electronic watt-hour, 16254
 exposure, electronic, for photography, 16862
 field-effect transistor meas., 16533
 frequency, capacitor, with linear conversion function, 15944
 frequency, high-speed microelectronic digital, 15691
 frequency, indicating, for low rated frequencies, 16264
 frequency, transistor, for meas. thickness and growth rate of films, 15799
 granulometer, laser, 17971
 gravimeter, stabilized laser, 17566
 gurometer for checking twist drill geometry, 16706
 hallotron apparent power, with peak rectifier, 16250
 heart-rate, digital, 15864
 inductive watt-hour, use, 17658
 infrared laser output power, 16566
 intensity-ratio, digital, 16223
 kVAh, connecting methods, and possible errors, 16821
 kWh, automatic tester for, 17146
 light, integrating, 17699
 light velocity, 16297
 moisture, automatic, 17972
 moisture, dielectric meas., based on parametric modulation cct., 17456
 multi-, electronic, 18697
 multimeter, digital, market survey, 17578
 multimeter, digital, purchase guide, 18696
 multimeter, digital, review, 17579
 multimeter, electronic, 17576
 multimeter, electronic, with analogue indication, 18698
 multi-, Normameter D, 16206

multirange, guidelines for choice, 16807
 noise, 18715
 ohm, low-value linear, 17138
 ohmmeter error reduction, 16526
 ohmmeter, linear scale, 17669
 ohmmeter, standard for checking, 16525
 ohmmeter, transistorized linear scale, 16239
 oscilloscope capacitance, 17929
 period, digital, 17157
 personal noise exposure, performance evaluation, 17016
 phase, broadband, 18713
 phase-difference, high-precision, 18712
 phase, digital, for meas. instantaneous value of phase shift, 15708
 phase-frequency response, 15947
 pH, design, 18255
 pH, standard reference electrodes, 15741
 pH, transistor, 18781
 photographic flashmeter, 16863
 polyphase, 16251
 power, metering techniques, 16822, 17002
 raindrops, charge and size meas., disdrometer, 17073
 ratiometer, electrostatic, 16225
 signal-characteristic, 15946
 snowfall rate, neutron moderation, 17352
 sound level, 18837
 sound level, impulse, 17808, 18551
 sound level, microphones for, 15809
 speedometer checking device, 17486
 static energy, 17145
 stochastic, simulation and meas. instrument, 16195
 strain, iodine stabilized laser, 17810
 stray magnetic field induction, 17605
 tariff, effect of waveshape distortions on meas. of energy, 15942
 telecommunication system, 17149
 tensiometer for cable, 17833
 tensiometer for testing relay springs, 17291
 testing of, computer-controlled, 17921
 thermesthesiometer for burn hazard meas., 17015
 time interval, digital, 18192
 torque, contactless, 17496
 for vibration analysis, 18290
 volt-ohm, operation and calibration, 15937
 volume, pneumometric, 17472
 vortex, 17466
 watthour, consumer-metering techniques, 16248
 watthour, electronic, 18183
 watthour, standards, 16252
 watthour, testing, 16253
 wattmeter, digital, 18182
 wattmeter, digital, using sampling method, 17590
 wattmeter, multimode SHF, 17591
 for weak AC meas., 17132
 wideband electromagnetic field strength, 18721

Metrication

gravimetry, SI units in, 17565
 SI units, general aspects, 17370
 spelling of metric terms, 17889
 and standards, 17375

Metrology

accuracy improvements in metrology of length, mass and time, 16198
 developments, 17883
 dynamic, concepts and definitions, 17898
 electrical power and energy, present state, 18322
 electric and electronic, 18692
 estimating results of measurements, 16501
 examination of technical tasks related to meas. equipment, 18137
 in Japan, survey, 17633
 of laser parameters, 17890
 microwaves in, 16775
 numerical processing of results, improper problems, 17378
 precision of results from meas., algorithm for determining influence of external factors, 16199
 progress in, 17091
 in science and technology, 17090
 standardization, 18387
 standard specification, 16500
 USSR school course, 17885

Micrometers

for circular divisions testing, 18539

Microphones

in sound level meters, 15809

Microscopes

accessories, Reichert UnivaR concept, 16507
 acoustic, scanning version, 15905
 autocollimation, for size monitoring, 18537
 Axiomat, new concept, 15647
 computer controlled scanning optical, 17390
 contact, hand-held, for medical examinations, 18071
 double-beam interference, errors in coating thickness meas., 16664
 field-emission, pump oil pressure meas., 18866
 field ion, unusual image features at 4.2 K, 15648
 fluorescence, and applics., 17109
 for hematology and cytology, 18336
 high-temperature, based on cathetometer, 16792
 laser Doppler, 16647
 laser projection, 17101
 modulation contrast, 18144, 18398
 nonlinear, using second harmonic generation, 17899
 optical system, 15899
 photoelectric for automatic meas. of machine tool carriage displacement, 18314
 with photoelectric indicator, 16506
 scanning acoustic, 17900
 stereo-, optical operation, 18399

in vacuum or under pressure, 17389
 X-ray scanning pinhole, 17400
 zoom macroscope for radioactive nuclear materials, 17450

Microscopy

acoustic, review, 16510
 field ion, at elevated temps., 17214
 high temperature, use in quality control, 16708
 historical survey, 17388
 holographic, 17401
 holographic, image improvement, 17644
 imaging accuracy, 18145
 ion, atom-probe field, developments, 16888
 Micro '74 exhibition and symposia, 17100
 micro-videomat in medical research, 18334
 refractive index determ. with error of ± 0.00001 , 18752
 texture analysis system, 16688
 transmission, image formation in, 17387
 visual, optimal magnification, 15900
 in vivo by NMR, 18880
 X-ray diffraction, video display technique, 16591
 X-ray holographic, 17110

Microwaves

cavity, single-ended, bridge method for simultaneous meas. of coupling coeff. and loaded Q, 15702
 Doppler-effect flow monitor, 18272
 Doppler flowmeter, 17775
 dosimetry, 17018
 dosimetry using electrochemical effects, 16228
 effect measurement, d.c. to 40 GHz, 15693
 holography by spherical scanning, 15913
 impedance matcher for waveguide and coaxial systems, 15705
 intrusion detectors, selection criteria, 17306
 measurement technology applic., 16775
 moisture content meas. instrumentation, 16315
 moisture content of sheet materials, surface-wave meas. method, 16314
 moisture gauge, attenuation-based, for sheet materials, 16903
 particle volumes and densities meas. instrument, 16378
 phase detector, portable, 18189
 phase measurement system, 16825
 power, continuous monitor of dangerous levels, 17017
 pressure/temperature sensor, performance in liquid sodium, 17831
 radiation detection using Josephson effect, 17878
 radioastronomy applics., 17881
 radiometry and applics., 18351
 signal sources for extended meas. capability, 15706

solar interferometer, 35 GHz, 17572
 spectrometer, 17735
 spectrometer, discharge emission, computer-controlled, 18492
 spectrometer, microwave discharge emission, computer-controlled, for elemental microanalysis, 16878
 spectrometer system, computer controlled, 17734
 spectrometry, source modulated, 16879
 spectroscopy, absolute limit of sensitivity, 16880
 spectroscopy, chemical analysis applic., 17963
 spectroscopy, for air pollution control, 17033
 steel industry, non-contact meas., 16431
 surface cracks detection in steel applic., 16409
 thermocouple temperature meas., 18736
 thickness gauge, 16358
 transient nutation and infrared-microwave double resonance spectroscopy, 17747
 vehicle identification system, automatic, 15838
 Zeeman spectrometer, 18775

Minerals

ore processing, 3-electrode pH system, 17969
 superconducting airborne detection system, 18084
 X-ray fluorescence spectrometer for analysis, 15998

Mines

china clay production, level detection and control, 17827
 coal, remote sensing for thermal activity, 17000
 explosive-gas analyzer, portable interferometer, 18050

Mirrors

dielectric, reflectometer for reflectivity meas., 15722
 flatness, automated testing, image assessment, 18404
 focal length meas., 18381
 laser, measurement of optical absorptivity in, 16573
 surface flatness meas. by laser beam, 17711

Moisture

attenuation-based microwave gauge for sheet materials, 16903
 automatic meter, 17972
 capacitive detector, 15978
 convective drying meas. apparatus, 15954
 dielectric measuring meters based on parametric modulation cct., 17456
 loose material on belt conveyor, continuous meas., 18782
 low water contents in water-soluble powders, calorimetric meas. method, 15774

measurement, review of instruments, 18257
 metering of bulk goods dried in steady-state air stream, 18591
 microwave instrumentation for content meas., 16315
 non-contact measurement by radio-activity, 18024
 sheet materials, surface-wave method for meas. content, 16314
 snow sample wetness, electronic meas., 17871
 thick film sensors, 16902

Monitoring

aircraft displays, 18688
 air particulate, 18364
 air pollution from industrial plant, 16996
 air pollution, infrared detectors, 17551
 air pollution monitors based on chemiluminescence, 17345
 air pollution, network parameters, 17340
 air pollution, system, 17343
 airport noise, digital automatic system, 17867
 air quality measurement, 18363
 air sampler, continuous sequential for environmental studies, 16739
 ambient air, automated stations, 17029
 atmospheric particulate mass, with beta radiation detector, 15877
 breathing failure detection by radar, 16452
 of cardiac output, 17332
 car engine combustion efficiency, 17007
 combustible gas detectors, 17452
 of combustion gases in utility boilers, 17317
 combustion in IC engines, 18327
 community noise, by tethered balloon, 18634
 deposited thin-film thickness, temp. control of quartz crystals, 15798
 disc recording, by acceleration meas., 15667
 displays, seven-segment, continuous monitor, 15926
 drills, geometric parameters for, instruments for, 16705
 electrode rotation rate, 15985
 environmental, of plutonium, 16463
 environmental radiation, with TLD systems, performance criteria, 16464
 fast neutron radiotherapy systems, 16146
 fatigue-crack growth by acoustic emission techniques, 16092
 fatigue crack growth, methods, 17508
 fetal, use of computers, 17542
 haemodialysis, pressure monitor isolating devices, 16155
 ink resistivity, temperature compensation, 16233
 liquid levels in steam boilers and tanks, apparatus, 17245

machine wear, 18315
 magnetographic, of outer surface of tubular blanks, 16691
 in manufacturing industry with recording, power saving, 16997
 microwave power, continuous monitor of dangerous levels, 17017
 movement, remote on-line, optical instrument for, 16949
 neutron, detectors and nuclear instrumentation, 16913
 noise, community, automated instrument, 17809
 nuclear power plants, activity-meas. unit in ventilation stack, 16441
 offshore environment, 16482
 oxygen saturation, for extra-corporal circulation applics., 15865
 particulate emissions, 18361
 patient, digital system, 17327
 patient, rational and economical use of equipment, 18332
 patients, trends, 17326
 physicochemical parameters of media, 15740
 plant deterioration, 18858
 pollution, air and water, trends, 17030
 pollution, electronic equip., 16737
 radiological environmental, 16462
 relative position of holes with intersecting and crossing areas, 15792
 satellite, of Europe, 18622
 size, autocollimation microscope, 18537
 slip in asynchronous electric motors, 18584
 strain-gauge bridge, versatile rosette, 16079
 temperature and humidity, 18731
 temperature, in nuclear power stations, 16123
 thickness, by position annihilation, 17794
 thickness, of insulating parts and coatings, apparatus, 17795
 ultraviolet irradiance, low levels, radiometer, 16187
 voltage, excursions outside set limits, detection circuit, 18706
 of X-radiometric and dosimetric devices during meas., 17448

Monochromators

X-ray spectrometer, 15997

Motors: electric

AC, torque meas. instrument for, 17803
 asynchronous, contactless monitoring of slip, device, 18584
 d.c., pulse-width-modulated speed control, 15696
 inductance measurement using operational amplifier integrator, 16256
 shaft systems, slip angles meas., 16369
 temperature detectors, specification criteria, 16433

Movement

- conversion into pulse code for digital programme control systems, direction sensing equipment, 16375
- eye, recorder, 17336
- liquids, mobility meas. in, optimization photocathode, 16642
- micro-organisms in chemical gradients, recorder, 16712
- monitoring, remote on-line, optical instrument for, 16949
- Mossbauer spectrometer motion control system based on integrated microcircuits, 16000
- ship's translational motion meas., dynamic characteristics of inertial instrument, 16129
- solar image motion meas., 18653

Noise: acoustical

- airport monitoring system, 17867
- blind, digital meter for, with audible balance indication, 17020
- cable conductors, audible test set, 16125
- community, automated monitoring instrument, 17809
- community, monitoring by tethered balloon, 18634
- control problems, applic. of dosimeter, 15808
- decibel meter, direct scale, 16953
- diagnostic tests for locating sources, 15811
- diesel engine, V-6, noise meas., 15824
- distortion factor meter, solid state, 17497
- dosimeters, 17278
- environmental, measurement in sub-freezing weather, 15869
- exterior sound level meas. procedure for powered mobile construction equipment, 15822
- impulse sound-level meter, 17808, 18551
- industrial studies, large scale, computer analysis and graphic display of sound pressure level data, 15823
- machinery, measurement standards and test codes, 15819
- machinery, narrowband analysis techniques for meas., 15821
- machinery, use of frequency analysis to identify sources, 15820
- measurement techniques, 17277
- meter inspection by low meas., 16382
- meters, 18837
- microphones in sound level meters, 15809
- personal exposure meters, performance evaluation, 17016
- pollution level instrument, 15810
- pollution measurement and legislation, 16677
- pyroelectric detectors, microphonically balanced, 16557
- sound power meas., automatic, 17805
- sound velocity meas. using phase

- detection of optical beat, 17807
- vehicle, off-road construction, meas. and characterization, 15826
- vehicle, test of proposed meas. method, 15825
- vibration pollution meas. study, 16468
- visualization of sound using scanning and holographic methods, 16952
- wind velometer, sonic, 17348

Noise: electrical

- electronic measuring equipment, 17918
- low, measurement techniques, 17673
- meter, 18715
- in position-sensitive detectors, 16366
- thermometry, low noise amplifier, 16284

Non-destructive testing

- adhesion fault detection by holography, 17302
- ASD-P interference, 18303
- betatron electron internal-flaw detector, 17510
- buckling, force/stiffness technique, 16100
- cement content in soil mixtures and concrete, detmn., 16427
- of ceramics, review of methods, 16979
- complex permittivity meas. method, 17596
- cylindrical bodies, ferromagnetic transducers for, 16693
- computer-aided, 18850
- diffractographic technique and applics., 17511
- elemental analysis using X-ray and neutron techniques, 16325
- fatigue crack detection, 18039
- fatigue crack length meas. by various methods, 16407
- fault detection in laminar objects, optoelectronic method, 16422
- fracture investigation, 18577
- glossary of terms, 18851
- leaks, vacuum bubbler for, 16982
- magnetic and electromagnetic methods, 18578
- nonmagnetic metals, use of NMR for meas. of residual lattice strain, 16399
- magnetic particle and dye penetrant methods, 18045
- magnetographic monitoring of outer surface of tubular blanks, 16691
- nuclear pressure vessels, review, 17318
- of pipes, electromagnetic flaw detector, 16694
- silver-copper alloy coins, use of specific heat, 18791
- sintered iron parts, complex investigation of densification, 15817
- surface cracks detection in steel by microwaves, 16409
- X-ray flaw detectors, TV high-energy, 18302

Non-destructive testing: acoustic emission

- detection system, 17305

- fatigue-crack growth monitoring, 16092
- industrial applic., 17303
- introduction, 18575
- pressure vessels testing, 17824
- strain-hardening phenomena studies, 16097
- techniques and methods for improving SNR, 17815
- of welds, Al-Cu, 16413
- of wire rope, 16690

Non-destructive testing: eddy current

- electrical resistivity, contactless meas., 15938
- electromagnetic inspection, threshold device, 16418
- of materials, 17300
- principle and instruments, 18044
- steel sheet thickness gauge, 18286
- variable-frequency method, 16980

Non-destructive testing: infrared

- of electrical fuel pin simulators used in LMFBF thermal hydraulic tests, 16439
- HV apparatus, temp. meas. by thermovision, 17689
- of materials and components, 16977
- military applications, 16681
- polymers, stresses in, thermal radiation recording, 16396
- of tyres, 17513

Non-destructive testing: radiographic

- defectoscopy, X-ray, detmn. of exposure time in photographic method, 16685
- depth of location of defects detmn., 16419
- dynamic technique using thermal neutrons, 18852
- flaw detection method, 18304
- steel articles, use of compact betatron, 16689

Non-destructive testing: ultrasonic

- attenuation factor in objects with coarsely machined surfaces, meas., 16687
- blood flowmeter, 18339
- blood flowmeter, pulsed Doppler, real-time velocity profiles, 18075
- of bonded materials, 16984
- boreholes, measurement and inspection in, 17355
- carotid artery wall parameters meas., 17846
- catheter-tip probe for blood flow velocity meas., 18077
- cold rolling mills, inspection of working rolls, 16110
- data display for, interactive, 17422
- in diagnostic medicine, 18883
- direct visualisation, 16408
- fault-finding, possible errors, 16388
- flaw detection in metal pipe, machine, 16417
- flaw detector, automatic sensitivity adjustment, 16416
- flaw detector, sensitivity balancing, 16684

flow measurement, 18265
 flow measurement system, random-signal, 17785
 flowmeter, frequency modulated Doppler, 17764
 flowmeters, 17995, 17996
 flowmeter, ultrasonic correlation, 17767
 with frequency analysis, 18579
 hardness of materials, detmn., 17516
 for level and flow, 17773
 liquid flow meas. applic., 17997
 loading transducers, acoustic bulk waves, 16099
 of materials, review, 18576
 materials testing equipment, 17299
 medical, calibration in, 17839
 medical diagnosis applic., 17012
 of metallic materials, 17304
 methods, 17512
 non-planar surfaces, flaw detection in materials or structures, 16987
 portable flaw detector, 16411
 powder defectoscopy, red magnetic paste, 16420
 pressure vessel in nuclear reactor, 18055
 pulse-echo system, computer-processed, 16098
 pulse-type thickness gauge, 16940
 for quality control, 16981
 of reactor components for cracks under cladding, 16440
 signal processing concepts for meas. thickness of thin layers, 16359
 spectrometer, transmission oscillator ultrasonic, 16978
 spectroscopy, 18499
 steel hardness, 18299
 in steel industry, 17525
 of steel plates, 18317
 steel products at 1000°C, 16429
 surface topography, spectroscopic detmn., 16991
 survey, 18849
 thickness gauge, operation, 16666
 tissues, acoustic differentiation by quantitative echography, 17842
 tube inspection, rotation method, 16412
 of tubes, effect of scanning speed and spacing on reliability of results, 16692
 tube thickness by electromagnetic-acoustic pulse method, 16663
 viscoelastic constants of plates of composite material, meas., 16403
 wall thickness measurement, 17261
 in water and steel, 17814
 weld scanning method, 16410

Nuclear

analysis, industrial applics., 16994
 atomic masses, precise detmn., 16327
 diagnostic instrumentation, future trends, 16719
 heat capacity meas. of materials by laser flash method, 16563
 instrumentation, trends, 17216
 magnetic resonance measurements on cellulosic materials, sealable sample holder with internal

reference, 15770
 magnetic resonance relaxation times meas., pulse train technique, 15771
 magnetometer, free precession, using optically polarized He³ gas, 17065
 measurement standards, 17830
 medical measurement data system, 15846
 medicine organ image transmission, 18070
 NMR measurement, pressure-resisting glass cell, 16600
 NMR spectrometry, literature review, 17215
 physics methods in biology, 18877
 power station, qualification of instruments, 17828
 power stations, temperature monitoring, 15830
 pulsed NMR thermometer for use below 100 mK, 16286
 ratemeter, autoranging digital, 18260
 shipboard Z-magnetometer, nuclear-precession, 16485

Nuclear detectors

air showers, time analyzers for nanosecond range, 17158
 alpha active aerosols, long lived, raising sensitivity of meas. concentrations, 16330
 avalanche diodes, 16328
 back-scattered gamma-rays, industrial meas. by, 17312
 bubble chamber, 18514
 cadmium telluride, 18511
 cement content in soil mixtures and concrete, detmn., 16427
 Cherenkov lead-glass, for electrons and photons, 16633
 dead-time calibrator, 16914
 diamond, 16626, 18510
 for environmental pollution monitoring, 17342
 fast neutron fluxes by flow-type manganese bath method, 16025
 fast test reactor, adequacy of LLFM detector for IKRD applic., 15832
 fission fragment counters, 18261
 gamma-ray densitometer for pulmonary function investigation, 18610
 gamma-ray imaging system, sensitivity measurement, 16201
 gauge design approach, 17217
 Geiger counters, 18508
 Geiger-Muller counters, three-electrode, with controllable sensitivity, 16013
 germanium, high-purity, 16022
 halide Geiger-Muller counters, 18509
 hard beta- and gamma-emitting radionuclides in biological samples, 15853
 indicator, 16625
 of intrinsic germanium, 16026
 for ions and metastable atoms, 18763
 liquid scintillation counters, 17975
 magnetic monopole, 15780
 in medicine, diagnostic counting techniques, 16720

mixed gamma-neutron fields, instrument for meas. absorbed dose of fast neutrons and gamma-radiation, 16024
 Mossbauer effect, X-ray tube for investigation, 16622
 multiwire proportional counter, 16912
 needle chamber, 16302
 neutron activation analysis, 18793
 neutron, for photoreaction studies, 15776
 neutron, moderator using helium counter, 16018
 for neutron monitoring, 16913
 neutron time-of-flight spectrometer, 16019
 n-type cadmium telluride surface-barrier, 16911
 plastic scintillators, image intensifier for, 16200
 p-n junction cuprous oxide, for gamma-rays, 18515
 position measurement with drift chambers and proportional chambers, 16365
 position-sensitive, signal, noise and resolution, 16366
 position, two-dimensional, for high-energy expts., 17793
 protein crystallography, multiwire proportional chamber as area detector, 16615
 radionuclide detectors in vivo, radiotelemetrical detector unit, 16723
 recording by rectifier photocells, 17221
 review, 17218
 scintillation counters, historical survey, 18794
 scintillation counters, near-infrared and ultraviolet gas-proportional, 16329
 scintillation, with NaI(Tl) or CsI(Na) crystals, and photo-multipliers, 16015
 scintillation, with semiconductor Si photodiodes having p-i-n structure, 16016
 semiconductor, 18796
 semiconductor, in nuclear medicine, 15855
 silicon, irradiated with 0.5–1.5 MeV electrons, multiplication phenomenon, 16023
 Si(Li), long-time behaviour, 16629
 snowfall ratemeter, neutron moderation, 17352
 solid-state track of celluloid films, threshold for alpha-particles, 15778
 spectrometer, double-scintillator time-of-flight, 17199
 stratospheric Aitken nuclei counter, 18900
 for synchronous satellite, 18905
 thin-films, digital tracer scanner for studies of longitudinal self-diffusion, 16040
 track, based on transition radiation, 16910

track discrimination of low-energy nuclei in plastics, 15777
 transition radiator-detector system, 16326
 XTR, investigation on basis of energy deposition, 15779

Nuclear particles

alpha spectrometry, high resolution, 16635
 medical applications, 18600
 positron thickness monitoring, 17794
 thermal neutron flux density standard, 16638

Nuclear radiation

dose rate-measurement indicators in controlled areas, 17028
 gamma, liquid metal density meas. applic., 17246
 gamma-ray astronomy, tagged gamma-ray beam for calibration of instruments, 16765
 Mossbauer effect, X-ray tube for investigation, 16622
 nucleonics, literature review, 17222
 plutonium, environmental monitoring, 16463
 pressure vessels, review of non-destructive testing, 17318
 ventilation stack of power plants, activity-meas. unit, 16441

Nuclear reactors

boiling water, critical detmns., 15836
 boiling water, spent fuels, non-destructive gamma-ray spectrometry, 18864
 cladding burst detection equipment, 18057
 core component surveillance, applic. of pattern recognition, 16438
 core configuration, effect of variations on accuracy of reactivity meas., 15834
 cores, bowed, computer program for analyzing, 15835
 cracks under cladding, ultrasonic testing, 16440
 failed fuel detection, fluidic system, 16702
 fast test, adequacy of LLFM detector for IKRD applic., 15832
 gas-cooled, temperature fluctuations meas., 18325
 high-flux, temp. meas. using thermocouples, 18056
 high temperature, meas. systems for, 18861
 high temperature, post-irradiation microanalysis of particles, 16119
 in-pile, comparison of chemical dosimeters, 16703
 instrumentation survey, 18054
 instrument automation, state of the art, 17829
 LMFBR, simulated, critical life study, 15833
 LMFBR thermal hydraulic tests, infrared NDT of electrical fuel pin simulators, 16439
 neutron monitoring, detectors and

nuclear instrumentation, 16913
 Ocone monitor for loose parts in system, 15831
 off-gas treatment systems instrumentation, 18862
 power, measurement, 18859
 power stations, temp. recording, 16123
 pressure vessels, in-service inspection programme, 16118
 pressure vessels, NDT technique based on stress wave emission analysis, 17824
 pressure vessels, prestressed concrete, instrumentation for use in, 16117
 pressure vessel, ultrasonic testing, 18055
 pressurized water test loop, 16122
 PWR, control rods position meas., 16120
 radioactive effluents detmn., 17001
 radioactive gas meas. in ducts with scintillation detector, 18863
 sites, natural background radiation near, ionization chamber meas., 16011
 with sodium cooling, measuring devices, 18860
 steel, heavy-section, fracture toughness and investigations, 15841
 tribology for atomic and space industries, 17009
 vibration instrumentation, 16442
 vibration measurement in severe environments, 16380

Oceanography

acoustic measurement, shipborne system, 18640
 buoy for measurement, 17560
 current mapping via synthetic aperture radar methods, 17042
 colour measurement by satellite, 17044
 current measurement, new approaches, 18639
 current meter, retrievable bottom-mounted, 17043
 current meters in shallow water, comparison, 17561
 data collection, 18637
 developments, 17038
 electrical field in ocean, meas., 17350
 gravity, shipboard meas., 16172
 hydrometric field instruments, factors affecting reliability of, 16778
 instrumentation developments, 18369
 marine seismic system, 17060
 mixing study with dyes and multi-spectral photogrammetry, 17041
 multichannel forward scattering meter, 16178
 offshore environment, monitoring, 16482
 particle concentrations in deep sea, integrating nephelometer for meas., 18085
 radar geomorphology of coastal and

wetland environments, 17036
 remote sensing, results, 16727
 remote sensor image contrast, 17040
 salinometer, 18892
 sea floor, electric field recording with short span instruments, 18374
 sea state measurement by RF interferometry, 18371
 sea water luminescence study with spectrofluorometer, 18638
 shoreline geology, definition by remote sensing, 17058
 surface currents, HF radio meas., 18373
 surface wind velocity, remote meas., 17068
 temperature and pressure recorder, moored, 16179
 tidal streams, velocity distribution meas., 18893
 tide gauge, solid-state digital, 18372
 tropical beach, methods for delimiting mean high water position, 17039
 water quality investigations using aerial and satellite photography, 17037

Oil

films on water, infrared monitoring instrument, 18890
 flowmeter, domestic, 16646
 flowmeter, oil displacement, 17232
 jet engine, analysis by atomic absorption spectrometry, 16704
 manometer, automated positive pressure, 15788
 metering with electronic control, 15842
 North Sea, metering, 18588
 North Sea, position fixing for, 17045
 pollution, fluorescence monitoring technique, 18368
 pump, field emission microscope in pressure meas., 18866
 refinery control loops service factors, 17823
 search by new seismic technique, 18889
 slicks, detecting and monitoring with aerial photos, 17046, 17559
 wells, pressure meas. devices, 17319

Optical

birefringence measurement, HF polarization modulation method, 18232
 coherence meas. using holographic techniques, 18478
 composite films, nondestructive optical thickness detmn., 16061
 deformation meas. techniques, 17504
 densitometer, electronic, with linear scale, 15726
 dictionary, English-German, 16193, 17621
 displacements, detection of amplitude and phase, 16372
 dosimetry, high radiation dose, 16027
 flow velocity meas. technique, 18809

gas-concentration measurement by coherent Raman anti-Stokes scattering, 17248
 German-English technical dictionary, 17640
 heterodyne method for vibration amplitudes meas. using narrow-band filter, 16674
 MTF analyzer, 12" aperture folded, 18754
 radiation scales, 18729
 rotation HF polarization modulation method, 18224
 spectroscopy, developments, 17194
 strain measurement techniques, 17498
 stress measurement with interactive data viewing unit, 16392
 surface roughness detmn. using speckle correlation technique, 18483
 test methods in production, practical aspects, 18481
 testing method, bibliography, 18746
 thermal optics, developments, 18220

Optical components

mounting of, 17095
 parallelism and prism angle checking, interferometric method, 16570

Optical instruments

anomaloscope, interference filter, 16725
 dictionary, English-German, 16193
 distance measurement, two-wavelength, results of field testing, 17256
 exposure meter, electronic, for photography, 16862
 eye lens geometry changes meas., dynamic optometer, 16152
 German-English technical dictionary, 17640
 heterodyne arrangements with two-frequency radiation source for mechanical vibration meas., 16673
 liquids, Kerr constant meas. unit, 15735
 movement, remoted on-line monitoring of, 16949
 nephelometer, laser polar, 18898
 polarization in, detmn., 17713
 potentiometer, 17587
 production testing instrument, 18480
 pyrometers, 18205, 18206, 18207
 pyrometers with disappearing filament, 17163
 thermal detectors of optical radiation, 17187

Optical properties

depth-of-field calculator for TV camera, 17951
 modulation transfer functions of several objectives, meas., 16294

Optical systems

afocal, MTF evaluation, 18229
 communication, use of phototransistor, 18475
 for concave parabola production,

16858
 for interferometry at sub-mm wavelengths, 16864
 measurement process in, 16857
 of stellar photoelectric spectrometer, 17086

Oscillators

in intruder detector, 17819
 single-frequency test, 16263

Oscillographs

wide-based pen-writing, design, 15645

Oscilloscopes

amplifier, broadband, for nanosecond range, 15896
 capacitance meter, 17929
 decibel meas., 18716
 digital storage, 18685
 industrial applications, 17518
 market review, 17371
 with microprocessor and LED display, 18418
 100 MHz double beam, 18666
 philosophy, design and operation, 18665
 portable, 18136
 probes for, in electrical measurements, 15683
 pulse amplitude and shape, automatic attenuator for recording, 15646

Oxygen

anaerobic stopped-flow spectrophotometer, 16299
 dissolved, meas. in water quality control, 15882
 saturation monitor for extra-corporeal circulation applics., 15865

Paper

industry, environmental monitoring, 18052
 mills, flowmeter to prevent wastage and eliminate cleaning, 15781
 polystyrene, ultraviolet detmn., 16707

Particles

airborne, diameters, 18625
 betatron electron internal-flaw detector, 17510
 betatron, 45 MeV, dosimetry, 16020
 colloidal, delta particles meas. device, 16617
 concentrations in deep sea, integrating nephelometer for meas., 18085
 cyclotron and synchro-cyclotron beat frequency detector, 15945
 exoelectron and photoelectron detection, efficiency of open ionization counters, 16014
 fluid velocity meas. by particle tracking, 17984
 granulometer, laser, 17971
 holographic sizing techniques, 17223
 interplanetary low-energy, energy and charge meas. instrument, 16487

neutral, beam meas., thin film thermopile, 16637
 in polluted air, sizing, 17554
 powder flow rate meas., 17229
 power materials, conductometric instrument for size meas., 18506
 size analysis, 17761
 size analysis, calibration material, 16319
 size analyzer, on-line, 16621
 size analysis, on-line meas. method, 18259
 size analysis, rapid response instrumentation, review, 17454
 size and size distribution, on-stream meas., 17970
 size determination by beta-ray absorption, 16318
 solar, propagation through interplanetary medium, multi-spacecraft meas., 16767
 two-phase flow, size and velocity detmn., holograph method, 16904
 volumes and densities meas., microwave instrument, 16378

pH

in flowing liquids, meas. device, 16915
 measurement, effluent treatment applic., 18780
 meter, design, 18255
 3-electrode system, 17969
 system with three electrodes, 18505
 transistor meters, 18781

Phase

broadband meter, 18713
 fluorometer, 17718, 18760
 frequency-response meter, 15947
 high-precision phase-difference meter, 18712
 initial, measurement apparatus operating at frequencies of 1–100 MHz, 15707
 linear displacements meas. methods based on acoustical modulation of light, 18283
 microwave measurement system, 16825
 phosphorimetry, phase resolved, 17447
 polyphase meters, 16251
 portable microwave detector, 18189
 radiogeodetic system, electro-mechanical meter for, 16730
 shift, instantaneous value of, digital phasemeter for meas., 15708
 shifts in radio pulses, high-speed digital meter, 16231
 sound velocity meas. using phase detection of optical beat, 17807

Phosphors

phase resolved phosphorimetry, 17447

Photodetectors

applications, 15961
 germanium avalanche, 16624
 linearity of, measurements, 16861
 open ionization counters, estimating

efficiency, 16014
 for optical communications, 18474
 performance and limitations, 18218
 photoelectric switches role in steel industry, 15840
 photoelectric switches, shift from detection to discrimination, 15732
 Schottky-barrier, with optical channel waveguide, 18756
 semiconductor, 16293, 17630
 with single-junction transistor, 17703
 solid-state, in pulse radiolysis studies, 16623
 velocity measurement by self-tracking correlator, 16671
 for weak light signals, 17623

Photogrammetry

area measurement by curvimeter, 17485
 close-range mensuration techniques, 17050
 colour analysis techniques, 17708
 convergent photography for, accuracy, 17052
 errors in, 16728
 hologrammetry, concepts and applications, 18083
 multispectral, study of oceanic mixing with dyes, 17041
 overlapping photographs, 17849
 scanning electron microscope imagery, treatment, 16788
 snow depth measurement, 17548
 terrain recognition in ERTS-1 imagery by diffraction pattern analysis, 17048
 tropical beach, method for delimiting mean high water position, 17039

Photography

arc discharge temperature detmn. by high-speed filming, 16273
 cine camera, high-speed, for dynamic studies of mechanical systems in meas. instruments, 17270
 colour densitometry, review, 16576
 convergent, for photogrammetry, accuracy, 17052
 emulsion for recording three-dimensional holograms, 15662
 FRTS-1 satellite and sensors, 17571
 exposive meter, electronic, 16862
 flashmeter, 16863
 high-speed event recording by multi-pulse laser, 15665
 lenses and materials, design review, 16492
 lenses, evaluation criteria, 18230
 lenses MTF routines for assessment, 18482
 oil slicks, detecting and monitoring with aerial photography, 17046, 17559
 precision stereoplotter, 17408
 silver halide emulsion, latent image formation, 15654
 solid waste and remote sensing, 15885
 speckle, displacement and strain meas. applic., 16067
 speckle, in-plane strain meas., use

of Young's fringes, 16082
 strain measurement during thermal fatigue tests, 16965
 tidal rivers, biodegradable pollution monitoring, use of near-IR photography, 17047
 water quality investigations, aerial and satellite photography, 17037
 X-ray defectoscopy, exposure time detmn., 16685
 zoom lenses, image quality, 16504

Photometers

computer controlled, 17365
 for counting photons, 16017
 high-precision differential, 15724
 integrating nephelometer for meas. of particle concentrations in deep sea, 18085
 multichannel, for chemical analysis, 16869
 photoelectric, double beam, for astronomical applics., 18378
 photoelectric, in atmospheric turbidity meas., 15871
 recording, based on electrodeless spectral tubes, 17704
 sky, for 48-inch Schmidt telescope, 18646
 spectral reflectance meas. of rocks and soils, 17055
 thermoluminescent automatic, 17706

Photometry

absolute photon-flux meas. in vacuum ultraviolet, 15971
 automatic system for luminous intensity distribution and luminous flux of lighting fixtures, 16295
 brightness, definition and meas. problems, 16574
 development of, review, 18755
 discharge lamps meas. method, 18477
 Faraday rotation, photoelectric detection system, 15973
 flame detector, 15742
 infrared multi-colour, 18103
 infrared spectra measurement by Fourier transform spectroscopy, meas., 17732
 isophotometric technique, 17705
 on LED product, 17622
 night vision devices, field test set for, 18308
 noise-immune channel operating in photon-counting mode for recording light fluxes, 15730
 principles for engineers, 17947
 sensors and applics., 15966
 solar, 18654
 state-of-the-art review, 17629, 18217
 telescope, automated, 18118
 units, use in specifications of optoelectronic devices, 18216

Phototubes

quadrant photosil autoguider for 17/24 inch Schmidt telescope, 18120
 testing, automatic CAMAC system, 16628

Piezoelectric

accelerometer, 18830
 accelerometers, design and development, 18542
 accelerometers, development and applic., 16672
 accelerometers, monolithic, 17489
 dynamometer, four-component, 17801
 effect detector, 16236
 Fabry-Perot interferometer, space research applic., 18651
 force, pressure and acceleration meas., 18829
 precision micro-positioning using acoustic surface wave variable delay lines, 16367
 pressure sensor for meas. behind shock front, 16046
 seismic detector, high sensitivity, 18635
 torsional mechanical damping meas. applic., 16973
 ultrasonic transducers, calibration, 16383
 Weissenberg rheogoniometer, torque and normal thrust meas. system, 16348

Pipelines

flow, vortex shedding meter, 17466
 North Sea oil metering, 18588
 position fixing for North Sea oil, 17045

Plastics

paper and polystyrene foam composites testing, 16077
 polymer monofilaments, detmn. of coeff. of friction, 16414
 polystyrene, ultraviolet detmn. in paper products, 16707
 product manufacture, meas., regulation and control, 18585
 strain gauge measurement, 16401
 superplastic materials testing apparatus, 16390
 track discrimination of low-energy nuclei, 15777

Pneumatic

instruments, Vumatik range, 15895

Polarimeters

airborne infrared, 18895
 computer-control, 17365
 photoelectric spectro-, with two-channel signal-storage system, 15970
 X-ray, for investigation of radiation from solar eruptions, 15893

Polarimetry

infrared multi-colour, 18103
 optical instruments, detmn. of polarization in, 17713

Polarization

instrumental, influence on solar magnetic field meas., 17357

Polarography

- molten salts, modified twin electrode system, 15979
- rapid, without removal of oxygen, 16001

Pollution

- alarm systems, 18357
- cement industry, control, review, 18873
- contaminants, application of internal reflection spectroscopy, 16490
- control in the EEC, 16158
- electronics for control and monitoring, 17549
- environmental probing, 16156
- industrial effluent, spectrochemical method for determination of 36 elements, 16738
- monitoring, electronic equipment, 16737
- monitoring, nuclear methods and instruments, 17342
- multielement analysis, energy-dispersive X-ray spectrometry, 16466
- oil, fluorescence monitoring technique, 18368
- pulp and paper industry, environmental monitoring, 18052
- radioactive aerosol control systems, 15879
- spectrometers, Stark-sweep microwave cavity, for pollutant monitoring, 16886
- tracers, sulphur isotopes as, 16157
- vegetation, toxic effects of metals on, detection from satellites, 16471

Pollution: air

- aerosol parameters monitoring, visibility meter, 18628
- atmospheric, correlation technique, 18896
- atmospheric fluoride monitors, comparison, 15878
- atmospheric particulates, combined sampling-analysis method for trace detmn., 16740
- automatic meas. network, 18356
- boiler flue gas dust content detmn., 16423
- Byron model 233A air quality analyzer, 18358
- calibration gas standards, 18894
- carbon disulphide detmn. by extraction-atomic absorption method, 18586
- car engine combustion efficiency monitor, 17007
- continuous sequential air sampler, 16739
- CO remote detection by parametric tunable laser, 16160
- correlation spectroscopy measurements, 16159
- dynamics, device for studying, 18627
- exhaust gas sensor, 17555
- gaseous pollutants meas., developments, 18365
- hydrogen sulphide detmn., impregnated paper tape methods, 16741

- industrial plant, monitoring, 16996
- infrared detectors and applic., 17551
- instrumental neutron activation analysis, 18899
- instrumentation, advances, 18624
- instrument evaluation rel. to sample variance, 18092
- lidar measurement, 18359
- meteorology, remote sensing for, 17865
- microwave spectroscopy for control, 17033
- monitoring, automated stations, 17029
- monitoring, developments, 18364
- monitoring methods, 18363
- monitoring network parameters, 17340
- monitoring system, 17343
- monitoring system, trends, 17030
- monitoring with tobacco plants, 17553
- monitors based on chemiluminescence, 17345
- nitric oxide sensing, 18897
- nitrogen dioxide, quantitative detmn. by Griess-Saltzman method, 16461
- noise, measurement and legislation, 16677
- oil films, infrared monitoring instrument, 18890
- optoacoustic detectors, 17034
- organic lead in street air, adsorption technique, 18093
- ozone, atmospheric distribution investigation, 15875
- particulate emissions monitoring, 18361
- particulates sizing, 17554
- programmable quadrupole mass spectrometer, 17210
- quality monitoring, 18623
- radioactive concentration measurement, 16460
- rain water studied by stable-isotope techniques, 17550
- remote detection using Raman lidar, 18626
- remote measurement, 18360
- review, 18362
- samples analysis, applic. of computerised gas chromatograph and quadrupole mass spectrometry, 17032
- sampling and analysis, 17031
- semiconductor gas detector for monitoring atmosphere, 17346
- by sound vibration, meas. study, 16468
- sulphur oxide emissions from cement works, 18319
- trace atmospheric gas analyzer, 17341
- in urban areas, appropriate monitoring sites selection, 17552
- X-ray spectrometer for meas., 17344

Pollution: water

- analysis with gas chromatography-mass spectrometry, 18096
- control, instrumentation for, 17557
- detection of pollutants by CO₂ laser,

17035

- fluorometer, remote sensing laser, 17866
- marine wastewater outfalls monitoring using ultraviolet absorbance, 18367
- monitoring systems, trends, 17030
- nuclear power plants, radioactive effluents detmn., 17001
- offshore environment, monitoring, 16482
- oil slicks, detecting and monitoring with aerial photography, 17046, 17559
- rivers, remote meas. of thermal pollution, 18366
- sensors and systems for, 17556
- sewage treatment plant automation, 17558
- surfaces, detection and meas., 18631
- telemetry system, 18095
- tidal rivers, biodegradable pollution monitoring, use of near-IR photography, 17047
- wastewater treatment systems, instrumentation control and automation, 18891

Porosity

- isothermal absorption method of meas. of pore size distribution, 15981
- laser beam method for meas., 17455
- rocks, air porosimeter calibration curve, 17354

Position

- control rods for PWR nuclear reactor, 16120
- co-ordinate measurement machines, review, 16933
- detectors, signal, noise and resolution in, 16366
- drift chambers and proportional chambers, 16365
- electro-optic transducer for meas. of large length changes in muscle, 16138
- FEM 3 and FEM 4 photoelectric instruments, 18227
- fixing for North Sea oil, 17045
- holes with intersecting and crossing axes, relative position meas., 15792
- machine wear monitoring, 18315
- measurement for electronic control equipment, cyclic codes, 16060
- precision micropositioning using acoustic surface wave variable delay lines, 16367
- recorder, digital, 18026
- sensing, air logic cct., 18540
- time-resolved meas., detectors, 16660
- train location detector, continuous type, with inductive lines, 18869
- two-dimensional, detectors for high energy expts., 17793
- vacuum chamber positioning mechanism, 16059
- X-Y co-ordinates, computer-controlled meas., 15793

Potential

- contact, at small surfaces, meas., 16238
- contact, difference, pendulum meas. device, 16224

Potentiometers

- air, relative humidity meas., 16620
- optical, 17587
- zero-based linearity, cost-effectiveness of, 17372

Power

- AC power meter, IC-oriented, 17143
- AC reactive, meas. transducer, 17661
- active and reactive energy meas. errors, 16230
- bolometer, thin film, for meas., 17592
- decibel measurement with oscilloscope, 18716
- digital AC power meas. using sampling method, 16818
- distorted AC, digital meas., 16249
- distribution, sonic vibration technique for rot detection in wood poles, 17004
- electrical, metrology present status, 18322
- electronic measurement equipment, 16820
- frequency wattmeters, calibrating at very low power factors, 16817
- hallotron apparent power meter with peak rectifier, 16250
- HV lines, opto-electronic electricity counter for, 16701
- inductive watt-hour meters, use, 17658
- kVAh, measurements, 16821
- kWh meters, automatic tester for, 17146
- manufacturing industry, monitoring with recording, power saving, 16997
- measurements on high frequency active power, AC/DC comparator, 16531
- metering techniques, 16822, 17002
- polyphase meters, 16251
- precision electrical energy meas., 17920
- signal generator for intermodulation and cross-modulation meas., 15698
- static energy meters, 17145
- tariff meters, effect of waveshape distortions on meas. of energy, 15942
- telemetry equipment for electrical energy meas., 17144
- UHV laboratory and test facilities, 16255
- UHV testing, 17147
- unit at 60 Hz, establishment by current comparator system, 17577
- watt-hour meter, electronic, 16254, 18183
- watt-hour meter testing, 16253
- watt-hour meters, standards, 16252
- wattmeter, digital, 18182

Power engineering

- AC arcs, total radiation meas. using infrared detector, 15828
- cable test and fault location van, 17524
- circuit-breaker arcs, diagnostic methods, 15829
- digital measurements equipment, 16819
- EHV substations, instrumentation and control, 18323
- high-power laboratories, 17517
- HV apparatus, temp. meas. by thermovision, 17689
- HV laboratory, 17522
- HV testing equipment, 16699
- lightning arresters, electrical meas., 16434
- networks, short cct. impedance meas., 16435
- nuclear, measurements, 18859
- transmission systems, EHV and UHV, current meas. methods, 18184
- turbogenerator rotor winding fault detection by recurrent surge method, 16432
- voltage regulation, series condenser for, capacitance meas., 16246

Power stations

- linear rectified mean values of voltage, fast meas., 16121
- nuclear, monitoring offshore environment, 16482
- nuclear, off-gas treatment system instrumentation, 18862
- nuclear, qualification of instruments, 17828
- nuclear, site surveys using airborne gamma ray spectrometers, 16437
- nuclear, temperature monitoring, 15830, 16123
- telemetry device for, 17832

Power supplies

- constant current for control instrumentation, 17922
- distribution network, harmonic analyzer, 16124
- harmonic analyzer, 16107
- overhead networks, 11 kV, fault current meas., 16700
- source resistance meas., 16528

Pressure

- compressibility measurement, simultaneous adiabatic and isothermal, data on argon to 13 kbar, 16656
- partial, double focusing mass spectrometer for meas., 17242
- sensitive crystal in Ocone monitor warning of loose parts in reactor, 15831
- solubilities of gases in aqueous solutions, automated constant pressure reactor for meas., 16607
- vessel in nuclear reactor, ultrasonic testing, 18055

Pressure gauges

- calibration, multiple coaxial wire, 16654
- ionization gauge, 16043
- Manganin wire, evaluation, 16928
- miniature, for low temperatures, 18516
- semiconductor, 17238
- UHV measurement, extractor gauge, 17477

Pressure measurement

- analogue readout in uniaxial stress apparatus, 16394
- automatic, 16924
- automatic apparatus, 17789
- barometer for low altitude, 18089
- biological, meter, 17533
- blood, automatic indirect, apparatus, 17330
- blood, by catheter insertion, 18607
- blood, infant, ultrasonic technique, 15863
- cable telemetry system, 18581
- calibration, real-time, of multiplexed systems, 17480
- differential, instruments, 18015
- digital meter for manual therapy, 16653
- elastomer flow point-pressure pickups, 16341
- in flames, 18011
- GaAs sensor, 18275
- haemodialysis, pressure monitor isolating devices, 16155
- high static, 16925
- hydrostatic, magnetostrictive ferrite sensors, 18815
- intracranial, 18614
- liquids and gases, accuracy, 18012
- low, review of research, 17237
- microwave sensor, performance in liquid sodium, 17831
- ocean, moored recorder, 16179
- in oil and gas wells, 17319
- osmometer, magnetic suspension, 16039
- partial, very low, improved method, 18017
- piezoelectric, 18829
- in process industries, 17821
- pulsating, instrument, 18816
- pump oil, field emission microscope, 18866
- stagnation, probe for supersonic and subsonic flows, 17234
- state-of-the-art survey, 18013
- static, in low-density flow, 16045
- surface, robust attachment to film balance, 15789
- surface static, distribution, 18536
- thin-film sensor, Cd_3As_2 , 18016
- torr vs. pascal as unit of meas., 17474
- vacuum, measurement through spectral analysis of Brownian motion, 18278
- vacuum, review, 17239
- vapour, dynamic Knudsen-effusion-torsion balance, 16927
- vapour, of organic compounds below 0.1 Torr, 16926

in vapour phase at high temps.,
18277
vapour pressure in liquids, 15787

Pressure transducers

absolute, 17478
as accelerometer, 16950
brain tissue properties, meas. in vivo,
18615
catheter-tip capacitance, 17844
digital, 17479
inductive, 17275
integrated, 18276
for medical applications, 15844
medical, IC, 17013
noninvasive pressure-pulse recorder,
15866
for physiological recording, 18606
piezoelectric meas. behind shock
front, 16046
review, 17641
semiconductor, 17238
shock tunnel, dynamic calibrator,
for in-place calibration, 16128
small pressure differentials meas.,
pickup based on silicon strain-
gauge resistors, 16044
strain gauge, 17499
surface tension measurement by
differential maximum bubble
pressure method, 16658
transfer manometer and other
instruments, 18014

Printing

lithography, X-ray, 16105

Process control

china clay production, level detec-
tion and control in, 17827
fermentation plant, 17529
instrumentation review, 17521
instrumentation, trends, 18312
liquid level measurement for, 17244
on-line measurement in continuous
processes, immediate problems,
15818
state-of-the-art, 18582
temperature measurement methods
compatible with computers,
17615
ultrasound, low-intensity, industrial
applics., 18048
velocimeter, non-contact laser for,
17314
viscosimeters, rotating, 16424

Profile

surface, three-dimensional, balance
beam probe assembly for meas.,
15802

Prosthetics

finger equipped with adaptability to
object, 17014

Pulses

amplitude and shape, automatic
attenuator for recording, 15646
electronic measurement equipment,
17918
generator, time-domain reflectometry,

15694

heat, in magnetic field, CdS bolo-
meter for detection, 17695
intensity-ratio meter, digital, 16223
laser, CO₂-TEA, with Rogowski
profile, parametric meas., 15733
laser, giant, meas. and centralisation
of peak-values, 16568
NMR relaxation times meas., pulse
train technique, 15771
noninvasive pressure-pulse recorder,
15866
radiolysis using solid state photo-
detectors, 16623
radio, phase shifts, high-speed
digital meter, 16231
rectangular, thyatron generator,
15898
ultrasonic thickness gauge, 16940

Pumps

cryopumping system for balloon-
borne mass spectrometers, 16474
gear, use in flow-metering, 18267
oil pressure meas., field emission
microscopes, 18866

Pyrometers

colour pyrometry, standard equip-
ment for, 16848
glass production temps. meas.,
17826
manufacturing techniques, 17520
micropyrometer for objects of 20
microns, 18461
optical, 18205, 18206, 18207
optical, with disappearing filament,
17163
pyroelectric detector evaluation,
17693
radiation, 16839
radiation, in steel making process,
18589
selective-absorption, 16288
suction, principles and development
of miniaturized instruments,
16847
suction, with exchangeable meas.
heads, 18208
thermoelectric, with sheathed
thermoelements, 18454
two-colour, 16849
Venturi, for temp. meas. of gases
and flames at high temps., 17178

Q factor

microwave cavity, single-ended,
bridge method for simultaneous
meas. of coupling coeff. and
loaded Q, 15702

Quality control

bottle inspector, automated, 17322
cable inspection during fabrication,
18320
chemical analysis methods, 16305
in diagnostic ultrasound, 16449
evaluation of meas. instruments,
17896
microscopy, high temp., use, 16708
surface inspection and classification,

automatic, 17296
ultrasonic testing techniques, 16981
water, dissolved oxygen meas.,
15882
water, instrumentation, 18094

Radar

acoustic high power, 17347
altimeter expmnt., 16357
altimeters, lightweight, 16356
automotive, review, 16443
breathing failure detection applic.,
16452
display systems used in, 17120
Doppler, particulate velocity
monitoring, 18814
geomorphology of coastal and
wetland environments, 17036
impulse system for crevasse detection,
18088
ion and neutral motions, simultaneous
meas. by radar and optical tech-
niques, 15876
ionizing detector, 18513
laser, sea surface wind velocity
meas., 17068
lidar, digital real-time recording,
processing, and display system,
18352
lidar for atmospheric meas., 17564
lidar for atmospheric pollution,
18359
lidar measurement of temperature,
17680
meteoric, comparison with incoherent
scatter meas. in lower thermos-
phere, 15883
meteorological operations and
research applic., 16480
in meteorology and hydrology,
17547
ocean current mapping via synthetic
aperture methods, 17042
security and law enforcement applic.,
18872
snowfall meas., 17070
sounding balloons automatic tracking
applic., 17077
Upper Atmosphere Observatory
incoherent scatter, design
considerations, 15880
weather radar data, computer-
generated graphic display, 16163

Radiation

air, high-altitude meas. of natural
radioactivity, 18091
atmospheric particulate monitoring
with beta radiation detector,
15877
cosmic, in deep snow meas., 18087
detectors and applics., 15961
environmental, assessment systems
and instrumentation, 16465
gamma-ray camera for medical
diagnosis, 15848
gravitational, detectors, 16190
ionizing, personal exposures to,
international comparison of
meas. precision, 16141
optical, scales, 18729
pulse radiolysis using solid state

photodetectors, 16623
 radioactive gas meas. in ducts with
 scintillation detector, 18863
 radioactivity technique for non-
 contact meas., 18024
 from solar eruptions, X-ray
 polarimeter for investigation,
 15893
 submillimetre detection and mixing
 using Schottky diodes, 15731
 vacuum ultraviolet, physics of, 17964

Radioactive isotopes

air, concentration in, meas., 16460
 dew-point hygrometers and melting
 point meas. apparatus, 18783
 imaging devices in medicine, 18602
 industrial applications, 18857
 ionization gauges with, literature
 review, 18795
 liquid scintillation counters, 17975
 medical applications, 17535
 pollution, rain water study tech-
 niques, 17550
 zoom macroscope for, 17450

Radiography

converging-beam method in several
 characteristic radiations
 simultaneously, 15745
 diagnostic radiologic equipment,
 exposure time meas., 17544
 diagnostic X-ray equipment standard,
 evaluation of test methods for
 detmn. of compliance with, 16450
 diagnostic X-ray tube potential, field
 meas., 16451
 electron microscopes, significance of
 X-ray leakage from, 16143
 holographic storage of film, 16208
 image quality standardization pene-
 tration quality meas., 18613
 lead poisoning detection by computer
 scanning, 16458
 neutron, principles and applics.,
 17816
 pinhole collimator, use of, 15849
 radionuclide image quantification,
 15854
 of thin films, 18790
 tomography, electrofluoroplanigraphy,
 16457
 tomography, gamma-ray, human
 organs observations, 16150
 tomography, scintillation camera,
 evaluation, 16724
 tomography with monoenergetic
 photons, 16149

Radiometers

field spectroradiometer calibration,
 15720
 filter-wheel solar, for atmospheric
 transmission studies, 16188
 4.25 mm wavelength, with parametric
 amplifier at input, 15965
 infrared temperature profile,
 atmospheric experiment, 16185
 mm. wave, for cosmic background
 radiation meas., 17085
 monitoring of, during meas., 17448
 photon-counting polarizing, 16186

spectroradiometer for submillimetre
 range, 16012
 testing laboratory for, 17515
 thermistor thermometer, aeroport-
 able, 17610
 ultraviolet irradiance, low levels,
 monitoring, 16187

Radiometry

far-ultraviolet spectral radiance
 calibrations, 16584
 microwave, and applics., 18351
 principles for engineers, 17947
 sensors and applics., 15966
 solar, 18654
 state-of-the-art review, 17629
 units, use in specifications of opto-
 electronic devices, 18216

Railways

coach laboratory, testing and meas.
 apparatus, 16444
 gauge inspection, automated,
 17311
 inspection units, comparison of
 effectiveness, 16445
 level crossings, automatic detection
 of obstructions on, 18058
 moving stock, strain gauge, balances
 for weighing, 17825
 speed and distance meas. system,
 electronic, 17527
 train movement, axle-counting
 device, 17008

Rangefinders

eyesafe Ev laser, for ceilometer,
 16165

Recorders

analogue chart, survey, 17906
 blood circulation and respiration
 investigation instrument, 16716
 cassette tape, storing eight analogue
 signals, 15920
 chart, review, 16204, 18683
 creep under variable load, 18564
 defect marker, two-coordinate,
 16415
 demineralization plant, recorder
 of events, 16425
 digital measuring PRC-120, 18152
 dilatometer, 16062
 direct-writing UV, 18409
 eye bank, 15867
 eye movement, 17336
 gas-volugraph for recording gas
 evolved versus time, 17057
 go-anywhere strip-chart with lab.
 accuracy, 15666
 goniospectrophotometer, geometrical
 metamorphism meas. applic., 15728
 graphic, 17907
 heart parameters, multichannel
 instrument, 16454
 high-sensitivity X-Y, 17908
 image, optimization of information
 display, 18687
 induction, 15690
 laboratory chart, 17409
 magnetic, analogue and digital, 18151
 magnetic, in water temp. meter,

18641

maintenance aided by test and
 calibration set, 15919
 mass spectrometer with broad mass
 spectrum recording, 17736
 microorganisms, motions in chemical
 gradients, 16712
 microspectrofluorometer for
 biological use, 18330
 microspectrophotometer, 18242
 multimeter, Normameter D, 16206
 noninvasive pressure-pulse, 15866
 nuclear radiation, rectifier photo-
 cells, 17221
 ocean temperature and pressure
 recorder, moored, 16179
 ocean wave space-time characteristics,
 17349
 optical circular dichroism spectra,
 17193
 photometers based on electrodeless
 spectral tubes, 17704
 position, digital, 18026
 pulsating pressure, 18816
 review, 17115
 spectrophotometer, twin-wave, with
 corrected zero line, 17432
 strip chart, 17410
 strip chart, operating principles,
 17649
 tape, trends, 18410
 transducers for electrical quantities
 meas., 16217
 video, for astronomy, 18906
 voltage deflections and fluctuations,
 16813
 X-Y, 17648
 X-Y, in digital meas. systems, 16205

Recording

autonomous apparatus, automatic
 measuring system, 15915
 from brain, advances, 17841
 carcass shape by moire method,
 16133
 computer interface for analogue
 signals, 15921
 copulation in sheep, telemetry
 system, 17546
 digital real-time lidar data, 18352
 disc, monitoring by acceleration
 meas., 15667
 EEG, bedside techniques, 17538
 EEG equipment, 17536, 17537
 electronic field, on sea floor with
 short span instruments, 18374
 electronic multi-channel, 16512
 explosive gases and vapours, thin
 film sensing element, 16608
 fatigue cracks, on welded testpieces,
 automatic, 18840
 high-speed events, use of multi-pulse
 laser, 15665
 hologram, by semiconductor laser,
 15661
 holographic, on thermoplastic films,
 16207
 light fluxes, noise-immune channel
 operating photon-counting mode,
 15730
 with monitoring in manufacturing
 industry, power saving, 16997

- patient motility, 16455
 physiological pressure, microtransducer, 18606
 shearing interferometers for studies, 18751
 steel strain variation, 16398
 temperature, automatic, in operation of universal vacuum dilatometer, 16274
 temperature, by colour-changing substances, 17167
 thermal infrared radiation, stresses in polymers study, 16396
 tomography, electrofluoroplanigraphy, 16457
 voltmeter, digital, with automatic selection of recording time, 17582
- Reflectance**
 diagnostic, standards for colorimetry, 16582
 rocks and soils, photometer, 17055
- Reflectometers**
 dielectric mirrors, reflectivity meas., 15722
 double-beam two-channel wavelength-modulated, 17627
- Refractive index**
 Abeles-type meas., effect of thin film thickness, 15967
 microscopical determ. with ± 0.00001 error, 18752
 of optical fibres, unclad, meas., 15968
 transparent substances, 18226
 transparent substances, meas. method, 18352
- Refractometers**
 critical angle, continuous optical density meas. applic., 18225
 linear, for liquid concentration meas., 18819
 liquids, meas. and control, instrument for, 17191
 projected thermometer for range 2–20K, 17165
 time-domain, conductive meas. of thickness of conductive plating on wires, 16235
 time-domain inductive meas. of thickness of conductive plating on wire, 16234
- Reliability**
 of electricity meters, 18425
 of electromedical apparatus, 18603
 hydrometric field instruments, factors affecting, 16778
 industrial instrumentation, 18047
 of instruments, 18021
 measurements- errors, 17379
- Remote sensing**
 airborne, calibration and correlation data, 17049
 air pollution, 18360
 for air pollution meteorology, 17865
 atmosphere, accuracy of temp. probing by satellites, 17074
 atmospheric structure constant and wind velocity profiles detmn. by statistical inversion procedure, 16164
 atmospheric water-vapour, satellite observations, 16167
 book, 16181
 climatological instrumentation systems, 17856
 coal mining, thermal activity, 17000
 CO detection by parametric tunable laser, 16160
 community noise monitoring by tethered balloon, 18634
 of Earth resources, very high resolution satellite imagery, 15884
 earth sciences applics. of satellites, 17848
 of Earth surface properties, 18344
 electroprospecting, 2-aircraft, increase in separation, 17053
 environmental probing, 16156
 ERTS-1 satellite and sensors, 17571
 hydrology applics., 16180
 image contrast, 17040
 infrared detectors in, 17863
 by infrared, military applics., 17862
 inhomogeneous media, 18343
 laser fluorometer for water pollution detection, 17866
 lower atmosphere temp. profile obtained by acoustic sounding, 16168
 meteorology, automatic weather station, 17859
 meteorology, space sensors for, 18350
 national park resource inventory process applic., 17051
 of natural formations from radiance coeffs. meas., 18632
 nuclear power plant site surveys using airborne gamma ray spectrometer, 16437
 ocean colour, satellite meas., 17044
 oceanographic, results, 16727
 orbital, application, 16470
 resistance, for use in temp. meas., 18583
 satellite monitoring of Europe, 18622
 from satellites, meteorological applics., 17864
 sea surface wind velocity, 17068
 shoreline geology, definition, 17058
 snow and ice meas., satellites in, 17872
 snow studies using satellites, 17870
 soil analysis, 18342
 solid waste, 15885
 of stratospheric turbulence by spatioangular cross correlation of stellar light scintillation, 18375
 superconducting airborne mineral detection system, 18084
 temperature measurement, radiation detectors and instruments for, 17974
 temperature probing of atmosphere by satellites, accuracy, 17074
 thermal infrared, detection of buried glacial and ground ice, 17868
 of thermal pollution of rivers, 18366
 thermometer for air temp. meas. in flight, 15951
 in transformer stations, 17003
 vegetation, toxic effects of metals on, detection from satellites, 16471
 water quality investigations, aerial and satellite photography, 17037
- Resistance**
 boxes, testing, 18438
 comparator, 18436
 dry-circuit contact meas. instrumentation, 17927, 18701
 earthing electrodes, meas., 16527
 fatigue crack growth monitoring, electrical method, 17508
 fire detection system using insulation resistance/temp. changes in polymeric dielectrics, 16280
 high, bridge system for meas., 15688
 insulation, meter for hospitals, 15687
 linear scale ohmmeter, 17669
 metrological problems, 18671
 MOS structures, conductance and susceptance meas., 15700
 ohmmeter error reduction, 16526
 ohmmeter, low-value linear, 17138
 ohmmeter, transistorized linear scale, 16239
 remote meas. for use in temp. meas., 18583
 source, of power supplies, meas., 16528
 temperature probe, 16547
 thermometers for cryogenic temps., characteristics, 17614
 thermometers, miniature platinum, 17685
 thermometer, platinum, easily calibrated, 17171
 thermometry, low-noise AC bridge for low temps., 15718
- Resistivity**
 absolute ohm, measurement, 16805
 contactless measurement by eddy current methods, 15938
 determination from mutual inductance meas., 18700
 of Earth, meas. method, 18348
 ink, monitor temp. compensation, 16233
 low-resistance, measurement, 16814
 measurement, computer-controlled apparatus, 18437
 resistance measurement at frequencies below 10 Hz, 16828
 semiconductor, determ., 15939
 surveying applications, 16486
- Resistors**
 carbon, for thermometry in high

- magnetic fields, 17687
 carbon, low temperature thermometry in high magnetic fields, 16285
 carbon, use for temp. meas., 16843
 marking passive components, methods, 16221
 silicon strain-gauge, pickup for meas. of small pressure differentials, 16044
- Rheometry**
 blood, instrumentation and techniques, 18072
 concrete mixes study, 16428
 at high pressures, 16350
 instrument design, testing and data analysis, 16352
 low frequency torsional meter, 16351
 nearly viscous flows, 16349
 nonlinear fluids, oscillatory studies, 16347
 short time rotational, for meas. of shear and normal stress functions at high shear rates, 16346
 of viscoelastic materials, 17251
 Weissenberg rheogoniometer, torque and normal thrust meas. system, 16348
- Rubber**
 tyres, NDT using infrared, 17513
- Safety**
 chemical industry, electrical equipment for protection against explosion, 18587
 of electromedical apparatus, 18603
 electron microscopes, radiological significance of X-ray leakage from, 16143
 in hospitals, instruments, 18604
 industrial instrumentation, US act, 17820
 intruder detector with oscillators, 17819
 nuclear meas. standards, 17830
- Satellites**
 for astronomical research, 17877
 astronomy, X-ray observatory for, 18912
 atmospheric water vapour observations, 16167
 coronagraph, white light, in orbiting solar observatory, 18384
 drag measurement, aid to knowledge of neutral atmospheric structure, 15872
 earth sciences applics., 17848
 ERTS-1, sensors, 17571
 imagery, very high resolution, for remote sensing of Earth resources, 15884
 mass spectrometer, neutral and ion, 17737
 meteorological, Soviet, 16162
 meteorology, advances, 17855
 monitoring of Europe, 18622
 ocean colour measurement, 17044
 particle detector for, 18905
- radar altimeter expmnt., 16357
 radio-astronomical, scientific instrumentation, 18903
 remote sensing from, meteorological applics., 17864
 remote sensing, orbital, applic., 16470
 Skylab, review, 18902
 in snow and ice measurement, 17872
 snow studies using, 17870
 solar research applic., 18383
 spectrometer, EUV, 17876
 temperature probing of atmosphere by, accuracy, 17074
 vegetation, detection of toxic effects of metals on, 16471
 weather, 18349
 weather, ground station, 17858
 X-ray, 18377
- Scales**
 optical radiation, 18729
 pyroheliometric, comparison, 15870
 viscosity, at NPL, 18822
- Scanners**
 internal diameter measurement, novel inductive scanning system, 15797
 spherical section, automatic ultrasound, 15858
- Semiconductor devices**
 avalanche diodes for radiation monitoring, 16328
 avalanche photodiode, multiplication factor meas., 16227
 avalanche phototransistor, use in optical communication systems, 18475
 bolometers, limiting sensitivity, 16559
 capacitance meter, MIS, 18710
 charge-coupled, infrared detection and imaging applic., 17702
 COS/MOS logic interface for displays, 16795
 cryogenic bolometer, 17943
 cryogenic thermometry, 17175
 detectors, use in nuclear medicine, 15855
 diffused, strain gauges, 17283
 digital panel voltmeters and avometers using IC, 17666
 displays, MOS compatible monolithic 7-segment, 17423
 electrometer amplifier with modulator using voltage-variable surface diodes, 16811
 epitaxial PbSe Schottky-barrier diodes for infrared detection, 16855
 FET gate insulator thickness meas., automated ellipsometer, 15729
 FET millivoltmeter for d.c. and a.c. voltages, 18178
 field effect transistor meter, 16533
 film thermoelectric elements as radiation temp. sensors, 15953
 gas and vapour detector, 16898
 gas detector, 17451
 gas detector for monitoring atmosphere, 17346
 Hall effect analogue, for impedance meas., 17931
 Hall effect, development and applics., 16498
 Hall transducers, magnetic field meas., 18723
 in imaging, review, 18402
 infrared detector, 18468
 integrated pressure transducer, 18276
 light detectors, 16293
 magnetometers, differential Hall effect, 18448
 magnetometer, sensitive Hall, 16262
 magnetometer, silicon diode low temp., 17677
 manometer, high-pressure p-n junction 17475
 measurement, electronic thermostat for, 15699
 MOS structures, conductance and susceptance meas., 15700
 ohmmeter, transistorized linear scale, 16239
 photoreceiver with single-junction transistor, 17703
 pressure gauge, 17238
 radiation detectors, 18796
 radiation, visible to thermal IR, 17630
 reversed tunnel diode in voltmeter, 17585
 silicon infrared sensing MOSFET, design for, 16856
 Si photodiodes having p-i-n structure, scintillation detector with, 16016
 speedometer, digital, using CMOS, 17273
 strain gauges, review, 16956
 strain gauges, survey, 16957
 strain transducer, temperature compensated Si, 16402
 temperature sensor, 17939
 testing and sorting, sensor, 16113
 testing, probe parameters and considerations, 16103
 thermometers, low-temp. resistance choice of materials for, 17174
 thick film moisture sensors, 16902
 transducer, gas-electric, 16606
 transistor measuring instrument, 17600
 transistor parameters meas., 17150
 transistor pH meter, 18781
 transistors as absolute thermometers, 15950
 transistors, m.o.s., meas. instrument with automatic range switching, 15940
 unipolar mass spectrometer, 17740
 voltmeter, three-range f.e.t., 17135
- Semiconductors**
 display system, large panel, 17911
 as gas sensors, 15976
 Hall constant measurement at temps. up to 1000°C, 15701
 Hall effect measurement, computer-controlled apparatus, 18437
 impurity concentration distributions in solids, in-depth analyzer, 16891
 insulator thickness, optoelectronic detm., 15800

measuring techniques, state-of-the-art, 18394
 resistivity and conductivity determ., 15939
 small samples, meas. of small wedge angles using Nomarski interferometry, 16065
 strength testing of materials, equip., 16968

Shape

carcass, recording by moire method, 16133
 drills, geometrical parameters monitoring instruments, 16705
 precision circle division using redundant interval meas., 16945
 recognition by coherent optic device, 15804
 screw threads, measurement of form and position deviations on flanks, 16944
 spherical surfaces, interferometric techniques and instruments, 16571
 topography, shadowless Moire, using single light source, 16370
 topography study, liquid surface interferometry, 16335
 wire gauges, applic. and testing, 15801

Ships

automation and instrumentation, use of subcontractors, 17526
 translational motion meas., dynamic characteristics of inertial instrument, 16129
 weighing, shipboard, electromagnetic balance, 17492

Shock: mechanical

analysis and measurement, 18032
 instrumentation, 17514
 transducers, 18291

Signals

biophysiological, meas. in audio spectrum, 18062
 derivative processing in scanning electron microscope, 15650
 electrical, chemotronic analyzer, 15695
 meter, signal-characteristic, 15946
 microwave, sources for extended meas. capability, 15706
 in position-sensitive detectors, 16366
 radioastronomy, relationship between measured signal and received signal field-strength, 16762
 spectropolarimeter, photoelectric, with two-channel signal-storage system, 15970
 transient, analysis unit, 15668
 weak-electrical, meas., 15934

Software

reactor cores, bowed, computer program for analyzing, 15835
 testing systems, modular Monte Carlo simulation technique, 16076

Soil

analysis, remote sensing method, 18342
 particle size detmn. by beta-ray absorption, 16318
 silt analysis and air entrainment meas., instruments, 16735
 spectral reflectance meas., 17055
 stress gauge design and evaluation, 17353

Solar

artificial satellites used for research, 18383
 coronagraph, white light, in orbiting solar observatory, 18384
 coronagraph with low-transmission screen, 18909
 eruptions, X-ray polarimeter for investigation of radiation from, 15893
 filter-wheel radiometer for atmospheric transmission studies, 16188
 heliograph, monochromatic, 18655
 heliostat, sun glint, for atmospheric spectroscopy, 16473
 image converters for studies, 17570
 image motion measurement, 18653
 interferometer, 35 GHz, 17572
 magnetic field measurement, influence of instrumental polarization, 17357
 particle propagation through interplanetary medium, multi-spacecraft meas., 16767
 photometry and spectral radiometry, 18654
 pyroheliometric scales compared, 15870
 radioheliograph, 17369
 radio spectrograph for frequency range 70–810 MHz, 17082
 radiotelescope, expeditionary, 16756
 spectrograph, 18382
 spectroheliograph, Skylab X-ray, 17084
 spectroheliometer, photoelectric, on Apollo telescope mount, 18105
 spectroscopy: airborne far infrared, 18104
 spectroscopy, measurement of stratospheric composition, 16182
 sunshine monitor, 18636
 ultraviolet irradiance, low levels, radiometer for monitoring, 16187
 X-ray studies, crystal spectrometer, 17083

Sonar

calibration, 18642
 digital systems, 17873
 nonlinear, fundamental characteristics, 16177

Sorting

automated in the laboratory, 15737
 semiconductor devices, fibre optic sensor, 16113

Sources

microwave signals, for extended meas.

capability, 15706
 noise, diagnostic tests for location, 15811
 sound, of machinery, use of frequency analysis to identify, 15820
 spectral lamp constant-current sources, design criteria, 15894
 X-ray, for electron spectroscopy, 18762

Sources: electrical

for measuring equipment, 17918
 resistance meas., 16528
 voltage, calibrating, 16522

Space

ESRO 4 gas analyzer, 18098
 Fabry-Perot interferometer application, 18651
 ionospheric plasma density and temperature, meas. meter, 18901
 photo-electric devices in research, 16749
 spectrometer, extreme ultraviolet, for research, 16184
 tribology for atomic and space industries, 17009

Spacecraft

Apollo X-ray fluorescence spectrometer, 16322
 contaminants, applic. of internal reflection spectroscopy, 16490
 display concepts for, 16520
 magnetometer, high fluxgate, 18904
 Pioneer/Jupiter real-time display systems, 18907
 solar particle propagation through interplanetary medium, multi-spacecraft meas., 16767
 Space Shuttle Transportation System instrumentation, 16768

Spectra

dichroism, optical circular, meas. and recording instrument, 17193
 infrared reflection, analysis of glass structure applic., 16614
 luminescence excitation, meas., 16877
 magnetic resonance, precision in meas., 16871

Spectrographs

astronomical, pupil imagery in, 16488
 with diffraction gratings, 16292
 dual dispersion high resolution, 18757
 extreme UV, 18106
 inexpensive vacuum ultraviolet, 15752
 nebular insect-eye Fabry-Perot, 18107
 nonaqueous solutions, electrode for analysis, 16611
 Raman-laser device, 16311
 solar, 18382
 solar radio, for frequency range 70–810 MHz, 17082
 telescope with spectrograph attached, 16754
 ultraviolet, using microchannel plates,

18771

X-ray telescope, 18123

Spectrometers

aerosol, field-type, design theory and calibration, 15760

airborne gamma ray, nuclear power plant surveys applic., 16437

alpha-beta-gamma scintillation, 16634

Atmosphere Explorer photoelectron, 18621

Auger-electron, 17440

Auger-electron, high resolution, 17956

Auger electron, using concentric hemispheres, 16631

atomic absorption, detmn. of stray radiant energy, 15994

atomic absorption, state-of-the-art review, 15990

Barringer correlation, gas flow meas. by plume analysis, 18000

bore-hole gamma, stabilization by injection diode, 16173

circular dichroism and absorption, 17722

cryogenic infrared grating, 18761

cryogenic interferometer, 17731

digital correlation, for supersynthesis, 16760

direct reading laser, 17197

double-scintillator time-of-flight, 17199

electron, cooled Si(Li), 16630

electron, high-resolution, 17726

electron transmission, design, 17727

electron, ultrahigh vacuum, design, 18239

EUV, on board satellite, 17876

extreme ultraviolet, for space research, 16184

field compensated interference, for visible region, optical design, 17200

field widened Michelson, with no moving parts, 15754

Fourier transform, for observations of stars in intermediate infrared, 18385

for gamma-ray astronomy, Ge(Li), 17081

gamma-ray, in vivo activation analysis applic., 16137

gamma-ray NaI, 16636

gamma-ray, NaI (TI) crystals, 18660

Hadamard, for ultraviolet-visible spectrometry, 17198

helio-, photoelectric, on Apollo telescope mount, 18105

image dissector Echelle, for spectrochemical analysis, 16870

infrared, and receiver, nonlinear frequency converter, 17438

infrared Hadamard-transform, for analytical spectrochemistry, 16873

infrared high resolution, in 8–10 μm range, 16874

infrared in situ cell, variable temp., for gas-solid surface studies, 15980

infrared prism interferometer, using gas-lubricated drive bearing, 17434

infrared, rapid scanning Michelson interferometer in astronomy, 18102

ion, for atmospheric mobility meas., 15873

laser Doppler, for study of electrokinetic phenomena, 16312

microchannel-plate concave-grating, for airglow and auroral studies, 18099

microwave, computer controlled, 17734

microwave discharge emission, computer-controlled, 18492

microwave Zeeman, 18775

for millimeter waves, 17735

Mossbauer, motion control system based on integrated microcircuits, 16000

neutron, magnetically pulsed, 16019

optical circular dichroism spectra, meas. and recording instrument, 17193

for painting fading meas., 16583

photodiode array direct reading, dye laser intra-cavity enhanced absorption meas., 15969

photoelectric radial-velocity, for Palomar telescope, 17364

photoelectron, for investigating vapours of nonvolatile substances, 17749

with photon counting detecting system, wavelength calibrator, 16588

polarization Fourier, for astronomy, 17080

positron lifetime, for metal studies, 16908

Rayleigh type, 16309

secondary electron, 18240

slitless optical fibre laser-Raman, 18235

spectroradiometer for submillimeter range, 16012

Stark-sweep microwave cavity, for Zeeman effect studies and for pollutant monitoring, 16886

stellar, crystals for, 15892

stellar photoelectric, electrical system, 17087

stellar photoelectric, optical system, 17086

transmission oscillator ultrasonic, 16978

ultraviolet photoelectron, 17439

urinary drop, 17543

vacuum operating thermoluminescence, 17962

variable magnification, 16875

vidicon scanning, for molecular absorption and atomic emission spectrometry, 16590

vidicon scanning, for UV molecular absorption spectrometry, 18495

Spectrometers: magnetic resonance

broad lorentzian EPR lines, modulation broadening, 16009

correlation NMR, 16601

ENDOR, computer-controlled, 16604

ESR, for dispersion and absorption signals, 18504

ESR 1 GHz for study of aqueous samples, 16897

ESR, sensitivities using maser techniques, 16008

ESR, strain-modulated, 17445

Hadamard NMR, 17746

NMR, high resolution, advances, 16905

NMR pulse, for study of solids, 16907

NQR superregenerative, 16909

nuclear, literature review, 17215

nuclear, measurement of second moment using instationary methods, 16006

nuclear, progress, 17744

nuclear, two-coil, filling factor, 16007

pulsed EPR, 16602

Spectrometers: X-ray

for air-pollution measurement, 17344

crystal, for solar studies, 17083

Doppler-tuned, 16592

elemental analyzer, real-time, 16324

energy-dispersive, for multielement pollution analysis, 16466

500 eV resolution, 18248

fluorescence, Apollo, 16322

fluorescence, for rock and mineral analysis, 15998

light element analysis, advances, 17728

monochromator, 15997

photoelectron, applications, 17442

photoelectron, fibreglass surfaces study applic., 16990

photoelectron, for surface research, 15759

portable dispersive, with excitation by windowless gas tube, 16883

precision multicrystal, 16321

proton induced emission for trace element analysis, 16610

sequential automatic, with dedicated computer, 17730

soft X-ray appearance potential spectroscopy, sensitive detection system, 16593

spectroheliograph, Skylab, 17084

topographic, DTS two-crystal, 15750

Spectrometry

alpha, high resolution, 16635

atomic absorption, continuous background correction, 18234

atomic absorption, developments, 17435

atomic absorption, electronic meas. device for microlitre sample volumes, 16052

atomic absorption, state-of-the-art review, 15990

atomic absorption, with graphite filament, jet engine oil analysis applic., 16704

atomic fluorescence, 17960

atomic fluorescence, multielement

nondispersive, in TDM mode, 17717
 derivative luminescence, 17961
 emission, charge and discharge ccts., 17725
 energy dispersive, advances, 17207
 far infrared emission of lower stratosphere, 15881
 fluorescence, high intensity pulsed source atomic, 17719
 fluoro-, automated, using pyro-electric detector for correction, 17720
 gamma-ray, on spent fuels of a boiling water reactor, 18864
 helium counter in moderator for detection of neutrons, 16018
 inductively coupled plasma-optical emission analytical, for trace analysis of solutions, 15992
 infrared literature review, 17201
 kinetic luminescence, computerized, 18496
 laser Raman instrumentation, 17436
 low-level gamma-ray, 18512
 melted salts, procedure for studying high-temp. electronic absorption spectra, 15758
 optical emission, multielement analysis, 18785
 photoacoustic, and thin-layer chromatography, 17955
 Raman, literature review, 17204
 source modulated microwave, 16879
 spontaneous Raman line contours, apparatus for study, 16887
 time-delay, in ultrasonic imaging system, 15860
 ultraviolet, literature review, 17205

Spectrophotometers

anaerobic stopped-flow, 16299
 atomic absorption, 17203
 atomic absorption, maintenance, 15986
 atomic absorption system, automatic, 15756
 automated systems based on double-beam spectrophotometer, 15755
 colour measurement, industrial, 16698
 computer-controlled, 18241
 flame, 16876
 fluorescence measurement, temp-jump apparatus, 16594
 Fourier transform, for astronomical applics., 16750
 glass, faint colours in, meas., 16298
 gonio-, recording, geometrical metamerism meas. applic., 15728
 infrared circular dichroism and linear dichroism, 17958
 infrared grating, 17202
 light in polar ice and snow, meas., 17072
 micro-, recording, 18242
 recording twin-wave, with corrected zero line, 17432
 spectrofluorophosphorimeter, electronically compensated, 17721

twin-wave differential, for biological studies, 18329
 ultramicrospectrophotometer, atomic-absorption for calcium determ., 18601

Spectrophotometry

atomic absorption, detmn. of vanadium in steels, 15762
 derivative, applic. to SO₂ analysis, 18772
 high accuracy, applics., 17723

Spectroscopy

absorption, ultrafast, 17724
 air pollution, correlation measurements, 16159
 applications, reviews, 17195
 atmospheric and astrophysical, submillimeter-wave, 18100
 atmospheric particulates, combined sampling-analysis method for trace elements detmn., 16740
 atmospheric, sun glint heliostat, 16473
 atomic, applications of tunable dye lasers, 16313
 atomic frequency standards, 17431
 Auger electron, gated electron beam technique, 16632
 Auger emission, scanning electron microscope with facilities for, 17397
 bioluminescence studies, 18882
 blood flow velocity meas., 17843
 CW molecular, with tunable spin-flip Raman, 18759
 dielectric, probing structure, 18784
 digital dispersion, celestial radio sources study, 16764
 digital Raman difference, programmed cell instrument for, 16589
 direct absorption, using rapidly tunable CW dye laser, 16872
 disappearance potential, 17751
 discharge cell, electrodeless, r.f., for organic molecule emission, 15761
 double resonance, using laser, survey, 17748
 dye laser, advances, 17714
 dye laser enhanced, 17437
 electron, 18766
 electron energy distributions at low energy, detmn., 15773
 electron, for chemical analysis, 18236
 electron, X-ray source for, 18762
 emission, induction-coupled r.f. source, 15753
 ESCA/Auger combined system, 18238
 ESCA instrumentation, 18237
 far infrared Fourier, 16307
 flame emission and atomic absorption, biochemical applics., 17836
 Fourier, developments, 15989
 Fourier transform, 15988
 with Fourier transformation in infrared, 17196
 Fourier transform, photometric precision in infrared spectra meas.,

17732

Fourier-transform, using Michelson interferometer, 17957
 γ , resolution and channel width, 15751
 Hadamard imager, two-dimensional encoding masks, 15657
 at high pressures, status report, 17433
 industrial effluent, detmn. of 36 elements, 16738
 inelastic tunnelling, detection of dilute organic acids in water, 16612
 infrared absorption of aqueous solutions with CO₂ laser, 18776
 infrared bolometer in helium bath, 18742
 infrared computerized, via Fourier transform techniques, 17733
 infrared, identification of micro-samples of organic compounds, 16900
 infrared-microwave double resonance, and microwave transient nutation, 17747
 intercavity atomic absorption by dye laser, 18491
 internal reflection, applic. to contaminants, 16490
 inverse Raman technique, 17729
 ion scattering, for surface analysis, 17755
 lamp constant-current sources, design criteria, 15894
 laser, in atmospheric diagnostics, 17860
 laser microspectral analyzer investigation, 16587
 laser saturation, survey, 17715
 lasers, use in spectroscopic analysis, 16586
 microwave, absolute limit of sensitivity, 16880
 microwave, applications, 16775
 microwave, chemical analysis applic., 17963
 microwave, for air pollution control, 17033
 mode-locked laser Raman, technique for rejection of interfering background luminescence signals, 15995
 modulation, of biological films, 18061
 modulation, present state and development, 18233
 Mössbauer, 17967
 Mössbauer; local spin relaxation in metals, 18500
 NMR measurements on cellulosic materials, sealable sample holder with internal reference, 15770
 NMR, rapid scan Fourier transform, 16906
 optical, cryostat for, 15987
 optical, developments, 17194
 opto-acoustic, with visible CW dye laser, 18494
 photoacoustic, 18498
 polarized light technique, 16585
 polychrometer with stray light

rejection, 16301
 resonance Raman, use of fluorescence quenchers, 18758
 solar, airborne far infrared, 18104
 solar, measurement of stratospheric composition, 16182
 time-resolved Fourier, 18493
 two-photon, 15991
 ultrasonic, 18499
 ultraviolet photoelectron and X-ray photoelectron, surface studies, applics., 17752
 vacuum-tunnelling, 18789
 vacuum ultraviolet, using BRV continuum source, 15996
 vibrational, advances, 17716
 vibrational, determination of stoichiometry and disorder in multicomponent compounds, 16613
 X-ray photoemission, 16882
 X-ray, review, 17441

Speed

angular, of synchronous machine, digital meas. device, 18027
 bicycle speedometer/tachometer, 18028
 counter with monostable multivibrator, 15806
 d.c. motors, pulse-width-modulated control, 15696
 digital meter, 18541
 digital speedometer using CMOS, 17273
 dynamometer, fast response, 16070
 electrode rotation rate, continuous monitoring, 15985
 of light, measurement, 16859, 17186
 light, meter, 16297
 Mossbauer speedometer for small relative velocities, 16669
 motor vehicle revolution counter, 18289
 railways, electronic measuring system, 17527
 revolution counter, photoelectric, 17490
 rotational, measurement, 17608
 of sound in molten salts, detmn., 16676
 speedometer checking device, 17486
 train, axle-counting device, 17008

Standards (calibration)

atomic frequency, 17431
 density scale based on solid objects, 17267
 electrodes for pH meter testing, 15741
 gas, 18894
 for instrumentation, 17634
 laser wavelength and International Metre, 15974
 light sources and spectral irradiance distributions, 17373
 metre definition, metrological problems, 17099
 standard unit, 16932
 noise, machinery, meas. standards and test codes, 15819

reference lenses, set of, 18128
 for surface-measuring instruments, 16946
 temperature scale transfer standards, 18730
 thermal neutron flux density, 16638
 unified concept, 16500
 voltage, resistance, temperature and capacity, 18671
 voltage source, 16522

Standard specifications

ampere, absolute determination, new aspects, with current balance, 15932
 Bureau National de Metrologie, evaluation and approval system, 18670
 diagnostic X-ray equipment, evaluation of test methods and instrumentation for detmn. of compliance with, 16450
 watt-hour meters, 16252

Steel

crystallization of, and subsequent cooling of large ingots, continuous temp. meas., 16998
 hardness, ultrasonic inspection, 18299
 heavy-section, fracture toughness and investigations, 15841
 hot, ultrasonic testing at 1000°C, 16429
 impact fatigue testing machine, 16404
 industry, role of photoelectric switches, 15840
 industry, use of ultrasonics, 17525
 isothermal stress-strain curves, detmn. at temps. between 20 and 200°C, 16397
 making process, radiation pyrometry, 18589
 microwave non-contact meas., 16431
 plant, testing and troubleshooting, 16710
 plates, ultrasonic inspection, 18317
 with protective coatings, heat resistance testing device, 16709
 rolling, magnetoanisotropic transducers for force meas., 18318
 rolling mill, on-line meas. system, 16430
 sheet thickness gauge, 18286
 strain variation recording, 16398
 surface cracks detection by microwaves, 16409
 surface loss due to wear and corrosion, thin layer activation meas. technique, 17313
 testing using compact betatron, 16689
 thin sheet, plastic strain inhomogeneities detmn., 16964
 ultrasonic field in, 17814
 vanadium detmn. by atomic absorption spectrophotometry, 15762

Strain

automatic measuring device, 18038
 distribution measurement using holography and speckle-pattern interferometry, 16080
 dynamic and static, in small specimens at elevated temps., meas., 16959
 dynamic measurement at large strains, 18037
 dynamic testing techniques, 18036
 Earth, measurement, 17851
 Earth strainmeters, kilometre and centimetre, 16170
 ESR spectrometer, strain-modulated, 17445
 extensometer, diametral, for meas. in tension-compression testing, 16960
 fibre modulus detmn., techniques, 17288
 hardening phenomena, acoustic emission studies, 16097
 at high temperatures, meas., photoelectric extensometer for, 16961
 holographic analysis, 18845
 holographic measurements, 16066
 interferometer, three-beam speckle pattern, elastic constant and strain meas. applics., 16958
 local plastic, meas. by X-ray microbeam technique, 17287
 measurement by holography and strain, 16067
 metals, tensile tests below 1 K, 16400
 meter, iodine stabilized laser, 17810
 optical measuring techniques, 17498
 in-plane measurement by speckle photography, Young's fringes, 16082
 plane-surface examination by speckle-pattern interferometry, 16081
 plastic, in memory material, meas. techniques, 17501
 plastic, in thin sheet steel, detmn. of inhomogeneities, 16964
 ratio measurement by interferometric device, 17500
 residual lattice, in nonmagnetic metals, use of NMR for meas., 16399
 rocks, meas. by holographic interferometry, 17852
 shear, radial and lateral, holographic interferometer, 17289
 speckle-shearing interferometer for meas. derivatives of surface displacements, 16967
 steels, detmn. of isothermal stress-strain curves at temps. between 20 and 200°C, 16397
 steel, variation recording, 16398
 superplastic materials testing device, 16390
 during thermal fatigue tests, meas. by photographic method, 16965
 transducers, 18843
 transducer, temperature compensated Si, 16402
 in welding, Moiré techniques for meas., 16962

Strain gauges

- applications, 18841
- balances for weighing moving railway stock, 17825
- DC bridge, 18842
- deformations, elastoplastic, meas. at high temps., 18306
- with differential transformers, 16955
- diffused semiconductor, 17283
- dynamometer, high precision, 17285
- embedded wire, meas. of surface strain rates in glaciers, 16169
- interferometric, 17503
- load and deformation under high pressure, meas. instrumentation, 17290
- load sensors, integral-component, design techniques, 17268
- low temperature applic., 17812
- plastics, measurement on, 16401
- pressure transducers, 17499
- pulsed power system, 17502
- resistors, silicon, pickup for meas. of small pressure differentials, 16044
- semiconductor, review, 16956
- semiconductor, survey, 16957
- silicon, application for investigations periodic motion of parts of body with breathing, 15852
- speckle-shearing interferometric technique, 18307
- transducer, reusable biaxial, 16966
- thin-film distributed RC parameter, 17811
- tubular specimens measurement, 16963
- wire, strain and creep, 17286
- X-ray rig and versatile monitoring bridge, 16079

Strength

- brittle high-strength materials under biaxial load, meas. device, 16087
- ceramic, static testing methods, 16969
- of composite materials, inspection, 16695
- fatigue, of thin sheet specimens, instrument, 18569
- fracture propagation problems, small-scale test application, 16089
- Poisson's ratio, holographic interferometric study of end effects associated with four-point bending technique, 16084
- polymer toughness testing, crack velocity meas., 16090
- of semiconductor materials, testing, 16968
- specimens at high pressures, equipment, 18558
- steel, heavy-section, fracture toughness and investigations, 15841
- testing, selective, of brittle solid bodies, 16086
- tests, effect of rate of application of stress, 16085
- yam, all-digital test system, 18853

Stress

- analysis and research on materials, 16680
- drawing, in manufacture of wire, meas., 16999
- dynamic generation measurement in materials exposed to pulsed relativistic electron, 16686
- dynamic measurement at large strains, 18037
- internal, in thin films, measurement, 16393
- optical measurement with interactive data viewing unit, 16392
- in polymers, thermal infrared radiation recording, 16396
- pulsed NQR measurement method, 17284
- residual, centre hole technique for meas., 16395
- residual, in orthotropic plate, meas., 16391
- rheometer, short time rotational, for meas. of shear and normal stress functions at high shear rates, 16346
- soil, gauge design and evaluation, 17353
- steel, heavy-section, fracture toughness and investigations, 15841
- steels, determination of isothermal stress-strain curves at temps. between 20 and 200°C, 16397
- strength tests, effect of rate of application of stress, 16085
- superplastic materials testing device, 16390
- transient, holographic interferometry study, 16083
- uniaxial, apparatus with analogue pressure readout, 16394
- X-ray measurement, progress, 17282

Superconductivity

- airborne mineral detection system, 18084
- bridge for detection, 17932
- far infrared and microwave radiation detection using Josephson effect, 17878
- gradiometer, superconducting second-derivative, 16833
- gravimetry applications, 18347
- instruments using r.f. SQUID, 17609
- magnetometer, UHF SQUID, 18190

Surfaces

- analysis by ion scattering spectroscopy 17755
- analysis by secondary ion mass spectrometry, 17754
- analysis, physical methods, 18786
- area, electrochemical meter, 16947
- average roughness, optical determination by spot correlation, 16096
- bombardment-induced light emission for analysis, 17753
- coarsely machined, objects with, ultrasonic attenuation factor meas., 16687
- colour lightness, direct estimation,

15972

- contours measurement using holographically stored interference patterns, 15803
- cracks detection in steel by microwaves, 16409
- cylindrical, direct testing of generatrices, 16364
- displacements, derivatives of, speckle-shearing interferometer, 16967
- ellipsometric techniques, 17756
- fibreglass, X-ray photoelectron spectroscopy study, 16990
- finish, measurement, 17297
- flatness testing instruments, 18043
- inspection and classification, automatic, 17296
- ion beam analysis, recent advances, 18787
- layer research, secondary ion mass spectrometry applic., 17966
- liquid, interferometry for topography study, 16335
- loss due to corrosion and wear, thin layer activation meas. technique, 17313
- measurement interferometry, 18749
- measurement ultimate limits using stylus techniques, 18023
- mirror, flatness measurement by laser beam, 17711
- moving powders, applic. of terametrology to location, 16333
- non-planar, materials or structures with, flaw detection, 16987
- optical, digital wavefront meas. interferometer for testing, 17626
- optical, roughness detmn. using speckle correlation method, 18483
- outer atomic layers of solids, studies, 18788
- plane, checking by interference methods, 16569
- plane, strain examination by speckle-pattern interferometry, 16081
- porous solid, meas. for isothermal absorption, 15981
- pressure measurement, robust attachment to film balance, 15789
- profiles, three-dimensional, balance beam probe assembly, 15802
- roughness measurement, Japanese developments, 17818
- spectrometer, X-ray photoelectron, for surface research, 15759
- spherical, interferometric techniques and instruments for checking shapes, 16571
- standards for calibrating meas. instruments, 16946
- static pressure distribution meas., 18536
- strain rates in glaciers, meas. using embedded wire strain gauges, 16169
- studies using ultraviolet photoelectron spectroscopy and X-ray photoelectron spectroscopy, 17752
- temperature detectors, transient response, 18203

temperature limit detector using
nematic liquid crystals with applic.
to microcircuits, 16845
temperature measurement by minia-
ture thermistor probes, 16552
testing, optical profileometer, 18574
texture measurement, multi-parameter,
16989
topography, spectroscopic detmn.
using acoustic surface waves,
16991

Surface tension

measurement by differential maximum
bubble pressure method using
pressure transducer, 16658
of molten refractory metals, meas.,
vacuum apparatus, 16659
of opaque liquid, detmn. over wide
temp. range, 18532
water by oscillating jet, 18531

Surveying

aerial, use of marine proton
magnetometer, 16729
barometric levelling in determining
altitudes of temporary barometric
stations, 16667
using gas laser, 17796
Geiger-Muller meter, portable four-
decade logarithmic, 16734
resistivity method, 16486

Switches

photoelectric, role in steel industry,
15840
photoelectric, shift from detection
to discrimination, 15732

Tachometers

bicycle, 18028
cardiac, linear pulse-to-pulse, 17024
diagram circle reading stabilization,
16377
digital, design and construction,
17271

Tachometers

digital, two-pulse per revolution,
18545
electric, 16951
electronic, 16376, 18288, 18594
nonaveraging, design, 17799
photoelectric, 17272
reversible electronic, 18544

Telecommunications

hi-fi distortion, simple measurement
methods, 17142
mobile radio production testing,
18874
mobile radiotelephone test and
meas., 18875
radio-frequency synthesizer, 17141
radiotelephone measurement, 18876
telegaphy, automatic distortion
analyzer, 18444
telephone ccts., international,
automatic transmission meas.
equip, 17005
telephone equipment vibration testing,

18854
telephony, remote random access
service meas. system, 17324
telephony, subscriber usage meas.
system, 17323
visual data transmission from remote
locations, 15911

Telemetry

automatic meter reading, 18324
biomedical, and patient monitoring,
trends, 17326
cable pressure system, 18581
choosing system, guidelines, 17407
computer control, 18133
copulation in sheep, automatic
recording, 17546
current converters, AC/DC and
DC/AC, 16220
differential response impulse
modulated telemeter, 16815
of dynamic forces in endurance
sports, 18067

Television

display devices, 17411
dynamic interactive image processing,
15910
electro-optic display system with
electron beam write in, 15669

emission microscope, 17391
 figure TV colorimeter, 15727
 gas-discharge-panel display, 18169
 high-energy X-ray flaw detector, 18302
 image electronics, 17382
 infrared interferometry, scanned, 16868
 instant replay, in internal medicine and in paediatrics, 15847
 power signal generator for inter-modulation and cross-modulation meas., 15698
 video recording system for astronomy, 18906
 video technique for X-ray diffraction microscopy, 16591
 X-ray image perceptibility, 18407

Temperature

air-flow measurement using temp. fluctuation, 17465
 atmosphere temperature profiles analysis from radiosonde data, 15874
 dilatometer, computer operated fused quartz differential, 17797
 of electroprospecting magnetometers, causes of instability, 16733
 fire-detection system using insulation resistance/temp. changes in polymeric dielectrics, 16280
 global, distributions from airglow meas., 15886
 integrated circuit manufacture, radial temp. gradient detector, 17179
 linear measurement, temperature errors detmn., 18281
 multichannel temperature and heart rate radio-telemetry transmitter, 16717
 spectral emittances as functions of, meas., 16846
 telemetry system, improved, 18068
 transducers, 18735
 transmitter, VHF, 16275

Temperature compensation

for ink resistivity monitor, 16233

Temperature control

colour, system for, 17618
 in industrial heating, 17519
 instruments, 18194
 low-temperatures, electrical methods, 16268
 of quartz crystals for deposited thin-film monitors, 15798
 teaching method, 18453
 with thermo-manometric meas. probe, 16266

Temperature measurement

arc discharge, by high-speed filming, 16273
 atmosphere, accuracy of probing by satellites, 17074
 bridges for, linearized multivibrator, 16269
 calibration and methods, 18732
 carbon resistors, use, 16843

by colour-changing substances, 17167
 colour, system for, 17618
 convective drying measurement apparatus, 15954
 during crystallization of steel and subsequent cooling of large ingots, 16998
 distribution, digital instrument, 17616
 fibres, in texturing process, 18871
 in fluid using hot-wire anemometers, 17822
 flames, determination by beam-length variation technique, 15952
 fluctuations at different heights over ground, automatic system, 17075
 fluctuations in gas-cooled power reactor, 18325
 fluid-actuated sensor, 18458
 of gases, rapidly changing high temp., 16549
 gas, rotational Raman interferometric technique, 17942
 during grinding, inner and outer, 16272
 high, by thermal flow density, 15715
 of HV apparatus by thermovision, 17689
 HV cable joints, 16126
 on IC chip, 16271
 IC sensors, 18196
 in industrial heating, 17519
 instruments, 18194
 instruments using r.f. SQUID, 17609
 ionospheric plasma, meter, 18901
 lidar technique, 17680
 liquid crystal optical activity, 16546
 lower-atmosphere temperature profile obtained by acoustic sounding, 16168
 low temperatures, electrical methods, 16268
 magnetically operated probe, 17681
 by melting heat indicators, 17164
 metrological problems, 18671
 microwave sensor, performance in liquid sodium, 17831
 monitoring in nuclear power stations, 15830, 16123
 Mossbauer thermometry in millikelvin region, 16551
 motor, specification criteria for detectors, 16433
 NTC thermistors, 18202
 ocean, moored recorder, 16179
 probes for investigation of turbulent boundary layers at supersonic speeds, 16303
 in process control using computers, 17615
 using quartz crystal thermometer, 17682
 radiation, semiconductor film thermoelectric elements, 15953
 recording, automatic, in operation of universal vacuum dilatometer, 16274
 remote, radiation detectors and instruments for, 17974
 resistance, remote, 18583

of rotating bodies, contactless, instrument, 15716
 of rotating machine elements, transducer, 17315
 by saturation induction, 17166
 sensor for control, 18459
 sensor; photoelectric energy converter, 18457
 solid-state sensor, 17939
 with spectral emittances as functions of, 16846
 stratospheric, balloon-borne equipment, 18097
 surface, miniature thermistor probes, 16552
 surface temperature detectors, transient response, 18203
 teaching method, 18453
 testing apparatus, 18731
 in textile industry, precise digital, 18870
 thermistors, 17937
 thermocouple, in microwave fields, 18736
 with thermocouples, 16270
 thin-film sensor, 18204
 thin-film sensors for biological meas., 17011
 transducers, IC, 17619
 variation meter, automatic, of calorimeter, 15719
 water, meter with magnetic recorder, 18641

Temperature scales

general review, 17679
 IPTS-68 scale, 17686
 transfer standards, 18730

Tension

compression testing, diametral extensometer for small strains meas., 16960
 meter for cable, 17833
 relay springs testing, tensiometer for, 17291
 testing tensile, computer-controlled machine, 16970
 in thin films, meas., X-ray technique, 17813
 traction, test installation of 100t capacity, 18847

Testing

of acoustical measuring instruments in air, 18294
 acoustic, applications of digital processing, 16102
 aircraft tyres, wheels and brakes, dynamometer, 17320
 audio tester, 16387
 automated equipment, 16678
 automatic, frequency synthesisers, 18846
 automatic, review, 18171
 automatic test equipment, 18298
 automatic test equipment in Britain, 17919
 bending fatigue, machine, 18305
 bending, short-cycle, of viscoelastic materials, equip. for, 16974

- biaxial expansion, at low temps., cross-shaped specimen, 16976
 biaxial fatigue rig, 18565
 Bureau National de Metrologie, evaluation and approval system for instruments, 18670
 cable, and fault location van, 17524
 cable conductors, audible test set, 16125
 cable, universal equipment, 18321
 car, partially automatic, 17321
 of ceramic materials under thermal action of electric arc, 17298
 circuit board, computer-controlled system, 17599
 circuit tester, 17671
 compression, of ring specimens, device for, 16971
 compressive, equipment, 18844
 computer-based automatic test equipment, 17301
 corrosion-fatigue, of fine wire specimens, apparatus, 16406
 crack detection, holographic, 16091
 crack length measurement in test-pieces, applied to liquid metals, 15813
 crack, magnetic, instruments, 17509
 creep, precision, high-temp. vacuum unit, 16983
 creep tester, high sensitivity, 17817
 cyclic-impact, at elevated temps., device, 16975
 damping properties of soft ductile and elastic materials in plane stressed condition, 16389
 developments, 18296
 diagnostic X-ray equipment standards, determining compliance with, 16450
 digital transistor, 15814
 dosimetric and radiometric equipment, 17515
 of dosimetric instruments, installation, 18798
 double-clad printed boards, automatic testing equipment of 'through-contact' holes, 15697
 dynamic techniques and material behaviour, 18036
 dynamic vibration, systems compared, 17294
 of electrical measuring instruments by digital voltmeters, 15936
 electro-optical telemeter, 16475
 fatigue, by modified staircase method, 17507
 fatigue crack signallers, 16405
 fatigue, impact machine, 17506
 fatigue, in vacuum at low temps., apparatus, 16683
 fatigue life under stationary Gaussian random loads, 16088
 fatigue, machine for combined bending and torsion, 16972
 flowmeters, device for, 16640
 fracture toughness with sections of cylinders, 18041
 of gamma dosimeters, device, 18799
 hardness values of hardness testing block, Rockwell C, 16095
 heat resistance, arrangement, 18213
 high-resistance boxes, 18438
 hot-pressing process, apparatus for investigation, 15839
 HV, equipment, 16699
 impact fatigue, on mild steel, machine, 16404
 industrial equipment, telemetry in, 17308
 instrumentation, progress, 16385
 instrument spring force, 18562
 of kilovoltmeters, testing apparatus, 18434
 kWh meters, automatic tester for, 17146
 using lasers, 18390
 lenses decentering and deformation, during assembly of objectives, 16493
 lens, with wavefront shearing interferometer, 16494
 LMFBR reactor, simulated, critical life study, 15833
 low temperature mechanical, machine, 18839
 magnetic field intensity meters, equip. with ferrite antennas, 16536
 of magnetometers, apparatus for, 18447
 market of automatic test equipment, 17639
 materials, machine, 16682
 measuring equipment, 18138, 18388
 of meters, computer-controlled, 17921
 of microammeters, 16808
 microhardness, in liquid metal media, 16988
 mirror flatness, automated, image assessment, 18404
 mobile radio production, 18874
 mobile radiotelephone, 18875
 night vision devices, field test set for, 18308
 noise, machinery, measurement standards and test codes, 15819
 nuclear reactor pressurized water test loop, 16122
 ohmmeters, standard, 16525
 optical, bibliography, 18746
 optical, methods in production, practical aspects, 18481
 orthotropic plate, measurement of residual stresses, 16391
 paper and polystyrene foam composites, 16077
 phototubes, CAMAC system, 16628
 polymer monofilaments, detmn. of coeff. of friction, 16414
 polymer toughness, crack velocity meas., 16090
 portable instruments, use of, 16679
 production, 18848
 projection lenses, 18228
 of pulse voltmeters, 18433
 recorder test and calibration set, 15919
 relay springs, tensiometer for, 17291
 of resistance thermometers, 18734
 rheological instrument, 16352
 semiconductor devices, fibre optic sensor, 16113
 semiconductor devices, probe parameters and considerations, 16103
 semiconductor materials strength, 16968
 simulation technique, modular Monte Carlo, 16076
 small-scale, application to fracture propagation problems, 16089
 speedometer checking device, 17486
 standards, accuracy normalization, 18295
 standards for, developments, 18170
 steel, heavy-section, fracture toughness and investigations, 15841
 at steel plant, 16710
 steels and alloys with protective coatings, heat resistance testing device, 16709
 straightness of generatrices of cylindrical surfaces, 16364
 strains during welding, Moiré meas. technique, 16962
 strength, of ceramics, static methods, 16969
 strength, effect of rate of application of stress, 16085
 strength, selective, of brittle solid bodies, 16086
 superplastic materials, apparatus, 16390
 surfaces, optical profileometer, 18574
 telephone equipment, vibration, 18854
 telescopes, binoculars, sights, production testing instrument, 18480
 in temperature range 4.2–1200 K, device for static testing, 16985
 tensile, computer-controlled machine, 16970
 tensile, metals at high rates of deformation, device, 16386
 tensile, of metals, below 1 K, 16400
 tensile testing machine, 100 kN screw-driven, compliance detmn., 16078
 tension-compression, diametral extensometer for small strain meas., 16960
 thermal fatigue, strain meas. by photographic method, 16965
 thin sheet steel, plastic strain inhomogeneities detmn., 16964
 traction test installation of 100 t capacity with data processing, 18847
 transistor — MOSFET-diode, combined, 15815
 tyre tester, computer-compatible, 16112
 UHV laboratory and test facilities, 16255
 viscoelastic materials, indentation, 18042
 watthour meters, 16253
 wear, machine, 18559
 wear of materials under reciprocating rotary motion and dynamic loading, 17295

weighing devices, 18550
 welded testpieces, automatic fatigue crack recording, 18840
 of wire ropes, magneto-inductive, 18560
 yaw sphere-thermometer for heat flux meas., 16553

Textiles

fibre temperature meas., in texturing process, 18871
 temperature meas., precise digital, 18870
 yarn strength test system, all-digital, 18853

Thermal

activity of liquids, compensation method of meas., 15960
 blood flow meas. by thermal conductance method, 18609
 burn hazard measurement, thermesthesiometer, 17015
 ceramic materials, testing under thermal action of electric arc, 17298
 differential analysis, vapour deposited thermopile system, 17617
 flow in pipes, meas. by external means, thermal transient instrument, 16923
 flowmeters, 17464, 18805
 flowmeters with constant heating power, 17180
 imaging systems, assessment, 18149
 lensing from laser windows, infrared vidicon meas. technique, 16281
 sensitivity thermobalance, 18548
 thermophysical measurement, four heat receiver method, 17177
 thin film microdifferential analysis, 15982

Thermal conductivity

calorimetric determination, instrument, 16851
 of gases, measurement instrument, 17184
 detection, prediction of response from kinetic theory, 15956
 measurement, small cross section samples in 80–400 K range, 15957
 nonmetallic media by cylindrical probe method, 15959
 pyroelectric detector for miniature gas chromatography system, 16850
 refractory bricks by hot wire method, 16116
 on solids, detector, 18215
 on thin films, pulse meas. method, 18740

Thermal detectors

and applications, 15961
 for flow measurement, survey, 17762
 of optical radiation, 17187
 surface limit, using nematic liquid crystals, with applic. to micro-circuits, 16845

Thermal properties

of conductors at high temperatures, measurement, 16282
 diffusivity and specific heat on solids, detector, 18215
 expansion coefficients meas. apparatus, 17185
 heat capacity measurement device, 18214
 heat resistance testing arrangement, 18213
 linear expansivity measurement, 16853
 of materials, differential method for determining, 15958
 melting point measurement apparatus by α rays absorption, 16854
 specific heat at high temperatures, modulation meas. method, 16852
 transient method, 16283

Thermal radiation

absolute two-sided receiver, 16558
 detectors and optical radiation meas. applic., 18463
 flames, detmn. by beam-length variation technique, 15952
 spectral radiation coeffs. of materials meas. by comparison with black body, 16556

Thermistors

anemometer for unsteady flow-meas., 17781
 design, review, 17181
 flakes as infrared detectors, 18210
 gauges, velocity calibration unit, 17802
 miniature probes for surface temp. meas., 16552
 NTC, for temperature regulation and measurement, 18202
 radiometer, aeroportable, 17610
 temperature measurement, 17937
 for temperatures of -100 to $+100^{\circ}\text{C}$, 16844

Thermocouples

accuracy considerations, 17169
 linearization of, 17620
 low-temperature thermometry in high magnetic fields, 16285
 in microwave fields, 18736
 in range 1–1000 K, 17162
 solid-state reference junction for meas. by, 16548
 temperature measurement applications 16270
 temperature measurement in high-flux reactors, 18056
 thin-film, 15717

Thermography

at millimetre wavelengths, 17173

Thermoluminescence

photometer, automatic, 17706
 spectrometers, vacuum operating, 17962

Thermometers

absolute, use of transistors, 15950

air-temperature measurement in flight, 15951
 Allen-Bradley carbon resistor, R-T relation, 16287
 borehole, with capacitance transducer, 17567
 borehole, precision, 17568
 bridge, low-noise AC, for low temps., 15718
 carbon, for ultralow temps., 17684
 carbon, for very low temps., 18197
 carbon resistors, 17687
 cerous magnesium nitrate, with digital readout, 18739
 cryogenic, 17613
 differential, with 0.0001° resolution, 16840
 digital, 18201
 digital, with LED, 18456
 dilation-capacitor, 18199
 diode temperature probe, 17941
 electronic, 16838, 17611, 17940
 equipment review, 18738
 ferrite, for 77–303 K range, 17688
 GaAs, for 1 to 100 K range, 18198, 18455
 gas, 17168
 infrared, 17691
 Johnson noise, 16554
 low-temperature, 17938
 low temperature, in high magnetic fields, carbon resistors and thermocouples, 16285
 low-temperature, use of p-GaAs, 16841
 noise, low-noise amplifier, 16284
 paramagnetic, calibration using superconductive fixed points, 16842
 platinum resistance, calibration, 18733
 platinum resistance, easily calibrated, 17171
 platinum resistance, miniature, 17685
 platinum resistance, simultaneous measurement of electrode potential, current, temp. and heat flow, 16916
 projected refractive index, for range 2–20 K, 17165
 pulsed NMR, for use below 100 mK, 16286
 quartz crystal, use for absolute temp. meas., 17682
 resistance, for cryogenic temperatures, characteristics, 17614
 resistance, for measurement of small temperature differences, 18200
 resistance, made from Mn-doped-epitaxial GaAs, 17172
 resistance probe, 16547
 resistance, self-heating effects, 17170
 resistance, testing, 18734
 resistance, use in range 1–1000 K, 17162
 resistive low temperature, equipment set for calibration, 17690
 secondary, calibration in He^3 bath by meas. of vapour pressure, 16550
 semiconductor cryogenic, 17175

semiconductor resistance low temperature, choice of materials for, 17174
 sonic, for atmospheric turbulence meas., 18090
 thermoelectric, 18195
 thermohygrometer with heater-type moisture sensitive element, 17973
 thin-film NiCr low temp., 17683
 below 300 mk, recent advances, 18737
 yaw sphere, for heat flux meas., calibration and tests, 16553

Thermostats

electronic, for semiconductor device meas., 15699
 industrial applics., 16267

Thickness

coating, measurement errors with double-beam interference microscope, 16664
 carotid artery, ultrasonic meas., 17846
 composite films, nondestructive optical thickness detmn., 16061
 conductive plating on wire, inductive time domain reflectometer meas., 16234
 conductive plating on wires, conductive time domain reflectometer meas., 16235
 electromagnetic inspection, threshold device, 16418
 in electron microscope, backscattering cartridge for detmn. in, 16360
 f.e.t. gate insulator, meas., automated ellipsometer, 15729
 filament diameters, noncontact meas. device, 18828
 film, on curved substrates, meas., 16362
 films on transparent substrates, meas. by photoelectric detection of interference fringes, 16361
 of films, transistor frequency meter for meas., 15799
 of insulating parts and coatings, monitoring apparatus, 17795
 insulator, optoelectronic detmn., 15800
 laser measurement methods in sheeting and extruding, 17262
 layer, calculation from microprobe meas. by means of Gaussian distribution, 16665
 liquid film, comparison of meas. methods, 17484
 of liquid films, measurement by fluorescence technique, 17259
 microwave gauge, 16358
 monitoring by positron annihilation, 17794
 non-contact measurement by radioactivity, 18024
 steel sheet, gauge, 18286
 thin-film, deposited, temperature control of quartz crystals for monitors, 15798
 thin-film, effect on Abeles-type index

meas., 15967

thin-film, stylus measurement method, 16363
 thin layer, ultrasonic signal processing concept, 16359
 tube, measurement by electromagnetic acoustic pulse method, 16663
 ultrasonic gauge, operation, 16666
 ultrasonic pulse-type gauge, 16940
 wall, ultrasonic measurement, 17261

Thin films

analysis by secondary ion mass spectrometry, 17754
 analytical transmission electron microscopy, 18503
 autoradiography of, 18790
 blood, gauges for fluctuating velocity meas. in, 17026
 bolometer for power meas., 17592
 compositional analysis techniques, 18488
 deposited, temp. control of quartz crystals for thickness monitors, 15798
 electroluminescence panels, 18162
 explosive gases and vapours, recording, sensing element, 16608
 internal stress measurement, 16393
 layer thicknesses calculation from microprobe meas. by means of Gaussian distribution, 16665
 longitudinal self-diffusion studies, digital tracer scanner, 16040
 magnetoelasticity measurement instrument, 15713
 magnetometer, broadband SQUID, pumped at 10 GHz, 17155
 magnetometer, inductance-variation, developments, 16830
 microdifferential thermal analysis, 15982
 permittivity measurement, 17676
 pressure sensor, Cd_3As_2 , 18016
 radiation dosimeter system, 16332
 secondary ion mass spectrometry applic., 17966
 sensor in UHF superconducting magnetometers, 18724
 specific heat and thermal conductivity meas., pulse method, 18740
 strain gauges, distributed RC parameter, 17811
 temperature sensor, 18204
 temperature sensors for biological meas., 17011
 tension in, measurement, X-ray technique, 17813
 thermocouple, 15717
 thermoelectric transducer for low-level power meas., 17659
 thermometers, low-temperature NiCr, 17683
 thermopile for neutral particle beam meas., 16637
 thickness and growth rate meas., transistor frequency meter, 15799
 thickness, effect on Abeles-type index meas., 15967
 thickness measurement, stylus method, 16363

Time

analyzers for nanosecond range, 17158
 crystal wrist watch, 16265
 diagnostic radiologic equipment, exposure time meas., 17544
 digital period meter, 17157
 digital voltmeter, meas. applic., 17678
 high-precision measurement, 17936
 interval meter, digital, 18192
 measurement apparatus, 17934
 measuring device, 17160
 measurement, trends, 17159
 metrology, accuracy improvements, 16198
 survey of measuring systems, 17935
 units, 15714
 wristwatch, solid-state digital, 18452

Timers

applications, 18450
 reaction timer, 18726

Torque

AC motors, measuring instrument for, 17803
 angle, of synchronous machine, digital meas. device, 18027
 contactless meters, 17496
 design evolution, 18135
 dynamometer, fast response, 16070
 four-component dynamometer, 17801
 laser torque measuring device, 16986
 magnetostrictive pick-up for meas., 18546
 measurement applications, 17804
 Weissenberg rheogoniometer meas. system, 16348

Tracking

wildlife, automatic system, 17874

Traffic

automobiles, electronic methods of diagnosis, 18867

Training

audiometry, aid, 16153

Transducers

for AC reactive power meas., 17661
 for angular displacement meas., 18827
 for biomedical measurements, 17532
 capacitance, borehole thermometer with, 17567
 correction for standing-wave ultrasonic velocity meas., 16675
 displacement, magnetoresistor, increasing linear range, 16371
 for electrical quantities meas., 16217
 electron-tube magnetic field, 18446
 electro-optic position, for meas. of large length changes in muscle, 16138
 ferromagnetic, for testing cylindrical bodies, 16693
 force, review, 17495

gas-electric, 16606
 Hall, ferromagnetic cct. with, for DC meas., 15933
 Hall, magnetic field measurement, 18723
 loading, for NDT and signal processing by acoustic bulk waves, 16099
 magnetic induction, with compensating device, 16259
 magnetoanisotropic, for meas. of force in rolling, 18318
 magnetometer with, 17156
 market and technological trends in, 18126
 mechanical displacement to electric signals, non-contact electromagnetic, 15791
 piezoelectric ultrasonic, calibration, 16383
 resonance frequency, 18018
 shock and vibration, 18291
 static convertors of electrical capacitance and inductance, 16219
 strain, 18843
 strain, reusable biaxial, 16966
 strain, temperature compensated Si, 16402
 tachometric, for measurement of velocities in water, 16648
 temperature and physical parameters, 18735
 temperature, IC, 17619
 temperature of rotating machine elements meas., 17315
 temperature, solid-state, 17939
 thin film thermoelectric, for low level power meas., 17659
 ultrasonic, monitoring physicochemical parameters of media, 15740
 for vibration measurement in hostile environments, 16381
 voltage and current DC and AC, 17660
 voltage, instantaneous-value, 17136

Transformers

digital measuring equipment, 16819
 instrument, for pulsating meas., 17663
 insulating oils, relative humidity meas., 16316
 measurements using bridge ccts., 16532
 remote measurement and control in stations, 17003

Transients

on overhead networks, 11 kV, meas., 16700

Transmitters

multichannel temp. and heart rate radio-telemetry, 16717
 temperature, VHF, 16275

Transport

bicycle tachometer/speedometer, 18028
 car tachometer, electronic, 18594

car testing, partially automatic, 17321
 train location detector, continuous type, with inductive lines, 18869

Turbidimeters

atmospheric, note on use of photoelectric photometer, 15871

Ultrasonics

absorption and velocity, installation for studying variations of, 15807
 attenuation measurement, liquid buffer technique, 18553
 blood flowmeter, Doppler shift, 16922
 blood pressure, infant, meas., 15863
 blood velocity, catheter-tip, single-crystal probe, 17333
 calibration of fields, comparison of methods, 16384
 concentration measurement, continuous, differential device, 17249
 diagnosis, calibration and quality control, 16449
 diagnostic uses in medicine and biology, bibliography, 15856, 15857
 display dynamic range expansion method using system gain wobulation, 15862
 display system, three-dimensional, 17416
 Doppler system for blood flow meas., 18076
 echocardiography, development, 15845
 fault detection in high-voltage porcelain insulators, 18040
 field-intensity measurement instrumentation, 17280
 flow velocity meas. method, 16339
 imaging of arterial wall echoes, 15861
 imaging system using time delay spectrometry, 15860
 industrial applications of low-intensity ultrasound, 18048
 intrusion detectors, selection criteria, 17306
 level alarm and control devices, trends, 17471
 marine animal behaviour telemetry system, 17545
 measurement at low temperature, instrument for, 17612
 medical applications, 16713
 in medicine, 17328
 megahertz fields in liquids, measurement using probes, 18838
 metals and alloys, elastic constants meas. at low temps., 16954
 piezoelectric transducers, calibration, 16383
 power outputs detmn. in microwatt-milliwatt range, 15812
 in radiotherapy, 15859
 rot detection in wooden poles, vibration technique, 17004
 shark behaviour study, telemetry, 18331

spherical section scanner, automatic, 15858
 transducers for monitoring physicochemical parameters of media, 15740
 velocity measurement, standing-wave, transducer correction, 16675
 wave propagation constant meas., 16073

Ultraviolet

holography, vacuum, 17404
 irradiance, low levels, radiometer for monitoring, 16187
 marine wastewater outfalls monitoring, 18367
 molecular absorption spectrometry, vidicon scanning spectrometer, 18495
 photoelectron spectroscopy, surface studies applics., 17752
 polystyrene detmn. in paper products, 16707
 radiation, vacuum, physics of, 17964
 recorders, direct-writing, 18409
 scintillation counters, gas-proportional, 16329
 far, spectral radiance calibrations, 16584
 spectrograph, extreme UV, 18106
 spectrograph using microchannel plates, 18771
 spectroheliometer, photoelectric, on Apollo telescope mount, 18105
 spectrometer, EUV, on board satellite, 17876
 spectrometer, extreme ultraviolet, for space research, 16184
 spectrometer, Hadamard, 17198
 spectrometer, photoelectron, 17439
 spectrometry, literature review, 17205
 vacuum, absolute photon-flux meas., 15971

Ultraviolet detectors

visible light, detecting in presence of, 16860

Ultraviolet sources

spectroscopy, vacuum ultraviolet, using BRV continuum source, 15996

Underwater

communications, superconducting ELF magnetic field sensors, 15709
 impulse measurements, 18293

Units

of electrical energy at 60 Hz, 17577
 measurements, SI, 18397
 optoelectronic devices specifications, 18216
 SI, and instruments, 17377
 SI, and standards, 17375
 SI, development, 17376
 SI, general aspects, 17370
 SI, in gravimetry, 17565
 time, 15714
 torr vs. pascal, 17474

Vacuum

- chamber, positioning mechanism, 16069
- cylindrical chamber, detmn. of absorptivity of inside surfaces, 16048
- fatigue tests in, at low temperature, apparatus, 16683
- high temperature unit for precision creep testing, 16983
- hydrogen detector, ultrasensitive, and applics., 16609
- internal volumes of systems, meas. apparatus, 16668
- mass spectrometer, quadrupole, for operation in high vacuum systems, 16308
- microbalances, 17266
- microscopic investigations in, device for, 17389
- molten refractory metals, surface tension meas., 16659
- pressure measurements, review, 17239
- spectroscopy, vacuum ultraviolet, using BRV continuum source, 15996
- ultraviolet holography, 17494
- ultraviolet radiation, physics of, 17964

Vacuum gauges

- high-pressure ionization, linearizing characteristics of, 16421
- ionization type, sensitivity, 16047
- pulsed discharge, 18279
- ultrahigh, modulated Bayard-Alpert, 17240

Vapours

- atmospheric water, satellite observations, 16167
- detector with semiconductor sensor, 16898
- evaporation rate monitor, 18818
- explosive, recording, thin film sensing element, 16608
- liquid crystal detectors, 17750
- of nonvolatile substances, photoelectron spectrometer, 17749
- pressure measurement at high temps., 18277
- pressure measurement, dynamic Knudsen-effusion-torsion balance, 16927
- pressure measurement of organic compounds below 0.1 Torr, 16926
- water, in stratosphere, aluminium oxide sensor, 16744
- water, interferometric measurements, 16472
- water, measurements, field instrument, 18629

Vehicles

- automobile industry, instrumentation in, 18326
- exhaust gas sensor, 17555
- identification system, microwave automatic, 15838
- noise measurement, test of proposed

- method, 15825
- off-road construction, noise meas. and characterization, 15826
- radar, automotive, review, 16443
- tyre tester, computer-compatible, 16112

Velocity

- calibration unit for thermistor gauges, 17802
- digital measuring device, 17800
- gases, fast streaming, rotating-mirror method, 18268
- light, use of lasers for meas., review, 17632
- liquid stream, laser Doppler meas. in boundary layer investigation, 15783
- measurement by self-tracking correlator, 16671
- particulate, monitoring using Doppler radar, 18814
- position measurement, time-resolved, 16660
- slow-cracks in brittle solids, micro-probe technique, 15816
- sound, measurement using phase detection of optical beat, 17807
- standing-wave ultrasonic meas., transducer correction, 16675
- ultrasound, installation for studying variations of, 15807
- in water, tachometric transducer for meas., 16648
- wave, on sloping beach, laser doppler meas., 16035

Vibration

- aircraft, measurement, 16101
- amplitudes measurement, optical heterodyne method using narrow-band filter, 16674
- analysis, hologram interferometry for, 18031
- crystal, interferometric measurement, 16379
- dynamic characteristics meas., 18835
- dynamic testing systems compared, 17294
- holographic measurement, 18029
- in hostile environments, special transducers, 16381
- instrumentation, 17514
- laser Doppler heterodyning meas. technique, 17806
- of machinery, measurement, 18030
- machine wear monitoring, 18315
- measurement in severe environments, 16380
- meter for analysis, 18290
- meter, laser, 18292
- nuclear reactor, instrumentation, 16442
- optical detection of amplitude and phase, 16372
- optical heterodyne arrangements with two-frequency radiation source for meas., 16673
- pollution measurement study, 16468
- resonance, in investigation of dynamic mechanical props. of polymers,

16696

- signature analysis, 18836
- stochasticmeter, simulation and meas., instrument, 16195
- transducers, 18291
- viscometry, vibrating sphere, 16055
- visualization using scanning and holographic methods, 16952

Viscometers

- apparent elongational viscosity meas., 18529
- automatic capillary, 16053
- Bourdon helical tube type, 17468
- Bourdon tube continuous, 17250
- capillary constant pressure, for disperse systems, 17470
- coaxial cylinder oscillating, 15785
- continuous, for non-Newtonian fluids, 17787
- Couette, blood viscosity meas., 18074
- design and applications, 18020
- high-temperature, development, 16711
- multichannel capillary, 18530
- penetration, investigation, 18274
- process, rotating shaft type, 17469
- rheoelectro-, rotational, 16056
- rotary, for study of rheological properties of disperse systems and of high-molecular-weight compounds, 16054
- rotating, for process control, 16424
- rotating rod, 18821
- rotational, for investigating Newtonian and structured liquids, 16931
- simple capillary, 18528
- thrombo-, automatic, 17845

Viscosity

- measurement using Clark oxygen electrode, 18823
- scale at NPL, 18822
- vibrating sphere, 16055

Voice

- fundamental frequency analyzer for clinical phoniatrics, 18620

Voltage

- AC-DC high, with balance, design and construction, 18728
- alternating, zero indicator with disturbance suppression, 18707
- arc, of arc furnace, meas., 17523
- calibrating source, 16522
- DC, measurement nanovolt range, 17668
- diagnostic measurement, indicating lamp system, 16232
- disturbances on customers' equipment causes and effects, 15943
- divider for double-focusing mass spectrometer, 17742
- electro-optical measurement methods, 17581
- excursions outside set limits, monitor detection circuit, 18706
- fast measurement of linear rectified mean values, 16121
- fluctuations caused by electric arc

furnaces, meas., 16114
 frequency of, digital meas. method, 15685
 HV indicator, contactless, 18179
 HV measurement method, 17924
 interference, effect in electrical meas. techniques, 16810
 measurement techniques, 17664
 metrological problems, 18671
 plotter, current-voltage, 18426
 recorder for deflections and fluctuations, 16813
 regulation, measurement of series condenser capacitance, 16246
 RF, in quartz crystal microbalance meas., nonmetallic films applic., 16071
 sensitive detector, 18431
 transducer, 17660
 transducers, instantaneous-value, 17136

Voltmeters
 d.c. microvoltmeter, 15684
 differential, applications, 17665
 digital, converted to fluxmeter, 18181
 digital, for instantaneous voltages meas., 16245
 digital integrating, 17134
 digital panel, using IC, 17666
 digital, testing of electrical meas., instruments by, 15936
 digital, time interval measurements applic., 17678
 digital, with automatic selection of recording time, 17582
 digital, with automatic zero adjustment, 18176
 distorted AC, digital r.m.s. meas., 16249
 EHT, rugged and accurate, 17925
 electronic, 17667
 electronic DC, 18705
 electronic, qualimetry of, 17926
 high-capacitance, based on op amp, 18177
 indicator, multi-channel, 18033
 kilo-, testing apparatus, 18434
 LED, 17133, 17583
 liquid-crystal, 17586
 low-cost electronic, 18703
 milli-, FET, for d.c. and a.c. voltages, 18178
 milli-, nonlinear distortion filter, 15682
 millivolts meas. with multimeter, 18704
 milli-, with distortion feature meas. attachment, 18432
 precision digital, 18702
 pulse, testing, 18433
 reversed tunnel diode in, 17585
 RMS value, optimal design, 18180
 rotor, using insulated electrode, for HV meas., 17584
 stripping voltammetry, hanging mercury drop electrode, in glass-corrosive media, 15686
 three-range f.e.t., 17135
 transformer-thermal convertor, for meas. of r.m.s. values of alternating

voltages up to 50 kHz, 16809
 turntable rumble, development, 17137
 virtual value, 16812

Volume
 of gases, measurement, 18525
 microlitre sample, electronic meas. device, 16052
 particle, microwave meas. instrument, 16378
 plethysmograph, capacitance, for small changes meas., 17027
 pneumometric meter, 17472
 remote measurement, intracranial pressure meas. applic., 18614
 of vacuum systems, measuring apparatus, 16668
 volt-ohm, operation and calibration, 15937
 weak-signal measurement, 15934

Water
 boiler feed-water, potentiometric sensor for ammonia determination, 15827
 city water works instrumentation, 18593
 current and temperature meter with magnetic recorder, 18641
 dilute organic acids in, detection by inelastic tunnelling spectroscopy, 16612
 electronic gauge, 18019
 hydrology, applics. of remote sensing, 16180
 level sensors, capacitive, effects, 16049
 nuclear reactor pressurized water test loop, 16122
 quality control, dissolved oxygen meas., 15882
 quality control instrumentation, 18094
 recirculating film, calibration and use of conical hot film anemometer probe, 16644
 reservoir bottom, meas. of increases of load forces using gravimeters, 16171
 seawater parameters meas., AC bridge, 17351
 surface tension by oscillating jet, 18531
 ultrasonic field in, 17814
 vapour, interferometric measurement, 16472
 vapour measurement, field instrument, 18629
 velocities in, tachometric transducer for meas., 16648
 waste, flow measurement, 18049
 wave measurement on sloping beach, laser doppler, 16035
 waves, linear twin wire probe for meas., 18370

Waves
 ocean, space-time characteristics recorder, 17349
 water, linear twin wire probe for

meas., 18370

Weighing
 automatic in chemical laboratory, 15737
 beamless balance, self-compensating, 17265
 belt, non-contact meas. by radio-activity, 18024
 bulk solids, flowmeter, 16032
 continuous, cement industry applic., 16426
 density, liquid and gas, meas. applic., 17247
 digital, by modular systems, 18834
 hydraulic system, 16072
 increments, electronic techniques, 18547
 machines, construction advances, 18833
 testing of devices, 18550
 vacuum microbalances, 17266

Welds
 Al-Cu, NDT using acoustic emission techniques, 16413
 fatigue crack development, automatic recording, 18840
 strains during welding, Moiré meas. technique, 16962
 ultrasonic portable flow detector, 16411
 ultrasonic scanning method, 16410

Wind
 measurement accuracy for balloon systems, limitations, 16742
 velocity profile, remote detmn. by statistical inversion procedure, 16164

X-rays
 astronomical telescopes, 18121
 astronomy, 18911
 astronomy, all-sky camera battery for, 17882
 astronomy, aperture synthesis in, 17880
 astronomy, instrumentation evolution, 18376
 avalanche diodes for radiation monitoring, 16328
 charged-particle induced X-radiation for trace elements analysis, 16901
 cosmic, measurements, 18913
 crystallography, technique, 18249
 detectors made from intrinsic germanium, 16026
 diagnostic equipment standard, evaluation of test methods for detmn. of compliance with, 16450
 diagnostic tube potential, field meas., 16451
 diffraction microscopy, video display technique, 16591
 diffraction, review, 17206
 electron spectroscopy source, 18762
 exposure rate calibration of instrumentation, use of ^{129}I , 16144

- flaw detector, TV high-energy, 18302
- fluorescence analysis, calibration for interelement effects, 15999
- fluorescence analysis, single standard method, 16884
- fluorescence, use of chemical analysis, 16881
- fluorescence, determination of concentration in chemical elements applic., 16331
- fluorescence, film dosimetry applications, 18800
- fluorescence for trace-element analysis, 18247
- fluorescence, remote measurement of fluid volume, intracranial pressure meas. applic., 18614
- fluorescent analysis of small amounts of material, 16323
- fluorescent thyroid scanners, neutron and photon flux, 16145
- holographic microscopy, 17110
- image intensifiers, 17386
- image intensifiers, production testing, 18063
- interferometer, four-block, 15747
- interferometers and resonators, 15746
- leakage from electron microscopes, radiological significance, 16143
- lithography applications, 16106
- low-energy beams, calibration for, 16627
- medical equipment calibration laboratory, 16140
- medical imaging, state-of-the-art, 18069
- microbeam diffraction technique in local plastic strain meas., 17287
- microscope, scanning pinhole, 17400
- non-destructive elemental analysis applic., 16325
- observatory for small astronomy satellite, 18912
- penetrating-radiation image converter, 17385
- photoelectron spectrometer for surface research, 15759
- photoemission spectroscopy, 16882
- photoelectron spectroscopy, surface studies applics., 17752
- polarimeter for investigation of radiation from solar eruptions, 15893
- ratio-densitometry for circulatory diagnosis, 17023
- satellite, 18377
- small-angle diffractometer, automatic, 15749
- soft, design characteristics of Skylab telescope, 18122
- soft, gas xenon scintillator for registration, 15775
- spectrographic telescope, 18123
- spectroscopy, review, 17441
- stellar astronomy, Li F Bragg spectrometer, 18659
- strain rig, 16079
- stratospheric, balloon-borne meas. equipment, 18097
- stress measurement, progress, 17282
- textures, source of errors in quantitative detmn., 16320
- thin-films, tension meas. technique, 17813
- topographic spectrometer, DTS two-crystal, 15750
- tube-assembly, improving image quality, 17646
- tube for investigation of Mossbauer effect, 16622
- tubes, imaging characteristics detmn., 18408
- TV image perceptibility, 18407

Author Index

Please refer to the *Guide to the indexes* on page 2.

Items with two or more authors have only the first author indexed.

Double names are indexed under both parts of the name.
